

Farmers & Distribution

How to set up and run the module on the web: farmers, contracts, approvals, stock and distribution, progress and reports.

About this manual

This manual explains the **Farmers & Distribution** module of the web system from start to finish. It covers every screen: setting the module up, keeping farmer records, assigning and approving contracts, receiving and issuing stock, and following progress. It is written for everyone who works in the web system, whatever their job.

The chapters follow the order in which the work is normally done. Read Chapter 1 first. After that, read the chapters for the work you do, or read the whole manual to learn the whole module.

Chapter	What it covers
1 • Getting started	The screen layout, finding screens, your profile, training, and the controls every screen shares.
2 • Setting up	Hierarchy levels, locations, managers, settings and the approval workflow.
3 • Farmers	Farmer records, the inputs each farmer gets, imports and exports, and club Chairpersons and Secretaries.
4 • Contracts	Assigning, changing and ending contracts, club contracts and contract templates.
5 • Approvals	The Inbox: approving and rejecting contracts, issues and returns, one by one or in bulk.
6 • Distribution	Warehouses, stock items, cycles, receiving stock, issues from the phone and stock levels.
7 • Monitoring	Dashboard, Progress, Reports, Internal Broadcasts and the Audit Log.
8 • Reference	Statuses, rules to remember, Excel files and words used.

How to read it

- Words in **bold** are buttons, tabs, fields and messages exactly as they appear on the screen.
- A path such as **Distribution Master** › **Warehouses** means: open **Distribution Master** in the menu, then click the **Warehouses** tab.
- Numbers in orange circles on a picture match the numbered list under it.
- Levels are written L1, L2, L3 and L4.** L1 is the top of your hierarchy and the highest number is the lowest level. Your company gives each level its own name, and the screens show those names. The example data in this manual calls them Level 1 to Level 4.
- Club** means a location at the lowest level of your hierarchy (L4 in the examples). The screens use this word too, for example for club contracts and club warehouses.
- Fields your company creates itself (profile fields, location fields, contract fields) have the names your company gave them. The pictures show example names.
- What you see depends on the rights your administrator gave you. If a screen or button in this manual is missing on your screen, you do not have access to it (Chapter 1).

About the pictures

The pictures come from a test copy of the system filled with example data: *Sample Farmer 001, Location A1.1, Club 01, Warehouse 2, Fertiliser A* and so on. None of it is real. Your company logo appears where the pictures show **YOUR LOGO**. Colours can differ slightly from your screen.

What's new in version 1.1

Version 1.1 brings the manual up to date with the changes made to the module since version 1.0 (September 2026). Every chapter has changed, so in Training every page of version 1.1 starts as unread, also for people who finished version 1.0.

Where	What changed	Read
Every list	Choose and order the columns, sort by any heading, and search under each heading. Your layout is saved for your user.	Chapter 1
Pop-ups and Excel files	Questions and messages are clearer cards. Exports have a heading, your logo, the filters used and a summary.	Chapter 1
Profile menu	A new My Profile screen (details and password), Training and Help & Tours .	Chapter 1
Settings	The menu is grouped. New: rollout target, report sign-off columns, one active season with season dates for all contracts, partial distribution, inputs summary on the phone, renamed fields keep their values, the fields under the farmer's name, the club membership card, location field symbols.	Chapter 2
Locations Master	Columns, Filter by Warehouse, and clubs flagged when they have no Chairperson or Secretary.	Chapter 2
Workflow	Step 0 for club contracts (Chairperson & Secretary on the phone), and value rules: a higher Final level for clubs that meet a number.	Chapter 2
Farmers Master	A filter and a column per level, the inputs each farmer gets in the running cycle, Export Custom List, and more on the farmer profile.	Chapter 3
Chairperson & Secretary	Columns, the Not assigned clubs tab, one-step set-up for one-farmer clubs, and the membership card picture.	Chapter 3
Contracts	Columns and search under the headings, season dates, the default contract on the phones, and more detail on club contracts.	Chapter 4
Inbox	A Show filter, search under the headings, a review question for bulk approval, and a clearer Reject.	Chapter 5
Distribution	Category quantities, Incoming Logs columns and export, warehouse search, and what is still owed after a partial issue.	Chapter 6
Monitoring	Dashboard counts farmers, Progress is now a tab on Contracts and on Distribution Master, and Reports is one screen with a report list, including three new reports.	Chapter 7

CHAPTER 1

Getting started

What the module does, how the screen is laid out, your profile, training, and the controls that work the same way on every screen.

What the module does

Farmers & Distribution keeps the records of your farmers, the contracts they sign and the inputs they receive. The field staff capture contracts and issues on the mobile app. The web system is where everything is set up, checked, approved and followed up. The work moves through six stages:

1**Set up**

Hierarchy levels, locations, managers, settings and approval rules.

CHAPTER 2**2****Farmers**

Farmer records, imported from Excel or added one by one, and club Chairpersons and Secretaries.

CHAPTER 3**3****Contracts**

Contracts are captured on the phone or assigned on the web, from your contract templates.

CHAPTER 4**4****Approvals**

Contracts, issues and returns move up the hierarchy. Each level approves them in its Inbox.

CHAPTER 5**5****Distribution**

Stock is received into warehouses, issued to farmers on the phone and leaves the warehouse when the issue is approved.

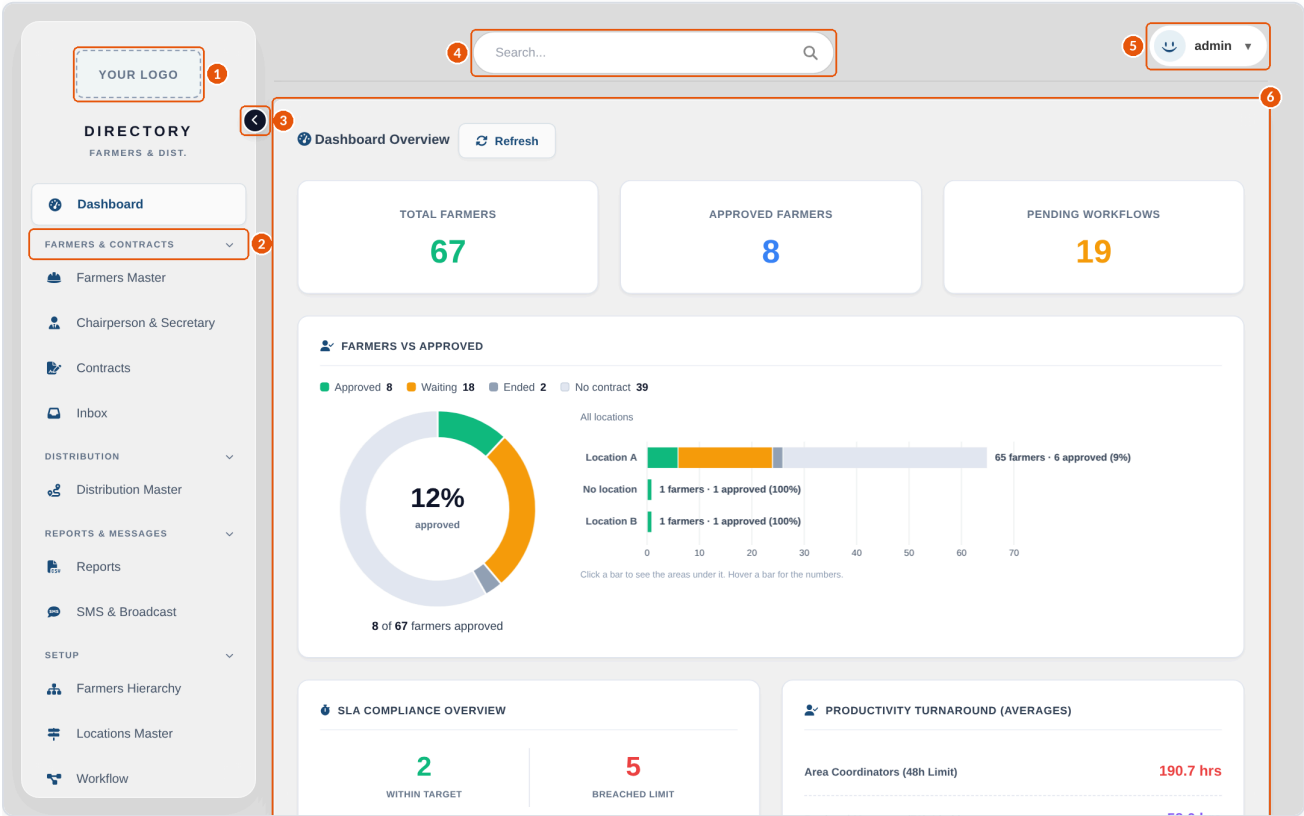

CHAPTER 6**6****Monitoring**

Dashboard, Progress, Reports, broadcasts to users and the Audit Log.

CHAPTER 7

The screen

Open the module from the Launchpad. Every screen has the same layout.

The Dashboard, the first screen after opening the module.

- 1 **Your company logo.** Click it to go back to the Launchpad.
- 2 **The menu.** Screens are grouped under **Farmers & Contracts**, **Distribution**, **Reports & Messages** and **Setup**. **Dashboard** sits above the groups. Click a group title to open or close it. The system remembers on this computer which groups you left open, and always opens the group of the screen you are on.
- 3 **Menu size.** The round arrow button (**Toggle Sidebar**) shrinks the menu to icons only, to give the screen more room. Click it again to show the names.
- 4 **Search.** Finds any screen you may open, in this module and in the rest of the system.
- 5 **Your profile menu.** Your name and photo, with your profile, Training, Dark Mode and Logout (below).
- 6 **The work area.** The screen you chose in the menu.

The menu contains these screens:

Group	Screen	Used for
-	Dashboard	Totals, how many farmers are approved, approval speed and the location tree with managers (Chapter 7).

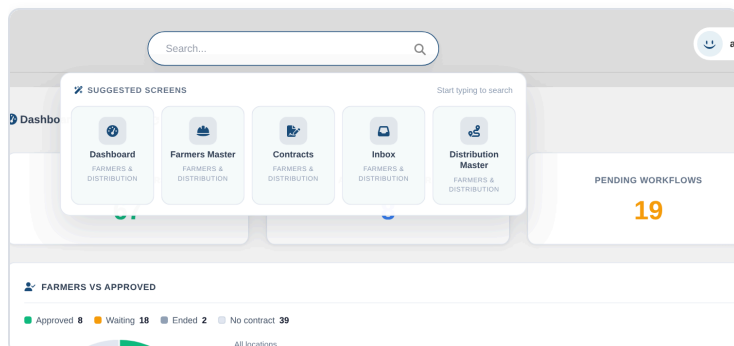

Group	Screen	Used for
Farmers & Contracts	Farmers Master	Farmer records, the inputs each farmer gets, imports and exports (Chapter 3).
	Chairperson & Secretary	The office bearers of each club, and the clubs that have none (Chapter 3).
	Contracts	Contracts, contract templates and the contracts rollout progress (Chapters 4 and 7).
	Inbox	Approvals waiting for you and for the levels below you (Chapter 5).
Distribution	Distribution Master	Issues from the phone, stock, deliveries, cycles, warehouses, stock items and the distribution progress (Chapters 6 and 7).
Reports & Messages	Reports	Reports on screen and in Excel, and reports emailed on a schedule (Chapter 7).
	SMS & Broadcast	Messages to system users: Internal Broadcasts (Chapter 7).
Setup	Farmers Hierarchy	Hierarchy levels and manager assignments (Chapter 2).
	Locations Master	Every location and club, with its details (Chapter 2).
	Workflow	Approval rules, timers and stand-in approvers (Chapter 2).
	Settings	Module settings (Chapter 2).
	Audit Log	A permanent record of every change (Chapter 7).

Progress has moved

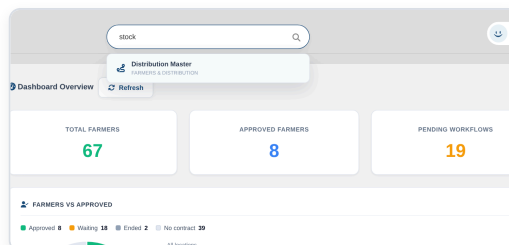

Progress is no longer a menu item of its own. It is the **Progress** tab on **Contracts** (the contracts rollout) and on **Distribution Master** (the inputs distribution). Old links to Progress open the tab on Contracts.

Finding a screen

Click in the **Search...** box at the top. Before you type, it shows five screens to go to straight away: **Pinned & most visited**, **Your most visited screens** or, when you are new, **Suggested screens**. Each card shows how often you opened it. Click the pin on a card to keep it there; you can pin up to five screens. Your pins and visits are saved with your user, so they follow you to another computer.

Quick access, before typing.

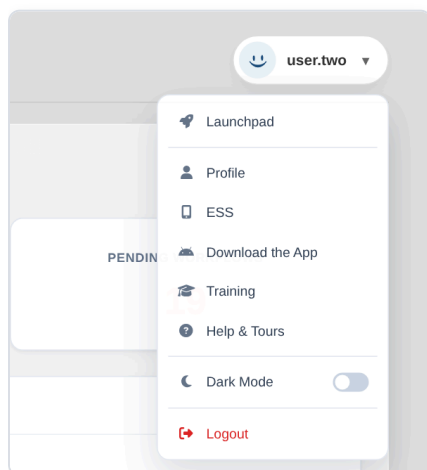

Search results while typing.

Start typing to search. The list shows up to eight screens you may open, from every module of the system. Use the arrow keys and **Enter**, or click a result. **Esc** closes the list. When nothing matches you see **No matching screens you have access to**.

Search on one word

Every word you type must appear in the screen name, the module name or the screen's key words. When a longer phrase finds nothing, try one word, for example *hierarchy* or *stock*.

Your profile menu

The profile menu.

Click your name at the top right.

- **Launchpad** goes back to the list of modules.
- **Profile** opens **My Profile** (below).
- **Settings** opens System Settings. It shows only when you have rights there.
- **ESS** opens ESS.
- **Connect a Phone** shows the QR code that links a company phone to your company. It contains your company licence key, so show it only while setting up company phones. It closes by itself after two minutes. It shows only when you have rights in System Settings.
- **Download the App** shows a QR code and a link to download the Android app.
- **Training** opens the training manuals and videos (see Training and help, below).
- **Help & Tours** starts the guided tours of the screen you are on.
- **Dark Mode** switches the colours to dark. **Logout** signs you out.

My Profile

My Profile: the Details tab.

The Security tab, with a new password typed.

The top shows your name, your role and company, your username and **Previous sign-in**: when you signed in before this time. If you do not recognise that sign-in, change your password.

- **Details.** Your first name, last name and email address. When your user is linked to an employee, **My employee record** shows your employee details; they are kept up to date by HR and cannot be changed here.
- **Security.** To change your password, type your **Current password**, then the **New password** twice. The eye shows what you typed. The bar shows how strong the password is, and the checklist ticks off each rule: at least 8 characters, at least one symbol, both new passwords match, and different from your current one. Leave the boxes empty to keep your password.
- **Save Changes** becomes available once you change something. A dot on a tab shows it has changes. When you change only your details, the system asks for your password first (**Confirm it's you**), then **Confirm & Save**.

Wrong passwords

After five wrong passwords, saving is blocked for 15 minutes: **Too many wrong passwords. Try again in N minutes.** The company's main admin account cannot be changed here; TNA Africa manages its name, email and password.

Automatic logout

After 15 minutes without activity you are logged out: a **Logged out** message tells you why and takes you to the login page after 10 seconds, or straight away with **Go to login**. When your session expires for security, the message is **Session timed out**. Anything you had typed but not saved is lost.

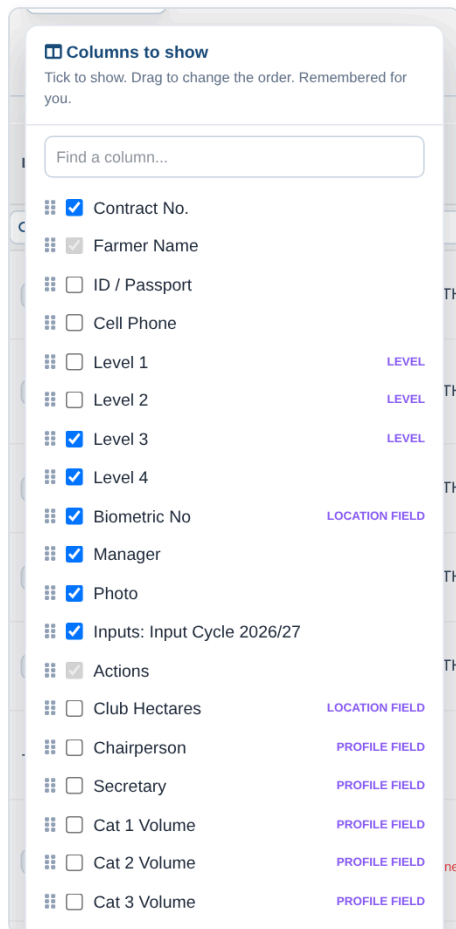

Controls on every screen

Lists

- **Search boxes** filter the list as you type.
- **Filters** opens more filters in a drop-down. Most filters apply when you click **Apply Filters**. Filters in use show as tags next to the buttons; the **X** on a tag removes that filter. Filters are not kept when you reload the page.

- **Data Tools** holds the Excel actions of a screen: download a blank template, export, import, and see past imports.
- **Paging.** Long lists show one page at a time, with **Previous** and **Next** underneath. Where the list has **Rows per page**, your choice is saved for your user.

Columns, sorting and searching under the headings

Columns to show (Farmers Master).

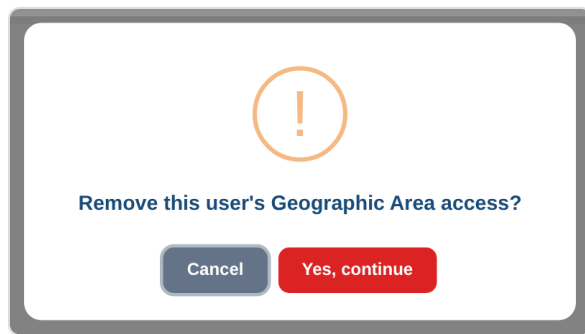

Farmers Master, Chairperson & Secretary, Contracts, Incoming Logs and Reports work the same way. Locations Master has its own Columns list (Chapter 2), and the Inbox has the search boxes under its headings.

- **Choose the columns.** Click **Columns**, or right-click any column heading. Tick the columns to show and drag them up or down to change the order. **Find a column...** finds one in a long list. Columns that are always shown have a greyed tick: they can be moved but not hidden. **Reset to default** goes back to the standard layout; **Done** closes the list.
- **Move a column.** Drag its heading left or right. A blue line shows where it will go.
- **Sort.** Click a heading to sort by it (A to Z, smallest or oldest first); click again for the other way. Empty values go last. The sort covers every page, not only the one on screen.
- **Search under a heading.** The row of **Search** boxes under the headings searches one column each. Every word you type must appear in that column, in any order. Several boxes work together, and with the other search and filters. A box in use turns blue; **Esc** clears it.

Your columns, their order, the sort and the searches under the headings are saved for your user, so they are the same on any computer. A column added later (for example a new level or field) appears in its standard place.

Pop-ups

Adding and editing is done in pop-ups. **Cancel** or the **✕** closes a pop-up without saving. A pop-up can be made bigger: drag the small diagonal grip in its bottom-right corner (**Drag to resize (double-click to reset)**). The system remembers the size you choose on this computer.

A question before a change that removes something.

Questions and messages. Before a change, the system asks in a card. The button that goes ahead tells you what kind of change it is:

- **Approve** (green) for an approval;
- **Yes, continue** (red) for a change that deletes, removes, deactivates, rejects, overwrites or undoes something. **Cancel** is selected, so pressing **Enter** does not go ahead by mistake;
- **Yes** for anything else.

Messages show in the same kind of card with **Understood**.

Short confirmations, such as **Saved**, appear for a few seconds at the top right.

Dates

Where a screen filters on a period, the **Dates** box opens a calendar. Drag across the days, or click a start day and then an end day. For one day, click that day twice. The **✕** in the box clears the dates.

Excel imports and exports

Imports work in a similar way on every screen:

- 1 Download the template (or an export) so the columns are right.
- 2 Fill it in, save it, and choose it in the import.
- 3 Most imports check every row and show a preview first. **Nothing is saved until you click the import button.** Each chapter explains what its import checks.
- 4 Some imports can be undone afterwards. Chapter 8 lists which.

Export Custom List (Farmers Master, Chairperson & Secretary, Incoming Logs) and the Reports export give exactly the list you see: every row your search, filters and heading searches leave, on all pages, with the columns you show, in your order. The file has your company logo, a title, the date and the filters used, a summary line, and headings with a filter button that stay at the top while you scroll.

Training and help

Training in the profile menu opens the training manuals for the modules you use, including this manual, and their videos.

- **Reading.** **Start** or **Continue** opens the manual page by page, where you stopped. After reading a page for 20 seconds, click **I have read this page**; the counter pauses when you stop moving the mouse or scrolling for a minute. Your progress is saved as you go: **N of M pages read**. **Download PDF** gives the whole manual.
- **New versions.** When a manual is updated, pages that did not change stay read. Pages that changed are unread again, so your progress shows what is left to read.
- **Videos.** **Watch videos** plays the videos chapter by chapter. A video counts as watched when you have played 90% of it; skipping ahead does not count. Videos continue where you stopped.
- **Reports.** System administrators see a **Reading report** and a **Video report**: who has started, who has finished, and the time spent, with an export to Excel.

Help & Tours in the profile menu starts a guided tour of the screen you are on. It points at each part of the screen and explains it.

What you can see and do

Two things decide what the module shows you:

- **Your rights.** Your administrator decides which screens, tabs, reports and actions you may use (System Settings, on your role or your own user). Screens and buttons you may not use are hidden. When you try an action you have no right to, the message **You do not have permission for: ...** tells you which right is missing. Ask your administrator to add it.
- **Your locations.** On **Farmers Hierarchy › Manager Assignments** you are assigned to one or more locations. You see the farmers, contracts, warehouses and approvals of those locations and of every location below them.

Users with no locations see everything

Administrators, and users who are not assigned to any location, are not limited to locations: they see every farmer, contract and warehouse. Assign every user to their locations.

CHAPTER 2

Setting up

The screens under **Setup** in the menu: the hierarchy, locations, managers, settings and the approval workflow. They are normally set up once, before the season starts, and changed only when your organisation changes.

The order to set things up

Each step uses what the steps before it created. Following this order avoids import errors.

#	Where	What
1	Settings › General, Seasons, Contract Rules	Currency, the season, and what the phones are allowed to do.
2	Farmers Hierarchy › Hierarchy Levels	The levels of your organisation, L1 at the top.
3	Settings › Location Fields	Extra details kept on locations, for example a unique club number or the club's hectares.
4	Locations Master	Every location and club, usually imported from Excel.
5	Distribution Master › Stock Items & Product Types	Stock items, products and what each product gets (Chapter 6).
6	Distribution Master › Warehouses	Warehouses and the locations they serve (Chapter 6).
7	Settings › Profile Fields, Contract Fields, Chairperson & Secretary Fields	Extra details kept on farmers, contracts and club office bearers.
8	Contracts › Contract Templates	The contract documents (Chapter 4).
9	Farmers Hierarchy › Manager Assignments	Which user looks after which locations.
10	Workflow	How approvals move up the levels.
11	Distribution Master › Cycles	The distribution round and what each contract receives (Chapter 6).
12	Farmers Master	The farmers, usually imported from Excel (Chapter 3).

Hierarchy levels

Farmers Hierarchy › **Hierarchy Levels** holds the levels of your organisation, from the top (L1) down to the clubs. Each level has the name your company uses for it, and the screens use those names, for example in labels, columns and filters.

HIERARCHY LEVELS		
Collapse all 1 + Add Level		
LEVEL	POSITION	ACTION
▼ L1 Level 1	TOP	
▼ L2 Level 2		
▼ L3 Level 3		
📍 L4 Level 4	DEEPEST	

Four levels. The names are your own; the example uses Level 1 to Level 4.

- The tree shows each level with its number (L1, L2 ...) and its **Position: Top** or **Deepest**.
- The pencil renames a level. The bin deletes it. A level that locations still use cannot be deleted; the system lists what is still using it.

To add a level

Add Hierarchy Level

LEVEL NAME

e.g. Region, Branch or Site

POSITION

Bottom - becomes L5 (below Level 4)

This will be added as L5, the deepest level.

This writes to the database as soon as you save. Level names become the column headings on the bulk assign template.

Cancel

Save Level

- 1 Click **Add Level**.
- 2 Type the **Level Name**.
- 3 Choose the **Position**: at the top, between two levels, or at the bottom. The hint underneath says which number the new level gets. Levels below it move down one number and keep their locations, managers and workflow rules.
- 4 Click **Save Level**. It is saved straight away.

Add Hierarchy Level.

Level names are column headings

The level names become the column headings of the Locations, Farmers and Manager Assignment Excel templates, and of the level columns and filters on Farmers Master. Give each level a different name.

Locations

Locations Master holds every location of your hierarchy, down to the clubs. Farmers belong to a club, and users are assigned to locations.

BIOMETRIC NO	HIERARCHY TREE	TOBACCO TYPE	WAREHOUSE	HIERARCHY LEVEL	STATUS	ACTIONS
-	Location A	-	-	Level 1 (L1)	Active	 
-	↳ Location A1	-	-	Level 2 (L2)	Active	 
-	↳ Location A1.1	-	-	Level 3 (L3)	Active	 
BN-1005	↳ Club 01	Product 1	Warehouse 2	Level 4 (L4)	Active NOT ASSIGNED No Chairperson and Secretary	 
BN-1006	↳ Club 02	Product 1	Warehouse 2	Level 4 (L4)	Active NOT ASSIGNED No Chairperson and Secretary	 
BN-1013	↳ Club 06	Product 1	Warehouse 2	Level 4 (L4)	Active NOT ASSIGNED No Chairperson and Secretary	 

Locations Master. The tree shows each location under its parent.

- **Search Locations** finds a location by its name or by any value shown in the list. **Filter by Level** shows one level. **Filter by Warehouse** shows the clubs of one warehouse, or **No warehouse**: the lowest locations that have no warehouse set; each choice shows how many there are. **Rows Per Page** sets how many show at once. **Clear** resets the filters.
- **Choosing columns.** Click **Columns**, or click or right-click any column heading. Tick the details you want to see, for example a unique club number, the **Tobacco Type** or the **Warehouse**, and drag them into the order you want. **Show all** ticks every column. A heading can also be dragged left or right. Your choice is saved for your user.
- A red note above the list counts the clubs with no Chairperson or no Secretary; their **Status** shows **NOT ASSIGNED** (Chapter 3). Click the note to see them on the Chairperson & Secretary screen.
- The pencil in **Actions** opens the location.

Page 15 of 90

To add or change a location

Editing a club, with its warehouse. The labels use the name of the club's level.

- 1 Click **Add Location**, or the pencil next to a location. The labels in the pop-up use the name of the location's level.
- 2 Fill in the name. Choose the parent (leave it empty for a top-level location) and the **Hierarchy Level**.
- 3 The radius (in meters) is the size of the circle around the location's pin (500 by default). Drag the pin on the map to the right place.
- 4 For a club, choose its **Tobacco Type** (the product the club grows).
- 5 **Warehouse (clubs only, when editing)**. Choose the one warehouse that serves this club; the phones then offer only that warehouse for the club's farmers. The list shows the warehouses linked to the club or to a level above it, nearest first. -- **None (the nearest level above)** -- uses the warehouses of the nearest level above the club.
- 6 Fill in the location fields for this level, if your company uses them, and click the save button.

The circle must fit inside its parent

A location's circle must lie inside the circle of its parent. If it reaches outside, the location cannot be saved. Move the pin or make the radius smaller.

Locations in Excel

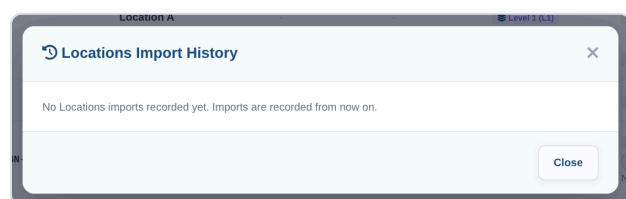

- **Download Template** gives an empty file with one column per level, then **Tobacco Type**, **Warehouse** and your location fields, and an Instructions sheet. Fill one row per club, from the top level down.
- **Export Locations** gives every location with the same columns, filled in, plus reference columns (Location ID, Status, Latitude, Longitude, Radius) that the import does not read. Edit the export and import it again to change many locations at once. The export always uses the template layout, whatever columns you show on screen.
- **Warehouse column.** Type the name of the warehouse that serves the club on that row. It must be linked to the club or a level above it. Capitals and extra spaces do not matter.

Import Locations reads the file and asks how to use it:

Mode	What it does
Add & update	Adds new locations and fills in values. Never renames, moves or clears anything. A blank cell changes nothing. A club whose unique value already belongs to another club is reported as a possible duplicate, not created.
Overwrite - replace with this file	Your locations become exactly this file. Every location not in the file is removed, or deactivated if farmers, contracts, warehouses or users are still on it. Blank cells clear values. If any row fails, nothing is removed. The system asks you to confirm.
Move under new parents	For regrouping. A location that already exists somewhere else is moved under the parent named in the file, with everything under it. Old parents left empty afterwards are removed, unless someone is still assigned to them. The system asks you to confirm.

After the import, **Import Results** shows what happened: new locations, locations that already existed, field values, tobacco types and warehouses set, and anything renamed, moved or removed. Problem rows are listed underneath.

Undo this import reverses it.

Locations Import History.

Import History lists past imports with who ran them and what they changed. **Only the most recent import can be undone.** To go further back, undo them one at a time, newest first.

Manager assignments

Farmers Hierarchy › **Manager Assignments** links users to locations. A user assigned to a location receives the approvals of that location, and sees the farmers, contracts and warehouses of that location and of every location below it.

HIERARCHY LEVELS

MANAGER ASSIGNMENTS

Manager Assignments

SEARCH MANAGER

Download Blank Template

Bulk Upload Assignments

Data Tools on Manager Assignments.

- 1 Open **Data Tools** and click **Download Blank Template**. It has a **Username** column, one column per level and your unique location field. Every cell has a drop-down list.
- 2 Fill one row per user and location. Repeat the username for more locations. Fill in the level the user sits at; higher levels are optional but are checked when filled.
- 3 Open **Data Tools**, click **Bulk Upload Assignments** and choose the file.
- 4 Check the preview. Each row is **OK**, **SKIPPED** (with the reason) or **FLAGGED** (the name matches more than one location and no unique value was given). Users are found by username, then email, then first and last name.
- 5 Click **Apply Assignments**, or **Discard**. Nothing a user already holds is removed.

- 6 The result shows the new assignments. **Roll back now** puts every user back as before; **Keep the import** closes it. Rows that were not applied stay listed in a red bar, which you can print as a PDF.

Settings

Settings has a menu on the left in four groups. Click a group heading to fold or unfold it; the group of the section you are on always stays open. Each section has an **(i)** with more help.

Group	Sections
General	General, Seasons
Contracts	Contract Rules, Contract Approval Workflow, Tobacco Types & Recipes
Custom Fields	Profile Fields & Documents, Contract Fields, Chairperson & Secretary Fields, Location Fields
Connections	API Integrations

Saved at once, or with the Save button

Some settings are saved as soon as you change them; the section says so (*Saved as soon as you change it*). The others are saved with the section's **Save** button. Settings that the phones use reach them at their next Sync.

Reports: sign-off columns

When the Approved Distributions report is exported, add blank "Received by", "Signature" and "Date received" columns, so the warehouse can print it and have each farmer sign. For everyone.

☐ Add the sign-off columns to the export

Contracts rollout target

Contracts > Progress shows this target: the line to follow, whether the rollout is on track, and when it will finish at the current pace. For example 100% of farmers approved by 30 November. Leave empty for no target.

FARMERS APPROVED (%) BY (DATE)

80 30/11/2026 **Save Target** Clear

General: the currency, report sign-off columns and the contracts rollout target.

- **Currency.** Choose the currency used to show prices and money, and click **Save Currency**. Only the symbol changes; no exchange rate is applied.
- **Reports: sign-off columns.** Tick **Add the sign-off columns to the export** to add blank **Received by**, **Signature** and **Date received** columns to the Approved Distributions export (Chapter 7), so the warehouse can print it and have each farmer sign. It is saved at once, for everyone.

- **Contracts rollout target.** Type the percentage of farmers that should be approved (**Farmers approved (%)**, 1 to 100) and the date (**By (date)**), and click **Save Target**. **Contracts > Progress** then shows whether the rollout is on track (Chapter 7). **Clear** removes the target. There is one target for the whole company.

Seasons

The growing years, used to filter the Distribution report by season.

Use the active season's dates for all contracts

When on, every new contract - on the web and on the phones - runs from the active season's start date to its end date, and the date boxes are hidden. Running contracts are given the season's end date. With no active season, no contract can be added.

History

Off - contract dates are chosen for each contract, as before.

Add Season

Only one season can be active. To add the next season, deactivate 2026/27 Season first - it is kept for the record.

SEASON NAME	DATE RANGE	STATUS	ACTIONS
2026/27 Season	2026-08-01 to 2027-07-31	Active	

Seasons: the switch for season dates, History, and the season list.

A season is the growing year. **Only one season can be active at a time.**

- **To add a season**, click **Add Season**, type the **Season Name**, **Start Date** and **End Date**, and click **Save Season**. While a season is active, **Add Season** is faded: deactivate the active season first (the red button on its row). A deactivated season is kept for the record.
- **Use the active season's dates for all contracts.** When this switch is on, every new contract, on the web and on the phones, runs from the active season's start date to its end date, and the date boxes are hidden. Running contracts are given the season's end date. With no active season, no contract can be added. The system lists what will change and asks you to confirm before switching it on. Switching it off does not change the dates of existing contracts.
- While the switch is on, changing the active season's end date, or activating another season, gives every running contract the new end date, after you confirm.
- **History** lists every change to seasons and to the switch: when, which season, what changed, how many contracts were updated, and by whom.

Contract Rules

What the field app is allowed to do when issuing inputs and capturing contracts.

☐ Can Distribute without contract
☐ Can distribute with contract awaiting approval
☐ Can distribute if contract expired
☐ Can have multiple contracts
☒ Farmers are opened for inputs by face scan only

Partial distribution

Can a farmer be given part of a category now and the rest later (e.g. the warehouse does not have enough)? What is not given stays owed - the phone shows it, and the category locks only once nothing is owed. More than is still owed is refused. Saved as soon as you change it.

Off - every category is issued in full (as before)

Inputs summary on the phone

On the phone's club screen (Club Enrollment), before the farmers sign: what the club gets in the running cycles - per cycle and item, and per farmer. Saved as soon as you change it.

☒ Show the inputs summary on the club screen
☐ Show the value (farmer price, in the currency chosen in Settings)

High-Value Contract Threshold (Size/Hectares)

Contracts of this size (hectares) or bigger are marked HIGH VALUE and always go through the approval workflow, even when an administrator captures them. There is no separate approval route. Club contracts have no size, so they are never marked. 0 = off.

e.g. 100

Club contracts: month written in

For the "Club - Signing Month" box (and "Club - Signing Day") on club contracts: the day the field technician witnessed. Phones use it after their next Sync.

English (September)

Witness Rules

☐ Single-farmer clubs: a witness signs with their own name and surname

On: for a club with one farmer, the phone asks for the witness's **name**, **surname** and **signature** instead of the field technician's signature. It is required before the club can be finished. On the contract it fills the **Club Witness** boxes (Contract Templates > mapper). Clubs with more farmers, and clubs already witnessed, are not affected. Phones use it after their next Sync.

Save Rules

Contract Rules.

These rules apply to everyone who uses the field app.

Rule	What it does
Can Distribute without contract	The field app can issue inputs to a farmer who has no contract at all.
Can distribute with contract awaiting approval	Inputs can be issued as soon as a contract is captured, before it finishes the approval workflow.
Can distribute if contract expired	A farmer whose contract end date has passed can still receive inputs.
Can have multiple contracts	One farmer can hold more than one active contract.
Farmers are opened for inputs by face scan only	Ticked by default. The field app opens a farmer for inputs only by scanning his face. A farmer with no face enrolled must be enrolled on his profile first.
Partial distribution	Whether a farmer can be given part of a category now and the rest later: Off - every category is issued in full (as before) , Only when the warehouse is short , or Any time, with a reason . What is not given stays owed; the phone shows it, and more than is still owed is refused. Saved at once.
Inputs summary on the phone	On the phone's club screen, before the farmers sign: what the club gets in the running cycles, per cycle, item and farmer. A second tick adds the value (farmer price). Saved at once.

Rule	What it does
High-Value Contract Threshold (Size/Hectares)	Contracts of this size or bigger are marked HIGH VALUE and always go through the approval workflow. 0 switches it off. Club contracts have no size, so they are never marked.
Club contracts: month written in	The language of the signing month printed on club contracts: English (September) or Chichewa (Seputembala) .
Witness Rules	Single-farmer clubs: a witness signs with their own name and surname. When ticked, the phone asks a club with one farmer for the witness's name, surname and signature, instead of the field technician's.

Click **Save Rules** for the ticks, the threshold, the month and the witness rule.

Tobacco Types & Recipes, with the recipe of Product 1 open.

Page 22 of 90

A tobacco type (also called a product on some screens) is what the farmer grows. Each one has a **recipe**: the default list of inputs for it. The recipe is copied into a distribution cycle, where it can be adjusted for that cycle (Chapter 6).

- To add a tobacco type, type the **Tobacco Type Code** and **Tobacco Type Name** (and a description if you like) and click **Save**. Its recipe opens straight away.
- The list icon opens a recipe; the pencil edits the tobacco type; the last button deactivates it. A deactivated tobacco type is no longer offered for new contracts or cycles; existing contracts keep it.
- In the recipe, find the stock item, choose the **Math Rule** and the quantity, and click **+**. The rules are **Fixed Amount**, **Multiply by Contract Size** and **By category (per hectare)**, which takes a quantity per hectare for Cat 1 to Cat 4. Each category gives its quantity × the farmer's hectares in that same category; a category left empty gives nothing. Adding an item that is already in the recipe updates its rule.

Many tobacco types at once

Tobacco types and their recipes can also be set up from one Excel file on [Distribution Master › Stock Items & Product Types](#) (Chapter 6).

Values saved under old field names

These farmers' values are saved under a field name that no longer exists, usually because the field was renamed before renamed fields kept their values. Choose the field each one belongs to and click Move. A value a farmer already has in that field is never overwritten.

OLD NAME	FARMERS WITH A VALUE	EXAMPLES	BELONGS TO
Farmer Code	10	9711714, 9703082, 9707354	Choose a field... → Move

Profile Fields & Documents.

Extra fields or document uploads kept on every farmer profile. Type the **Attribute Name**, choose the **Data Type** (text, number, date, yes/no or document upload), tick **Mandatory** to mark it as required (*), and click **Add**. A mandatory document must be uploaded before a profile can be saved. Fields marked **BUILT-IN** are used by the system (the Cat 1–4 hectares and volumes and their totals, and the Chairperson and Secretary ticks) and cannot be renamed or deactivated. A field's data type cannot be changed after it is created. Deactivated fields keep the values already captured.

- **Renaming a field keeps its values.** Click the pencil and type the new name. Every farmer keeps his value under the new name: **Renamed. N farmer(s) keep their value under the new name.** Two fields cannot have the same name. A value that arrives later under the old name (from a phone that was offline, or from an import with the old column heading) is moved to the new name by itself.

Values saved under old field names

These farmers' values are saved under a field name that no longer exists, usually because the field was renamed before renamed fields kept their values. Choose the field each one belongs to and click Move. A value a farmer already has in that field is never overwritten.

Farmer Profile Overview & phone app - fields under the name

Choose up to 3 fields to show under the farmer's name on the Farmer Profile Overview and everywhere the phone app showed "Ref:" (farmer lists, the farmer screen, verify, distribution, club signing), as **LABEL: value**. A field the farmer has no value for is not shown. The same for everyone. Phones use it after their next Sync.

FIELD 1

FIELD 2

FIELD 3

Contract No.

ID / Passport

(none)

Under the fields: values saved under old field names, and the fields shown under the farmer's name.

- **Values saved under old field names.** This box appears only when farmers have values saved under a name that is not a field any more, for example a field renamed before renamed fields kept their values. For each old name it shows how many farmers have a value and some examples. Choose the field the values belong to under **Belongs to**, click **Move** and confirm. A value a farmer already has in that field is never overwritten; those farmers stay listed.
- **Farmer Profile Overview & phone app - fields under the name.** Choose up to three fields (**FIELD 1** to **FIELD 3**) to show under each farmer's name on the Farmer Profile Overview and on the phone's farmer screens, as **LABEL: value**. You can choose built-in fields (Contract No., ID / Passport, Cell Phone, Alternative Phone, Known As, Address) or your profile fields. A field the farmer has no value for is not shown. Each choice is saved at once, for everyone; the phones use it after their next Sync. Until something is chosen, the profile shows the contract number.

Chairperson & Secretary Fields

Extra details kept on every chairperson's and secretary's profile (farmers and people who are not farmers). They show on the add / edit pop-up, the import template and the export.

☒ **Farmers can be Chairperson / Secretary**

On: tick Chairperson / Secretary on the farmer's profile (or with the farmer import) and he shows on the Chairperson & Secretary screen. Off: farmers are never Chairperson or Secretary - only people added on the Chairperson & Secretary screen count, and the two farmer tick boxes are switched off (what was ticked is kept, so switching it on again brings it back).

☒ **Club membership card**

On: the phone offers to take a picture of the club membership card of every Chairperson and Secretary - when they are enrolled, and at Contract Final Approval before they sign. It is optional (they can skip it) and kept on their profile here. Off: it is not asked.

☐ **Block club contract signing when the club has no Chairperson or Secretary**

On: on the phone, the farmers of a club with no Chairperson or no Secretary recorded cannot sign the club contract (nor the witness) until both are added on the Chairperson & Secretary screen and the phone syncs. Off: those clubs can sign as before. Either way they are listed in Reports > Clubs Not Assigned. Single farmer contracts (Assign Contract) are not affected.

FIELD	TYPE	MANDATORY	ACTIONS
Phone	TEXT	No	Make mandatory

NEW FIELD

e.g. Phone, Village, Year elected

Text
Mandatory

+ Add Field

Chairperson & Secretary Fields.

- Extra details kept on every club Chairperson and Secretary, for example a phone number. Type the name under **New field**, choose the **Type**, tick **Mandatory** if needed and click **Add Field**. Existing fields can be renamed, made optional or mandatory, and deactivated.
- **Farmers can be Chairperson / Secretary. On:** ticking Chairperson or Secretary on a farmer's profile (or in the farmer import) puts him on the Chairperson & Secretary screen. **Off:** only people added on the Chairperson & Secretary screen count, and the two ticks on the farmer profile are switched off. What was ticked is kept, so switching it on again brings it back.
- **Club membership card** (on by default). The phone offers to take a picture of each Chairperson's and Secretary's club membership card when they are enrolled, and at Contract Final Approval before they sign. It is optional: they can skip it. The picture is kept on their profile (Chapter 3).
- **Block club contract signing when the club has no Chairperson or Secretary** (off by default). When on, the farmers of a club with no Chairperson or no Secretary recorded cannot sign the club contract on the phone until both are added and the phone syncs. Contracts assigned to a single farmer are not affected. The system asks you to confirm before switching it on.

Contract Fields

Extra fields captured on each contract when it is assigned, for example a target yield. Add them the same way as profile fields; a mandatory field is marked * on the Assign Contract form. The phones pick up a change on their next sync.

Contract Approval Workflow

The people who approve contracts, and the signature saved for each of them.

2 approvers - 1 not signed yet

APPROVER	SIGNATURE	SAVED	ACTIONS
ADMIN USER YOU User ID 1		26 Sept 2026, 14:00 Drawn	Replace Delete
SAMPLE USER THREE User ID 12	NOT SIGNED YET	-	Add signature Delete

Signatures are only saved for now - they are not yet printed on contracts. An approver who opens this screen can sign for themselves.

Contract Approval Workflow: approvers and their saved signatures.

The people who approve contracts, and one saved signature for each of them.

- 1 Click **Add Approver** and choose the **User**.
- 2 Under **Signature** choose **Draw** (sign with the mouse, a finger or a pen), **Import image** (a PNG or JPG of the signature) or **Later**.
- 3 Click **Save**. **Replace** or **Add signature** changes a signature later. An approver who opens this screen can sign for themselves with **Sign now**.

Signatures are not printed yet

As the screen says, signatures are only saved for now; they are not yet printed on contracts. Removing an approver keeps their signature, so adding them again brings it back.

API Integrations

Connections that bring data in from other systems. **Add API Endpoint** opens the set-up: **Configuration Name**, **HTTP Method**, **Endpoint URL**, the **Auth Type** and its details, and the **Data Field Mapping**, which links each key in the other system's data to a farmer field. Set these up together with whoever runs the other system.

Approval workflow

Workflow decides how contracts, issues and returns move up the levels for approval, and who approves when someone is away. The chips at the top show the number of levels, the Final level, how many levels have timers and how many stand-ins are active now.

Approval timers and rules

Chairperson & Secretary (phone) - club contracts

Before a club contract reaches the office levels below, the club's Chairperson and Secretary/Treasurer approve it on the phone (Contract Final Approval tile). Saved as soon as you change it.

Approve automatically when the officers signed as farmers

Off - the Chairperson and Secretary approve in Contract Final Approval tile

When it applies, the phone uses their farmer signatures for the approval and sends the contract straight after the witness signs (and the biometric check) - it never waits in Contract Final Approval. The club membership card is asked for when they sign. Anyone else recorded as an officer: Contract Final Approval, as before.

☒ **Require a biometric check of every farmer before sending**

After the witness signs, each farmer's face is scanned against their enrolment to confirm it works (farmers confirmed by a face scan when they signed count as done). Failed: try again, enrol the face again, or skip with a reason - a skip is outside procedure and shown to the office (View club, audit log).

Save Rules

RULES FOR:

Contracts

Distribution (inputs & returns)

Each level approves the contract and passes it up until the Final level.

HIERARCHY LEVEL	AUTO-ESCALATE (DAYS)	AUTO-APPROVE (DAYS)	APPROVE ON ARRIVAL?	IS FINAL LEVEL?	APPROVE FROM MOBILE APP?	VALUE RULE?
L1 Level 1 ABOVE FINAL LEVEL - NOT USED	days	days	☐	☐	☐	☐
L2 Level 2 FINAL LEVEL	days	days	☒	☒	☐	☐
L3 Level 3	days	days	☐	☐	☐	☐
L4 Level 4 APPROVES ON THE MOBILE APP	days	days	☐	☐	☒	☐

Note: Set a timer to 0 to disable automatic actions for that level. Final Levels cannot escalate upwards.

Saved workflows

WORKFLOW	FINAL LEVEL	TIMERS	APPROVE ON ARRIVAL	VALUE RULES	LAST SAVED

Approval Timers (SLAs) for Contracts, with step 0 for club contracts above the levels. L2 is the Final level, so L1 above it is not used.

Choose **Contracts** or **Distribution (inputs & returns)** next to **Rules for**. Each has its own rules. Each row is one level:

Column	Meaning
Auto-Escalate (Days)	After this many days waiting at this level, the item is passed up to the next level. Empty or 0 means never. An item is never passed up from its Final level.
Auto-Approve (Days)	After this many days waiting at this level, the item is approved automatically. Empty or 0 means never.
Approve On Arrival?	The level approves automatically as soon as an item reaches it; nobody needs to act.
Is Final Level?	The last level that approves. Once approved here the item is fully approved and never goes further up. Every level above it is greyed out and not used, unless a value rule uses it.
Approve From Mobile App?	The managers of this level approve or reject on the phone. They can still do it on the web after confirming, for example when the phone is broken. It cannot be on together with Approve On Arrival.
Value Rule? (Contracts)	Makes this level the Final level for contracts whose club meets a number from Locations Master (below).

Ticking Approve On Arrival or Is Final Level clears and locks that level's timers. Click **Save Rules** when done. The **Saved workflows** table underneath shows what is saved for each workflow, its value rules, and when it was saved.

Distribution

Every issue and return starts at the farmer's club and is approved level by level up to the Final level, where the stock moves. A level only finishes an issue by itself when every item already has its warehouse.

Until the Distribution rules are saved, an issue or return is approved in one step. The Saved workflows table then says **Not saved yet - approved in one step, as before**.

Step 0: Chairperson & Secretary on the phone (club contracts)

With **Contracts** chosen, the card above the levels is step 0. Before a club contract reaches the levels, the club's Chairperson and Secretary / Treasurer approve it on the phone (the Contract Final Approval tile). Both settings on the card are saved at once and reach the phones at their next Sync:

- **Approve automatically when the officers signed as farmers. Off** (the default): the Chairperson and Secretary approve in Contract Final Approval. **One-farmer clubs only**: for a club whose one farmer is both Chairperson and Secretary, his farmer signature is used and the contract is sent on straight after the witness. **Every club where both the Chairperson and Secretary signed as farmers**: the same for every such club.
- **Require a biometric check of every farmer before sending** (on by default). After the witness signs, each farmer's face is scanned before the contract is sent; a farmer whose face was scanned when he signed counts as done. A farmer who cannot be scanned can be enrolled again, or skipped with a reason. A skip is marked as outside procedure and shown to the office in the club view (Chapter 4) and the Audit Log.

Value rules (contracts)

A value rule sends the contracts of some clubs to a different Final level, depending on a number kept on the club in Locations Master, for example the club's total hectares. Contracts of large clubs can then go one or more levels higher for approval, while the others finish at the normal Final level.

HIERARCHY LEVEL	AUTO-ESCALATE (DAYS)	AUTO-APPROVE (DAYS)	APPROVE ON ARRIVAL?	IS FINAL LEVEL?	APPROVE FROM MOBILE APP?	VALUE RULE?
L1 Level 1 FINAL LEVEL WHEN VALUE RULE IS MET	days	days	☐	☐	☐	☒ ≥ 10
2 FIELD FROM LOCATION MASTER Club Hectares - Level 4 level 3 RULE at least (≥) 3 THRESHOLD 10 4 Contracts for clubs where Club Hectares is 10 or more do not finish at Level 2. They go on to Level 1, which becomes their Final level. All other contracts finish at Level 2, as now. Read from Location Master for the contract's club. A club with no value does not meet the rule. If a club meets more than one rule, the highest of those levels is its Final level.						
L2 Level 2 FINAL LEVEL	days	days	☐	☒	☐	☐
L3 Level 3	days	days	☐	☐	☐	☐
L4 Level 4 APPROVES ON THE MOBILE APP	days	days	☐	☐	☒	☐

A value rule on L1: contracts of clubs of 10 ha or more go on to L1.

- 1** Switch on **Value Rule?** on the level that should become the Final level for those clubs. The tag next to the level name says **Final level when value rule is met**; levels in between say **Approves when a value rule above is met**.
 - 2** Choose the **Field from Location Master**: a number location field (Settings › Location Fields). When there is only one, it is chosen for you.
 - 3** Choose the **Rule** (at least, more than, at most, less than, exactly) and type the **Threshold**.
 - 4** Read the sentence: it says what will happen, for example which contracts go on past the normal Final level and which finish there as now. Then click **Save Rules**. A rule with no field or threshold cannot be saved.
- The value is read from the club of a club contract, or from the farmer's location (or the nearest level above it that has a value) for a farmer's own contract. It is read at each approval, so a corrected value counts from the next approval.
 - A club with no value does not meet the rule and follows the normal path. If a club meets more than one rule, the highest of those levels is its Final level.
 - A rule can also be put on a level below the normal Final level: contracts that meet it then stop there.
 - The normal Final level keeps its timers locked. Contracts that go on past it wait there until someone approves them, unless that level approves on arrival.

Add Stand-In Approver.

Between the start and end dates, items that would go to the original manager go to the stand-in instead. After the end date it switches back by itself. Click **Add Stand-In**, choose the **Original Manager (Away)**, the **Substitute (Stand-In)** and the dates, and click **Add Stand-In**. The list shows each rule as **Active Now**, **Scheduled** or **Expired**. The bin removes a rule, and routing goes back to the original manager at once. A manager cannot stand in for themselves.

CHAPTER 3

Farmers

Farmer records on **Farmers Master**: finding, adding, changing and deactivating farmers, the inputs each farmer gets in the running cycle, importing and exporting farmers in Excel, and the club office bearers on **Chairperson & Secretary**.

The farmer list

The screenshot shows the 'Farmers Master' interface. At the top, there's a search bar (1) and buttons for 'Filters' (2) and 'Columns' (3). On the right, there are 'Data Tools' (4) and 'Add Farmer' (5). Below the search bar, there are tabs for 'Active Farmers' and 'Deactivated Profiles' (6). The main table has columns: CONTRACT NO., FARMER NAME, LEVEL 3, LEVEL 4, BIOMETRIC NO., MANAGER, PHOTO, INPUTS: INPUT CYCLE 2026/27 (8), and ACTIONS (9). Each row represents a farmer record with details like contract number, name, location, club, biometric number, manager, and photo. The 'INPUTS' column shows the status of the running cycle (e.g., 'Gets - Cat 1', 'Does not get'). The 'ACTIONS' column contains icons for viewing the profile, editing, and deactivating the farmer.

CONTRACT NO.	FARMER NAME	LEVEL 3	LEVEL 4	BIOMETRIC NO.	MANAGER	PHOTO	INPUTS: INPUT CYCLE 2026/27	ACTIONS
F1783	SAMPLE FARMER 001	Location A1.1	Club 01	BN-1005	SAMPLE USER THREE	X	Gets - Cat 1 Not issued yet	View, Edit, Deactivate
F2001	SAMPLE FARMER 002	Location A1.1	Club 02	BN-1006	SAMPLE USER THREE	X	Does not get Contract waiting for approval	View, Edit, Deactivate
F2002	SAMPLE FARMER 003	Location A1.2	Club 03	BN-1007	SAMPLE USER THREE	X	Gets - Cat 1 Not issued yet	View, Edit, Deactivate
F2003	SAMPLE FARMER 004	Location A1.2	Club 04	BN-1008	SAMPLE USER THREE	X	Does not get No Cat 1-4 hectares	View, Edit, Deactivate
F2004	SAMPLE FARMER 005	Location A1.2	Club 04	BN-1008	SAMPLE USER THREE	X	Does not get No Cat 1-4 hectares	View, Edit, Deactivate
F2005	SAMPLE FARMER 006	-	-	-	No manager	X	Does not get No Cat 1-4 hectares	View, Edit, Deactivate

Farmers Master, with four columns hidden to make room.

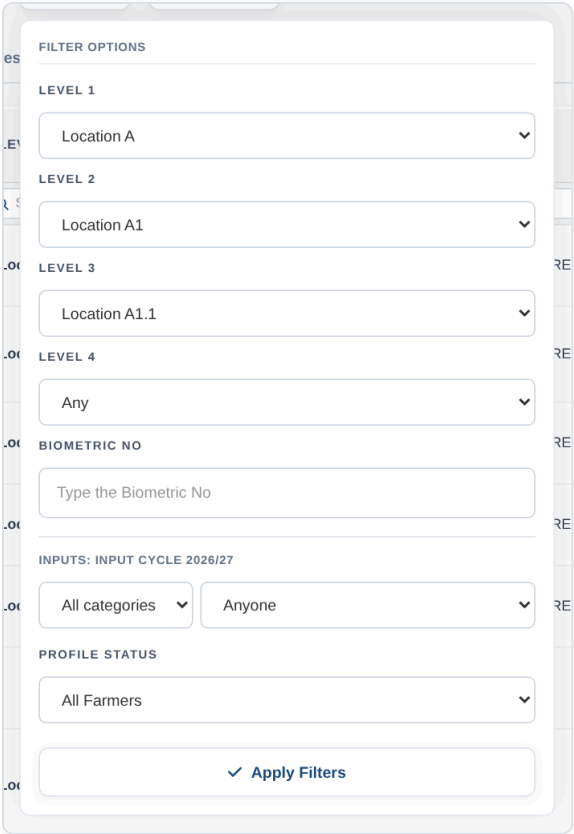

- 1 **Search farmers...** searches every value on the farmer record as you type, including the profile fields, the names of the locations above the farmer and the club's unique location value.
- 2 **Filters:** one filter per level, the club's unique value, the inputs of the running cycle, and the profile status (below).
- 3 **Columns:** choose and order the columns (Chapter 1).
- 4 **Data Tools:** templates, exports, import and import history.
- 5 **Add Farmer** opens a new farmer profile.
- 6 **Active Farmers** and **Deactivated Profiles** switch between the two lists.
- 7 The search boxes under the headings search one column each (Chapter 1).
- 8 **Inputs:** *cycle name*: what the farmer gets in the running cycle (Inputs for the running cycle, below).
- 9 The actions of each farmer: view the profile (eye), edit (pencil) and deactivate (red).

Columns you can show. The standard columns (contract number, farmer name, ID or passport, cell phone, the farmer's club, manager and photo); one column per level above the club, with the name of the location at that level; your location fields (taken from the club or the level the field belongs to) and your profile fields; **Biometrics**, **Location Set**, **Contract**,

Contract Status, Contract Size, Known As, Alternative Phone and **Address**; and one **Inputs** column per running cycle. **Farmer Name** and **Actions** are always shown.

Manager shows the managers of the highest level above the farmer that has someone assigned. **No Managers Assigned** means nobody is assigned anywhere above the farmer; **No manager** means the farmer has no location. The list shows 50 farmers per page. A red warning next to a name means the farmer's pin is outside his club's radius; an orange **POSSIBLE DUPLICATE OF** badge means the system found a very similar farmer.

Filters

The screenshot shows the 'FILTER OPTIONS' panel. It contains several sections: 'LEVEL 1' with a dropdown set to 'Location A'; 'LEVEL 2' with a dropdown set to 'Location A1'; 'LEVEL 3' with a dropdown set to 'Location A1.1'; 'LEVEL 4' with a dropdown set to 'Any'; 'BIOMETRIC NO' with a text input field containing 'Type the Biometric No'; 'INPUTS: INPUT CYCLE 2026/27' with two dropdowns set to 'All categories' and 'Anyone'; 'PROFILE STATUS' with a dropdown set to 'All Farmers'; and a large 'Apply Filters' button at the bottom.

- **One drop-down per level**, named after the level. Choosing a location shows the farmers of that location **and of every location below it**. Choosing a location at a low level fills in the levels above it; each list only offers the locations under the level above. Setting a level back to **Any** also clears the levels below it. A long list has a box to type part of the name.
- **The unique location value** (when your company has a unique location field, for example a club number): type part of it to find the farmers of that club.
- **Inputs** of each running cycle: see Inputs for the running cycle, below. These apply as soon as you choose.
- **Profile Status** shows, for example, farmers with a missing photo or missing biometrics, fully enrolled farmers, or flagged duplicates.

Click **Apply Filters**. The filters in use show as tags next to the buttons; the **X** on a tag removes it (and, for a level, the levels below it).

Filter options: L3 chosen, so L1 and L2 were filled in by themselves.

The screenshot shows the 'Farmers Master' interface. At the top, there's a 'SEARCH ANY FIELD' section with a search bar and a 'Filters' button. Below this, there's a 'Columns' section with three tags: 'Level 1 : Location A', 'Level 2 : Location A1', and 'Level 3 : Location A1.1'. Each tag has an 'X' to remove it. A red circle with the number '1' is next to the third tag. To the right of the columns, there are 'Data Tools' and 'Add Farmer' buttons. At the bottom, there are tabs for 'Active Farmers' and 'Deactivated Profiles'.

The filter tags after Apply Filters.

Inputs for the running cycle

For each distribution cycle that is running today, Farmers Master has a column **Inputs: cycle name**. It shows whether the farmer gets inputs in that cycle, worked out the same way as on the phone, and what has been issued:

Cell	Meaning
Gets · Cat 1, 2	He gets inputs in these categories. The line underneath says what is issued so far, for example <i>Not issued yet, Cat 1 issued 28 Sep · Cat 2 to issue</i> , or what is still owed after a partial issue.
Issued · Cat 1, 2	Everything he gets in this cycle has been issued.
Does not get	He gets nothing in this cycle. The reason is underneath, for example <i>No contract, Contract waiting for approval, No Cat 1-4 lines for his tobacco type in this cycle, No Cat 1-4 hectares, or No Cat 1 hectares (the cycle gives Cat 1 only)</i> .

A category gives inputs only when the cycle has a quantity in that category for the farmer's tobacco type **and** the farmer has hectares in that category (Chapter 6). The tobacco type comes from his contract (his own or his club's), otherwise from his club in Locations Master. Only the cycle's lines **By category** count here.

SAMPLE FARMER 001

Input Cycle 2026/27 · 2026-09-01 to 2027-04-14

Gets · Cat 1

Not issued yet

Club contract · Club 01 · Product 1 (No. 1) · ends 2026-10-28
Hectares: Cat 1: 2 · Cat 2: 0 · Cat 3: 0 · Cat 4: 0

WHAT HE GETS (CYCLE QUANTITY × HIS HECTARES IN THAT CATEGORY)

CATEGORY	ITEM	WORKING	QUANTITY	GIVEN	STILL OWED	ISSUED
Cat 1	Fertiliser A	50 × 2 ha	100 KG	0	100	Not yet
	Fertiliser B	2 × 2 ha	4 KG	0	4	

ISSUED TO HIM IN THIS CYCLE

Nothing issued to him in this cycle yet.

Click a cell to see the details: his contract and hectares, then **What he gets**: per category and item, the working (cycle quantity × his hectares in that category), the quantity, what was given, what is still owed and when it was issued. Underneath, **Issued to him in this cycle** lists every issue with its date, items, warehouse, who captured it and its approval status.

Clicking the cell: what he gets and what was issued.

Filtering on inputs

In **Filters**, each running cycle has two drop-downs. The first chooses **All categories** or one category (**Cat 1 to Cat 4**). The second chooses what to find:

- **Gets inputs (any)**, or only those with nothing issued yet, partly issued, or fully issued;
- **Does not get (any)**, or one reason: no contract, contract waiting for approval, contract expired, no lines for his tobacco type, no hectares in the cycle's categories, no Cat 1-4 hectares.

With one category chosen, the choices are for that category only, for example **Does not get Cat 1 (any)** or — **No Cat 1 hectares**. Each reason is checked on its own: **No Cat 1 hectares** also finds farmers without Cat 1 hectares who have no contract. These filters apply at once and show as amber tags. They also decide what the exports contain.

Adding and changing a farmer

Click **Add Farmer**. The form has two tabs.

Add New Farmer

Buttons: Cancel, Save Farmer

Add New Farmer: the Personal & Contact tab.

- 1 Personal & Contact.** Fill in at least **First Name**, **Surname** and **Cell Phone** (marked *). The other details are optional: middle name, known as, ID number, passport number, contract number, opening balance, alternative phone, additional contact details and physical address.
- 2** Choose the farmer's club in the assigned location box (its label shows the name of your club level). The full chain of levels shows under it, so you can check it is the right one.
- 3 Location & Docs.** Drag the pin to the farmer's home or field. Upload the ID or passport document, and fill in the profile fields your company uses (below).
- 4** Click **Save Farmer**.

Farmer Profile Overview.

The eye in the list opens the **Farmer Profile Overview**, everything about one farmer on one screen:

- **Under the name:** up to three fields chosen in **Settings > Profile Fields & Documents** (Chapter 2), for example the contract number and ID number. A field the farmer has no value for is left out.
- **Enrolment signature:** when the farmer's photo and face were enrolled on the phone, he signed to confirm he is the person in the photo and agrees to his photo and face being stored. The box shows his signature (click it to see it large), the statement, when he signed and who enrolled him. It is captured on the phone only.
- **Basic Information** and whether a location is set (**View Map**).

- **Reporting Structure:** each level above the farmer with its managers. A stand-in shows as the manager crossed out and the stand-in next to him.
- **Linked Warehouses:** the warehouse set on his club in Locations Master (**Set on club**); when the club has none, the warehouses of the nearest level above that it can use.
- **Assigned Contracts:** his own contracts and the club contracts of his club, newest first. A club contract is marked **Club contract** with the club name, and says whether this farmer has signed it. Each contract has its status and dates, and the buttons **Transactions** (every item issued under that contract, with costs, and **Print Transactions**) and **View Contract**. Own contracts also have **Expire Early**.
- **Inputs Distribution Allocations:** for each running cycle, a card **Inputs by category** (below), then the allocation per contract: what the farmer should get (**Target Qty**), what he has **Received** and the **Balance**, with a status such as **ACTIVE**, **ENDS THIS WEEK**, **OVERDUE** or **FULLY RECEIVED**.
- **Historical Distribution Logs:** every issue and return. **View Evidence** shows the photos, the signatures (including the **Field Technician Signature**) and the location captured on the phone, with **Print Evidence**.

Input Cycle 2026/27 INPUTS BY CATEGORY		
2026-09-01 to 2027-04-14 · Club contract · Club 01 · Product 1 (No. 1)		
Cat 1: 2 ha · Cat 2: - · Cat 3: - · Cat 4: - · Total: 2 ha		
ITEM	WORKED OUT	QUANTITY
Category 1 Not issued yet		
Fertiliser A	50 × 2 ha (Cat 1)	100 KG
Fertiliser B	2 × 2 ha (Cat 1)	4 KG

Inputs by category: what the phone gives this farmer in the cycle.

The **Inputs by category** card shows the cycle dates, the contract it goes by, the farmer's hectares per category and, per category, whether it is **Issued** (with the date and who), **Partly issued** or **Not issued yet**. Each line shows how the quantity is worked out, for example 50 × 2 ha (Cat 1). When inputs cannot be issued, the reason shows in red.

Deactivating and reactivating

Deactivate Profile.

Farmers are never deleted. To take a farmer out of use, click the red button in the list, type the **Reason for Status Change** and click **Deactivate**. The farmer moves to **Deactivated Profiles**, with the date and reason.

To bring a farmer back, open **Deactivated Profiles**, click **Reactivate**, type the reason and confirm.

Importing farmers from Excel

Use an import to add many farmers at once, or to update many existing farmers.

- 1 Open **Data Tools** and click **Download Blank Template**. It has the farmer columns, one column per level (with drop-down lists) and your profile fields, and an Instructions sheet.
- 2 Fill in one row per farmer. Put each farmer's club under the level columns.
- 3 Open **Data Tools**, click **Import Excel Data** and choose the file. Leave **File contains a header row** ticked when row 1 has the column names.

Import Farmers (Excel)

Click to import file

Choose File Farmer_Import_Sample.xlsx

☒ File contains a header row

STEP 2: MAP COLUMNS

Match the columns from your Excel file to the system fields. First Name is required (not for Update existing farmers only). Existing farmers are matched by Farmer ID, then Contract Number, then ID Number.

First Name	First Name *	Last Name	Last Name *
Contract Number	Contract Number (KEY)	ID Number	ID Number
Cell Phone	Cell Phone *	Level 1	Level 1 (Level 1)
Level 2	Level 2 (Level 2)	Level 3	Level 3 (Level 3)

☐ **Overwrite mode**
 Treat this file as the complete list. Anyone not in it moves to Deactivated Profiles, and anyone in it who is deactivated is switched back on. All history is kept.

Cancel / Abort

Commit Import

Step 2: Map Columns.

- Map Columns.** The system matches each column in your file to a system field; check the matches and change any that are wrong. Choose **-- Ignore Column --** for columns you do not want. **First Name** is required.
- Tick the options you need (below) and click **Preview Staging Area**.
- Staging & Verification.** Every row is checked and labelled: **NEW**, **UPDATE** (an existing farmer, found by Farmer ID, then contract number, then ID number) or **REJECTED** with the reason.
- Click the import button to save the valid rows, or **Cancel / Abort**.

Import Farmers (Excel)

DATA DIRECT WALUS.

STEP 3: STAGING & VERIFICATION

Review the data before committing. Updates are matched by Contract Number (or ID Number when a row has none). If errors occur during the save process, the entire batch will safely roll back.

STATUS / ACTION	VALIDATION NOTES	FIRSTNAME	LASTNAME	CONTRACTNUMBER	IDNUMBER	CELLPHONE	LEVEL 1	LEVEL 2
REJECTED	Contract No. contains invalid symbols/spaces	NEW	FARMER 104	F-91 04	ID900104	0700 900104	Location A	Location A1
NEW	Valid	NEW	FARMER 101	F9101	ID900101	0700 900101	Location A	Location A1

☐ **Overwrite mode**
 Treat this file as the complete list. Anyone not in it moves to Deactivated Profiles, and anyone in it who is deactivated is switched back on. All history is kept.

Cancel / Abort

Import Valid Rows Only

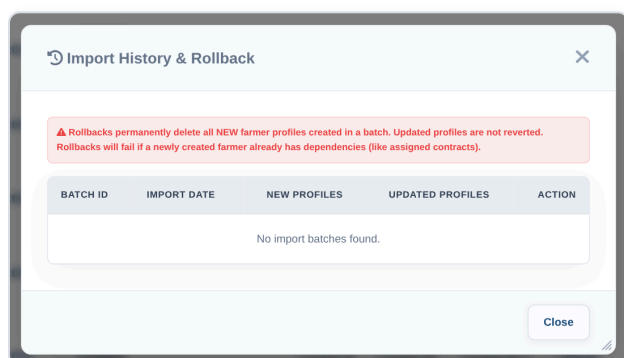

Step 3: a rejected row (the contract number has a space and a symbol) and a new farmer.

Option	What it does
Create missing locations from this file	A location in the file that is not in the hierarchy is created instead of stopping the import. You see the list first. The level above it must already exist.
Update existing farmers only	For a file from Export Farmer Data . Nobody is added, blank cells change nothing, and a different club moves the farmer. It needs a column that finds the farmers: Farmer ID, contract number or ID number.
Overwrite mode	Treats the file as the complete list. Anyone not in it moves to Deactivated Profiles, and anyone in it who is deactivated is switched back on. All history is kept. You must type the number of farmers who will be deactivated to confirm, and a snapshot of them is downloaded first.

An unknown location stops the whole import

If a row names a location that does not exist, nothing is imported and the import button reads **Area Not Found on ... Row(s) - Import Locked**. Fix the names in the file, or tick **Create missing locations from this file**.

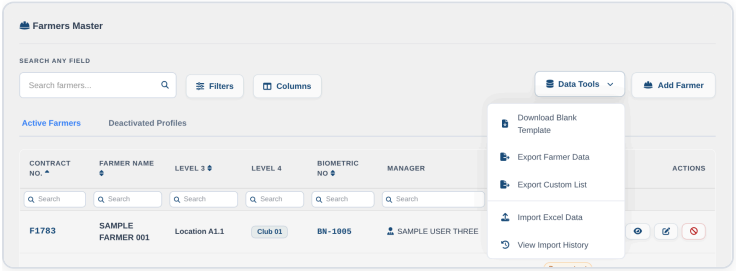

A column headed with the old name of a renamed profile field still imports into the renamed field. After the import, **Import Complete** shows the new, updated, deactivated and reactivated counts. Choose **Roll back now** to reverse it, or **Keep the import**.

Import History & Rollback.

View Import History lists past imports. A rollback permanently deletes the new farmers created by that import. It fails if a new farmer already has a contract.

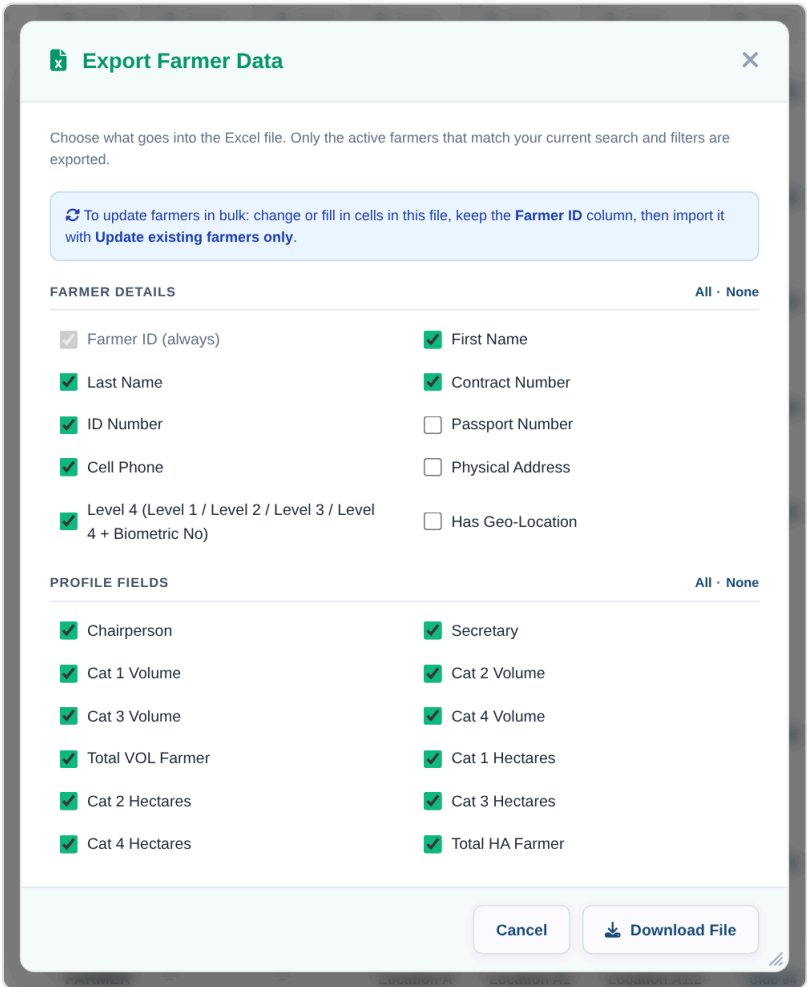

Exporting farmers

Data Tools on Farmers Master.

Data Tools has two exports:

- **Export Custom List** downloads the farmers of the open tab exactly as you see them: every farmer your search, filters and heading searches leave, on all pages, in your sort order, with the columns you show, in your order. It downloads straight away.
- **Export Farmer Data** lets you tick the farmer details and profile fields you want (**All** and **None** help); then click **Download File**. When a search or filter is in use, it exports the farmers they leave. The **Farmer ID** column is always included: keep it in the file to update the same farmers later with **Update existing farmers only**.

Export Farmer Data.

Chairperson & Secretary

Chairperson & Secretary lists the office bearers of each club. They sign club contracts on the phone. A farmer ticked **Chairperson** or **Secretary** on his profile (or in the farmer import) shows here by himself. People who are not farmers are added on this screen. One person can be both. Their photo and face are enrolled on the phone.

BN-1007	Club 03 Location A1.2	9	NOT ASSIGNED	NOT ASSIGNED	NOT ASSIGNED	Make Chairperson and Secretary
BN-1008	Club 04 Location A1.2	10	NOT ASSIGNED	NOT ASSIGNED	NOT ASSIGNED	Make Chairperson and Secretary

The Not assigned clubs tab.

The **Not assigned clubs** tab lists every club in your locations that has active farmers but no Chairperson and/or no Secretary. The red number on the tab is how many there are. For each club it shows the number of farmers, the Chairperson and Secretary (or **NOT ASSIGNED**) and a button to fill the gap: **Make Chairperson and Secretary**, **Make Chairperson** or **Make Secretary**, which opens the pop-up with the club and roles already filled in.

- **Clubs with one farmer.** In **Filters**, choose **Only clubs with one farmer**. The button **Make Chairperson and Secretary (N clubs)** makes the one farmer of each club listed its Chairperson and Secretary in one step, after you confirm. A role someone already holds is not changed. **Data Tools** › **History** lists these steps and can undo one. This needs **Farmers can be Chairperson / Secretary** to be on in Settings.
- When **Block club contract signing when the club has no Chairperson or Secretary** is on in Settings (Chapter 2), the farmers of these clubs cannot sign club contracts until both are added.

- The same clubs are flagged in Locations Master, and listed in the report **Clubs with no Chairperson** (Chapter 7).

Data Tools has **Download Import Template**, **Import Excel**, **Export Custom List** (the open tab as you see it), **Export All Fields** (the people on the list with every field) and **History**. In the template, farmers need only their contract number and Yes or No under Chairperson and Secretary; other people need their names and club. A club name used in two places needs its Club ID. The import shows a preview first; nothing is saved until you click **Import**.

CHAPTER 4

Contracts

The **Contracts** screen: following every contract through approval, assigning contracts on the web, changing and ending them, viewing club contracts, and keeping the contract templates. The **Progress** tab of this screen is explained in Chapter 7.

The contract list

Contracts are captured on the phone (farmer contracts and club contracts) or assigned on the web. **Contracts › Manage Contracts** lists them all.

The screenshot shows the 'Manage Contracts' interface. At the top, there are tabs: 'MANAGE CONTRACTS' (active), 'CONTRACT TEMPLATES', and 'PROGRESS'. Below the tabs is a section titled 'Contracts Received'. It includes a 'SEARCH FARMER' input field (1), a 'Filters' button (2), a 'Columns' button (3), and an 'Assign Contract' button (4). The main table has columns: FARMER, PRODUCT, SIZE, START, END, STATUS, NEXT STEP, APPROVALS, and ACTIONS. Each of the first seven columns has a search box (5). The 'NEXT STEP' column (6) shows 'Waiting for SAMPLE USER TWO' for the first row. The 'APPROVALS' column (7) shows 'None yet'. The 'ACTIONS' column (8) contains icons for edit, view, and delete. The table lists several contracts, including 'Club 07 (Club)' and 'SAMPLE FARMER' entries, all with a status of 'UNDER REVIEW'.

Manage Contracts.

- 1 **Search Farmer:** farmer name, contract number or template.
- 2 **Filters:** location, status, expiration and the user who approved it. A number on the button shows how many filters are in use.
- 3 **Columns:** choose and order the columns (Chapter 1).
- 4 **Assign Contract** assigns a contract on the web.
- 5 The search boxes under the headings search one column each.
- 6 **Next Step:** who the contract is waiting for, at which location and level, or **Fully approved**.

- 7 **Approvals:** how many levels have approved so far and who approved last. Click it to see every step with its time.
- 8 The actions for each contract (below).

The **Farmer** column shows the farmer and contract number; a club contract shows the club and its number of farmers. Click a heading to sort by it: dates sort as dates, sizes as numbers, and permanent contracts after every end date.

Farmer columns. In **Columns** you can add any Farmers Master column, for example the farmer's ID, phone, a level, a location field or a profile field. For a club contract, the levels and location fields come from the club; the other columns show the members' values (up to three different values, then *+N more*).

The status is one of:

Status	Meaning
UNDER REVIEW	Waiting in the approval workflow. Next Step says where.
APPROVED	Fully approved.
EXPIRED	The end date has passed, or it was expired early. Next Step shows the reason.
LEGACY	Not approved and not waiting at any level, for example a contract that was rejected in the Inbox.
HIGH VALUE	Shown next to the status when the contract size is at or above the threshold in Settings › Contract Rules .

The action buttons depend on the contract:

- **View club** (club contracts): the farmers, photos and signatures (see below).
- **Renew** (expired farmer contracts): opens Assign Contract with the farmer and template filled in, ready for the new dates and size.
- **Edit contract:** size, product and dates.
- **View PDF:** the contract document with the farmer's details filled in, with **Download** and **Open in new tab**.
- **Where it was signed:** when the phone recorded a location.
- **Expire early** (approved, not yet expired) and **Retire early**.

Assigning a contract on the web

Assign Contract to Farmer.

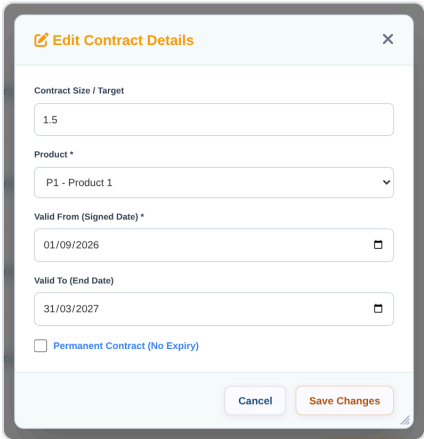

- 1 Click **Assign Contract**.
- 2 Choose the farmer under **1. Select Farmer** and the template under **2. Select Template**. A PDF template whose fields are not mapped yet is greyed out (see Contract templates below).
- 3 **Valid From (Signed Date)** is today. Choose **Valid To (End Date)**, or tick **Set as Permanent Contract (No Expiry)**.
- 4 Type the **Contract Size**, choose the **Product** (it decides which product items the contract receives in distribution cycles), and fill in the **Contract Variables** your company uses.
- 5 Optionally drag the pin to where the contract applies, and click **Assign Contract**.

When contracts use the season dates

When **Use the active season's dates for all contracts** is on (**Settings** › **Seasons**, Chapter 2), the date boxes are hidden and a green note says **Contract dates come from the season** with its dates. If there is no active season, a red note says so and the contract cannot be assigned until a season is added. Contracts captured on the phones get the season dates too. One contract's dates can still be changed with Edit contract.

A contract assigned by a user starts in the approval workflow like any other (Chapter 5). **A contract assigned by an administrator is approved straight away**; its approvals show **Auto-Approved (Admin Override)**. A high-value contract always goes through the approval workflow, whoever assigns it. If the farmer already has a current contract and **Can have multiple contracts** is not ticked in Settings, the system refuses and says why.

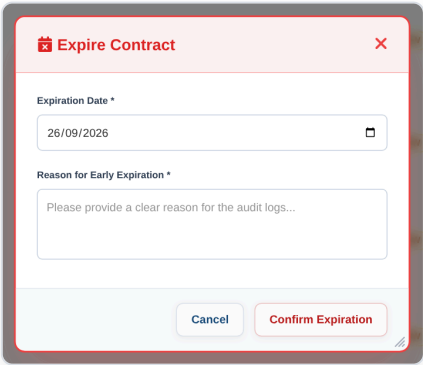

Changing and ending a contract

The 'Edit Contract Details' dialog box contains the following fields and controls:

- Contract Size / Target:** A text input field with the value '1.5'.
- Product *:** A dropdown menu showing 'P1 - Product 1'.
- Valid From (Signed Date) *:** A date picker field showing '01/09/2026'.
- Valid To (End Date):** A date picker field showing '31/03/2027'.
- Permanent Contract (No Expiry):** An unchecked checkbox.
- Buttons:** 'Cancel' and 'Save Changes'.

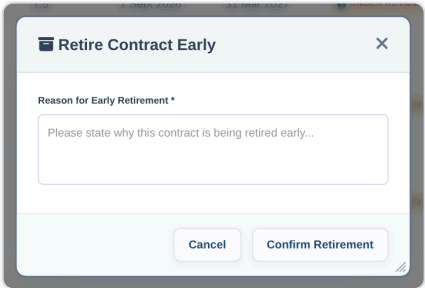

Edit Contract Details.

The 'Expire Contract' dialog box contains the following fields and controls:

- Expiration Date *:** A date picker field showing '26/09/2026'.
- Reason for Early Expiration *:** A text area with the placeholder text 'Please provide a clear reason for the audit logs...'.
- Buttons:** 'Cancel' and 'Confirm Expiration'.

Expire Contract.

The 'Retire Contract Early' dialog box contains the following fields and controls:

- Reason for Early Retirement *:** A text area with the placeholder text 'Please state why this contract is being retired early...'.
- Buttons:** 'Cancel' and 'Confirm Retirement'.

Retire Contract Early.

- **Edit.** Change the size, product, dates or permanent tick and click **Save Changes**. When you change the product, the system asks you to confirm: from then on the contract receives the new product's items; items already issued stay recorded under the old product.
- **Expire.** Choose the **Expiration Date** (today by default), type the reason and click **Confirm Expiration**. The contract stops being valid from the start of that day.
- **Retire.** Type the reason and click **Confirm Retirement**. The contract's end date becomes today.

A reason is always kept

The reason you type shows in the contract's **Next Step** column.

Club contracts

A club signs one contract together on the phone: each farmer signs, then the Chairperson and the Secretary / Treasurer, with the field technician as witness. On the web a club contract can be followed and viewed; it is created and renewed on the phone. How the Chairperson and Secretary approve, and whether every farmer's face is checked before the contract is sent, is set in step 0 on the Workflow screen (Chapter 2).

Club 01 Location A1.1 · 3 farmer(s) · Club Contract 2026/27 · approved

#	Photo	Farmer	Contract No.	ID Number	Signature	Signed	Confirmed
1		SAMPLE FARMER 001	F1783	-		10/09/2026, 10:12:00	Not recorded

The club view: each farmer with photo and signature, and the office bearers underneath.

Click **View club** on the contract. The view lists every farmer with photo, contract number, ID number, signature and time signed, and underneath the cards of the Chairperson, the Secretary / Treasurer and the witness. Click a photo or signature to enlarge it. A yellow note warns when signatures have no photo.

- **Confirmed** shows how each person was confirmed when signing: **Face scan**, **Face enrolled**, or, in red, **Card check - outside procedure** with the reason.
- **Biometric check** shows the face check before sending: **Face verified**, **Face scan at signing**, **Not checked**, or, in red, **Skipped - outside procedure** with the reason. Red notes at the top count the people confirmed by card and the farmers who skipped the check.
- When the Chairperson and Secretary were approved automatically from their farmer signatures, a green note at the top says so, with when and by whom.

Contract templates

Contract Templates.

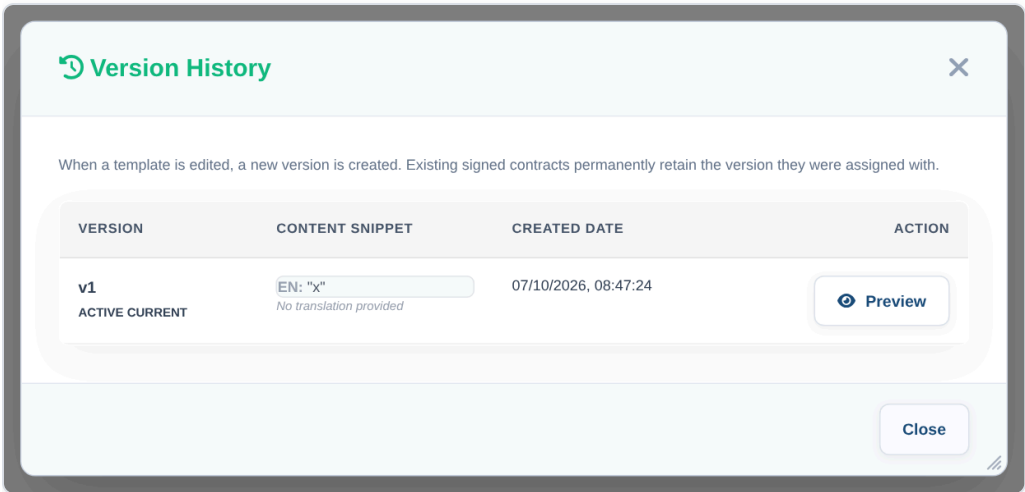

Contracts · Contract Templates holds the documents contracts are made from. Each template shows its version and type: **Text**, **PDF · N fields**, or **PDF · Not mapped**. Deactivated templates are on their own tab.

To add a template from a PDF

- 1 Click **Import Contract PDF** and choose the contract as a PDF file. It is kept exactly as it is.
- 2 The field mapper opens. On the page, drag a box where a value must be printed, choose the field under **Map this area to** and click **Assign**. Fields include the farmer's details and your contract fields; image fields such as photos and signatures are marked (image).
- 3 In **Mapped Fields**, set each field's size and alignment, and whether to hide the text underneath. **Show** finds it on the page, **Delete** removes it. Use **Prev** and **Next** for other pages.
- 4 Click **Save Field Map**. The template can now be used to assign contracts.

The actions on a template are **Version History**, **Edit** (for a PDF template it opens the field mapper) and **Deactivate** or **Reactivate**. A deactivated template is no longer offered when assigning contracts; existing contracts are not affected.

The default contract on the phones. On an active PDF template, the star (**Make this the default contract on the phones**) makes it the contract the phones choose first when a club signs. The template shows **Default on phones**. The field technician can still choose another one. There is one default for the company; it stays on the new versions of the template. Click the star again to clear it.

Version History.

Versions protect signed contracts

When a template in use is edited, or its field map is changed, the system saves a new version. Contracts already signed keep the version they were signed with. **Version History** lists every version with **View PDF** or **Preview**.

CHAPTER 5

Approvals

The **Inbox**: approving and rejecting contracts, issues and returns at your level, one by one or in bulk, and acting for the levels below you.

How approval works

Every contract, issue and return starts at the farmer's club and moves up one level at a time. At each level it waits in the Inbox of the users assigned to that location, until one of them approves it. It stops at the level ticked **Is Final Level?** on the Workflow screen, where it is fully approved. For an issue or a return, that is also when the stock moves. (Until the Distribution rules are saved on the Workflow screen, issues and returns are approved in one step.)

L1	Above the Final level: not used (unless a value rule sends a club's contracts there).	Not used
L2 • Final level	Fully approved here. For issues and returns, the stock moves.	Final
L3	Approves and sends it up.	Approves
L4 • club	Captured on the phone. Starts here.	Approves

Example only: your own rules are on the Workflow screen (Chapter 2). Levels can also approve on arrival, approve or escalate after a number of days, or approve on the mobile app, and a value rule can give some clubs' contracts a different Final level.

FARMER	CONTRACT TEMPLATE	ROUTING LOCATION	HIERARCHY LEVEL	ACTION
☐	Search	Search	Search	Search
SAMPLE FARMER 020 F5003 CONTRACT 12 Sept 2026, 04:15 (14 days ago)	Individual Contract	Location A1.1	Level 3 (L3)	☐ ☐ ☐
SAMPLE FARMER 021 F5004 CONTRACT 13 Sept 2026, 05:15 (13 days ago)	Individual Contract	Location A1.1	Level 3 (L3)	☐ ☐ ☐
SAMPLE FARMER 022 F5005 CONTRACT 14 Sept 2026, 06:15 (12 days ago)	Individual Contract	Location A1.1	Level 3 (L3)	☐ ☐ ☐
SAMPLE FARMER 023 F5006 CONTRACT 15 Sept 2026, 07:15 (11 days ago)	Individual Contract	Location A1.1	Level 3 (L3)	☐ ☐ ☐

The Inbox of a user assigned to Location A1.1 (L3).

- 1 **My Approvals:** items waiting at your own level.
- 2 **Subordinate Inboxes:** items waiting at levels below you.
- 3 **Filters:** show everything, only contracts, or only distribution (below).
- 4 **Resend approver mails** emails the approvers a reminder (below).
- 5 The box in the header ticks every row you can approve, on all pages.
- 6 The search boxes under the headings search one column each (Chapter 1).
- 7 The actions of each item.

Each row shows the farmer, the type of item (**Contract**, **Dist. Issue** or **Dist. Return**), when it came in and how long it has been waiting, the template (for a contract), the location it is routed to and its level. Flags such as **High-Value Exception** and **Overdraft Outlier** show under the name. The list shows 10 items per page. **Refresh Queue** reloads it.

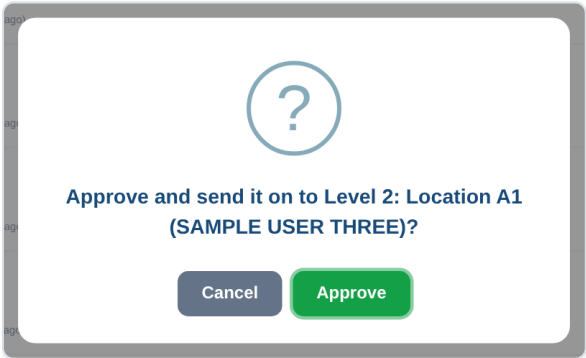

Button	What it does
Eye	Opens the contract document.
Green tick	Approves a contract at your level.
Resolve	Opens an issue or a return to choose its warehouse and approve it.
Red X	Rejects the item and sends it back.

Filters: what to show.

Filters › Show chooses **All (Contracts & Distribution)**, **Contracts** or **Distribution (Issues & Returns)**, with how many there are of each. Click **Apply Filters**. The choice shows as a tag and is remembered on this computer. It also limits the header tick box and the reminder emails.

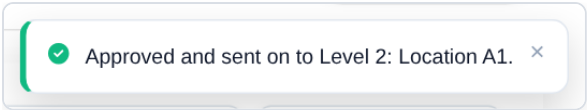

Approving

The question before approving.

Click the green tick. Before anything happens, the system tells you exactly what will happen, for example **Approve and send it on to Level 2: Location A1 (SAMPLE USER THREE)?** At the Final level it says instead that this is the final approval and the contract will be fully approved.

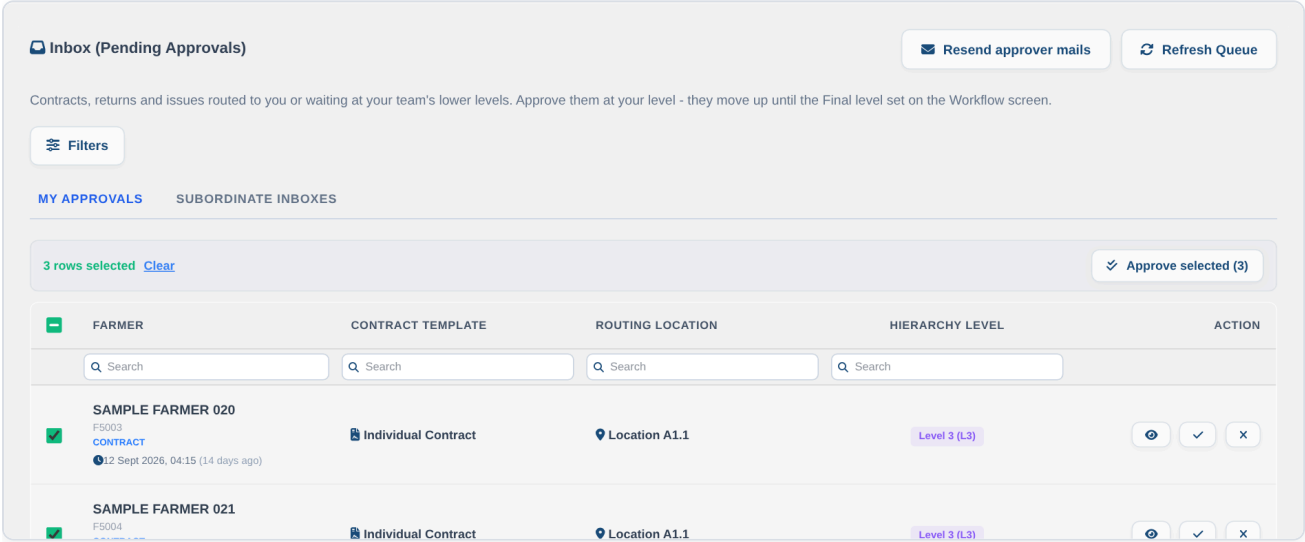

Click **Approve**, or **Cancel** to leave it.

The result.

The result shows at the top right, for example **Approved and sent on to Level 2: Location A1.** or **Fully approved - it will not go to anyone else.** The item leaves your Inbox and appears in the Inbox of the next level.

Approving several items at once

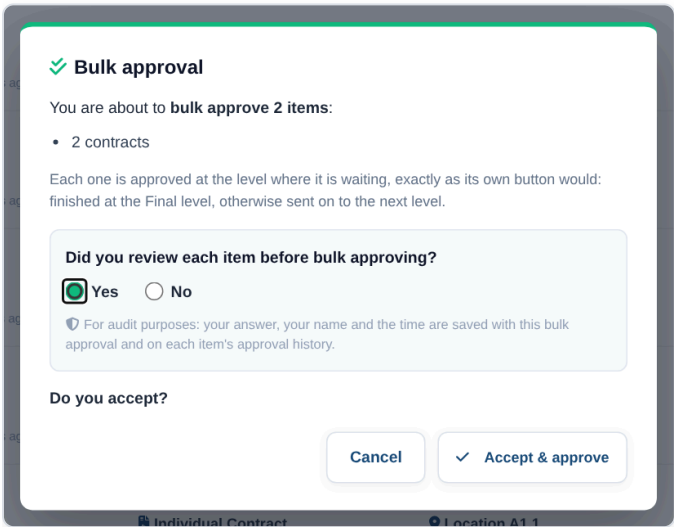

Three rows ticked.

- 1
- 2
- 3
- 4
- 1 Tick the rows, or tick the box in the header to select every row you can approve.

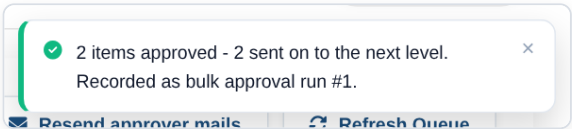

2 Click **Approve selected**. The **Bulk approval** pop-up lists what you are about to approve.

3 Answer **Did you review each item before bulk approving?** with **Yes** or **No**. Your answer, your name and the time are saved with the bulk approval and on each item's approval history, for the audit.

4 Click **Accept & approve** (it is available once you have answered), or **Cancel**.

The bulk approval question.

The result, with the number of the run.

Each item is approved at the level where it is waiting, exactly as its own button would. The result says how many were finished and how many were sent on, and the number of the run (**Recorded as bulk approval run #...**). Items that moved on since the Inbox was loaded are left alone and listed. Each item's approval history shows your name with (*bulk*

approval), and the run is listed in **Reports > Bulk Approvals** (Chapter 7). If the run cannot be recorded, nothing is approved and the system says so.

An issue can be ticked only when its warehouse is already known. If a row's box is greyed out, point at it to see why, for example **Choose its warehouse first - press Resolve**.

Rejecting

Rejecting a contract.

Click the red **X**. The pop-up first says **What happens**:

- The item is closed as **Rejected** and cannot be approved later.
- The managers at the level below get a notice on their phone with your reason; if that level has no manager, the person who captured it gets it.
- **A contract** must be captured and signed again. **A club contract** is enrolled again on the phone: all its farmers sign again, then the field technician, the Chairperson and the Secretary approve again.
- **An issue**: any stock already taken from the warehouse for it is put back. **A return**: nothing is added to stock.

Write the **Reason (required)**: what is wrong and what must be fixed. Click a common reason to add it, then add the detail; a common reason alone is not enough, and the reason needs at least 10 letters. Click **Reject contract** (or **Reject issue**, **Reject return**).

Issues and returns

Issues and returns captured on the phone arrive in the Inbox like contracts. Click **Resolve** to open one.

An issue with an item that has no warehouse.

A return.

- 1 Check or choose the warehouse under **Assign Warehouse**. It is filled in from the phone's choice, then from the warehouse proposed by the level below, then from the warehouse of the location. Items whose warehouse was chosen on the phone keep it.

- 2 Click the approve button. Its name tells you what will happen:
 - **Approve & Pass Up:** you approve at your level and it goes to the next level. The stock moves when the Final level approves.
 - **Assign & Approve, Approve or Receive & Approve** (returns): at the Final level. The stock moves now.
- 3 Or click **Escalate** to pass it up without approving it. Escalate is not shown at the top of the hierarchy or at the Final level.

Stock can go below zero

When the Final level approves an issue, the stock leaves the warehouse even if the warehouse does not have enough. Negative stock shows in red on Live Inventory (Chapter 6) until the missing stock is received or transferred in.

Subordinate Inboxes

Inbox (Pending Approvals)

Resend approver mails Refresh Queue

Contracts, returns and issues routed to you or waiting at your team's lower levels. Approve them at your level - they move up until the Final level set on the Workflow screen.

Filters

MY APPROVALS SUBORDINATE INBOXES

FILTER BY HIERARCHY LEVEL: -- All Levels --

Tick rows to approve several at once - the box in the header ticks them all. Approve selected

☐	FARMER	ROUTING LOCATION	STUCK AT (HIERARCHY LEVEL)	ASSIGNED MANAGER(S)	ACTION
☐	SAMPLE FARMER 032 F5015 CONTRACT 22 Sept 2026, 12:00 (3 days ago) THEIR LEVEL APPROVES ON THE MOBILE APP	Club 01	Level 4 (L4)	SAMPLE USER ONE	☐ ☐ ☐
☐	SAMPLE FARMER 033 F5016 CONTRACT 22 Sept 2026, 12:00 (3 days ago) THEIR LEVEL APPROVES ON THE MOBILE APP	Club 01	Level 4 (L4)	SAMPLE USER ONE	☐ ☐ ☐
☐	SAMPLE FARMER 034 F5017 CONTRACT 22 Sept 2026, 12:00 (3 days ago) THEIR LEVEL APPROVES ON THE MOBILE APP	Club 01	Level 4 (L4)	SAMPLE USER ONE	☐ ☐ ☐
☐	SAMPLE FARMER 035 F5018 CONTRACT 22 Sept 2026, 12:00 (3 days ago) THEIR LEVEL APPROVES ON THE MOBILE APP	Club 02	Level 4 (L4)	SAMPLE USER ONE	☐ ☐ ☐

Subordinate Inboxes: items waiting at the clubs below Location A1.1.

This tab shows what is waiting at the levels below you, with the manager assigned there (or **Unassigned / Orphan** when nobody is). Use **Filter by Hierarchy Level** to see one level. You can approve, resolve or reject these items for the level below, one by one or in bulk; the system tells you that you are approving on behalf of that manager. Use this when a manager is away, or when a level has nobody assigned.

Levels that approve on the mobile app

When **Approve From Mobile App?** is on for a level (Chapter 2), its managers approve and reject on the phone. Their items show **Approve on the mobile app** in their Inbox, and **Their level approves on the mobile app** under Subordinate Inboxes. You can still act on the web with the item's own buttons: the system first asks whether you want to do it on the web instead, for example because the manager's phone is broken.

Reminder emails

Resend approver mails emails the approvers of each level (and their stand-ins) about what is waiting there: the rows you ticked, or, when nothing is ticked, everything your Show filter and column searches leave. Before sending, the system shows who will receive what, and who cannot be emailed, for example because their profile has no email address. Email (SMTP) must be set up under Tenant Settings first.

CHAPTER 6

Distribution

Distribution Master: warehouses, stock items and products, distribution cycles, receiving stock, the issues and returns captured on the phone, and the stock in each warehouse.

How stock moves

1

Receive
Stock arrives at a warehouse and is recorded as a GRV against a PO or reference number.
RECEIVE STOCK (GRV)

2

Warehouse or location...

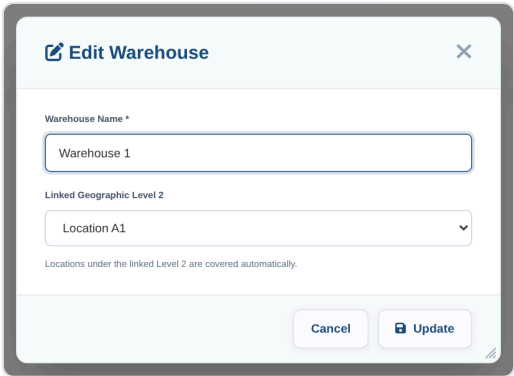

Data Tools

+ Create Warehouse

WAREHOUSE NAME	LINKED LOCATION	ACTION
Warehouse 1	Location A1 +5 Sub-Locations Inherited	
Warehouse 2	Location A1.1 +4 Sub-Locations Inherited	
Warehouse 3	Location A1.2 +2 Sub-Locations Inherited	

Distribution Master › Warehouses.

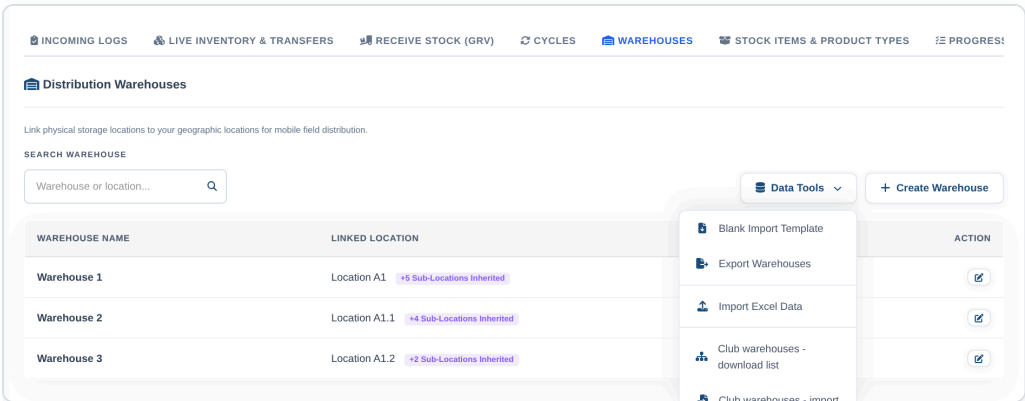

Each warehouse is linked to one location. It serves that location and every location below it (the list shows how many sub-areas it covers). The field staff's phones offer the warehouses of the farmer's club, or of the nearest level above it that has one. A club can also be given its own single warehouse in Locations Master (Chapter 2).

Click **Create Warehouse**, or the pencil next to a warehouse. Type the **Warehouse Name**, choose the **Linked Geographic Area**, and click **Save** (or **Update**).

Use the search box to find a warehouse by its name or area.

Edit Warehouse.

WAREHOUSE NAME	LINKED LOCATION		ACTION
Warehouse 1	Location A1	+5 Sub-Locations Inherited	
Warehouse 2	Location A1.1	+4 Sub-Locations Inherited	
Warehouse 3	Location A1.2	+2 Sub-Locations Inherited	

Data Tools on Warehouses.

- **Blank Import Template**, **Export Warehouses** and **Import Excel Data** handle warehouses in Excel. The warehouse name is the key: a name that already exists is updated. The import shows a preview (new, update, no change, rejected); nothing is saved until you click **Import**.
- **Club warehouses - download list** gives every club with its warehouse and the warehouses it may use. Fill in or change the **Warehouse** column, keep the **Location ID** column, and bring it back with **Club warehouses - import**. The check shows which clubs get a warehouse, which lose theirs and which rows have problems; nothing is saved until you click **Save**. An empty Warehouse cell removes the club's warehouse.

Stock items and products

Distribution Master › **Stock Items & Product Types** sets up the stock items and, for each product (tobacco type), how much of each item a farmer gets per hectare in Cat 1 to Cat 4. It is normally done from one Excel file.

Product types
Stock items
Try a farmer

Quantities are per hectare. Cat 4 is always there, even when it is 0.

Each category on its own
A category's quantity × the farmer's hectares in that same category.
Example: Cat 1 = 8 per ha and the farmer has 3 ha in Cat 1 = 24.

No quantity or no hectares = nothing
A category with no quantity in the cycle, or no hectares on the farmer's profile, gives nothing. Total HA is not used.

New distribution cycle
Cycles › Copy all product types brings these lines in, ready to adjust for that cycle.

P1 Product 1 3 items Active

STOCK ITEM	ITEM CODE	CAT 1	CAT 2	CAT 3	CAT 4	HOW IT IS WORKED OUT
Fertiliser A	FERT-A	50	50	50	—	× ha per category
Fertiliser B	FERT-B	2	3	—	—	× ha per category
Seed Pack	SEED	1	—	—	—	× Total HA

P2 Product 2 2 items Active

STOCK ITEM	ITEM CODE	CAT 1	CAT 2	CAT 3	CAT 4	HOW IT IS WORKED OUT
Fertiliser A	FERT-A	40	—	—	—	× Total HA
Fertiliser C	FERT-C	—	—	—	25	× Total HA

Product types, with the quantities per hectare for Cat 1 to Cat 4.

How quantities are worked out

- Each category on its own: the quantity per hectare for that category × the farmer's hectares in that same category. Example: Cat 1 at 50 per ha, and the farmer has 2 ha in Cat 1 = 100.
- When the line has quantities in several categories, the results are added up. A category left empty, or a category the farmer has no hectares in, gives nothing. The farmer's total hectares are not used.

To import stock items and products

- Click **Download template**, or **Export to Excel** to start from what is in the system now.
- Fill in one row per item, per product type: product type, item code and name, the quantity per hectare for Cat 1 to Cat 4, category and unit.

Page 61 of 90

- 3 Click **Import from Excel** and choose the file. Leave **Create product types that don't exist yet** ticked to add new products. Tick **Replace each product type's whole recipe with this file** only when items not in the file must come off.
- 4 Click **Check the file**. The check shows every change; nothing is saved yet. Download the skipped rows to fix them.
- 5 Click the import button. **Undo this import** reverses it. **Import history** lists every import; undo the newest first.

The Stock items tab.

Try a farmer.

- **Stock items** lists every item with its code, category, unit and the products it is used in. **Create item** and the pencil open the item: code, name, category, unit, cost price and farmer price (with its price history), barcode and whether it needs batch or lot tracking. **Units (UoM)** keeps the list of units.
- **Try a farmer** shows what a farmer gets for each line. Find a farmer or type hectares for Cat 1 to Cat 4, and choose the product. Nothing is issued from here.

Distribution cycles

A cycle is one distribution round, with its own list of what each contract receives. **Distribution Master** › **Cycles** lists them. Cycles are not deleted; deactivate a finished cycle.

- 4 Click **Process GRV**. The stock is added to the warehouse straight away.

Incoming Logs

Distribution Master › Incoming Logs lists the issues and returns captured on the phones, newest first. It holds the 100 most recent logs. A log gets its warehouse when it is approved in the Inbox (Chapter 5), or on the phone.

Incoming Distribution Logs

Incoming Distribution Logs.

- 1 **Filters:** the farmer's location, **Dates** and the status. They apply as soon as you choose; **Apply Filters** closes the list.
 - 2 **Columns:** choose and order the columns, including any Farmers Master column (Chapter 1).
 - 3 **Data Tools › Export Custom List:** every log your filters and column searches leave, with the columns you show, in Excel.
 - 4 The search boxes under the headings search one column each.
 - 5 **Inspect** opens the farmer's profile, with the evidence captured on the phone.
- **Status filter:** **Missing Warehouse** (waiting for approval, and at least one item has no warehouse yet), **Pending Approval** (waiting for approval, and every item has a warehouse, or it is a return) or **Fully Assigned** (approved).
 - **Warehouse** shows the warehouse the stock comes from; click it to open that warehouse. **1 item without a warehouse** means one still has to be chosen.
 - Each log shows whether it is an issue or a return under its date, and **Overdraft outlier** when it is unusually large.
 - The list is shown a page at a time; choose **Rows per page** at the bottom (25, 50, 100, 200 or All).

Live Inventory & Transfers: one tile per warehouse.

- 1 Search warehouse, location or item...** shows the warehouses whose name or location matches, or that hold a matching item.
- 2 Below zero only** shows only the warehouses with an item below zero.
- 3 Transfer Stock** moves stock between warehouses (below).

Each tile shows what the warehouse holds, what has been issued so far and what is waiting for approval, with its top items. A red number is below zero. When farmers were given only part of a category, the tile also shows what is **Still owed to farmers**. Click a tile, or **Open warehouse**, to open the warehouse view.

Page 68 of 90

The warehouse view: Stock summary.

- **Header.** **All warehouses** goes back to the tiles; **Switch warehouse** opens another one. **Receive stock (GRV)** and **Transfer** start from this warehouse. **Export** downloads what the tab shows. **All time**, **Last 30 days** and **Last 7 days** set the period (In stock is always today's figure).
- **Totals.** In stock now (with its value at cost price), Received, Issued to farmers, Transfers in and out, and Waiting approval. Each has a link to the details.
- **Stock summary.** Per item: opening stock, received, transfers, issued, in stock now, waiting approval, and what is left after approval. Click an item for its stock card.

Waiting approval

Issues captured on the phones but not yet approved at the Final level have not left the warehouse. **Left after approval** shows what will remain once they are approved. A red figure there warns that the warehouse will be short.

The stock card of one item.

The **stock card** shows every movement of one item in this warehouse, newest first, with the balance after each one: deliveries, issues (with the farmer, club, log number and who captured it), returns, transfers and corrections.

The other tabs of the warehouse view:

- **Issued to farmers:** per club and farmer, what they received.
- **All movements:** every movement, filtered by type and item.
- **Waiting approval:** issues not yet approved, where they are waiting and for how many days.
- **Partly issued** (when partial distribution is used): the farmers who were given only part of a category, what they were given, what is still owed and the reason.

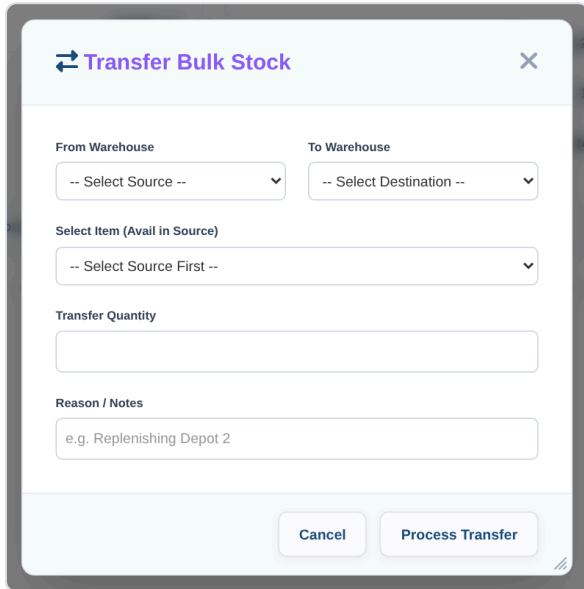

Stock summary 3 Issued to farmers 28 All movements 95 Waiting approval 7

Waiting approval.

To transfer stock

Transfer Bulk Stock.

A transfer cannot be more than the stock available at the source, and the two warehouses must be different.

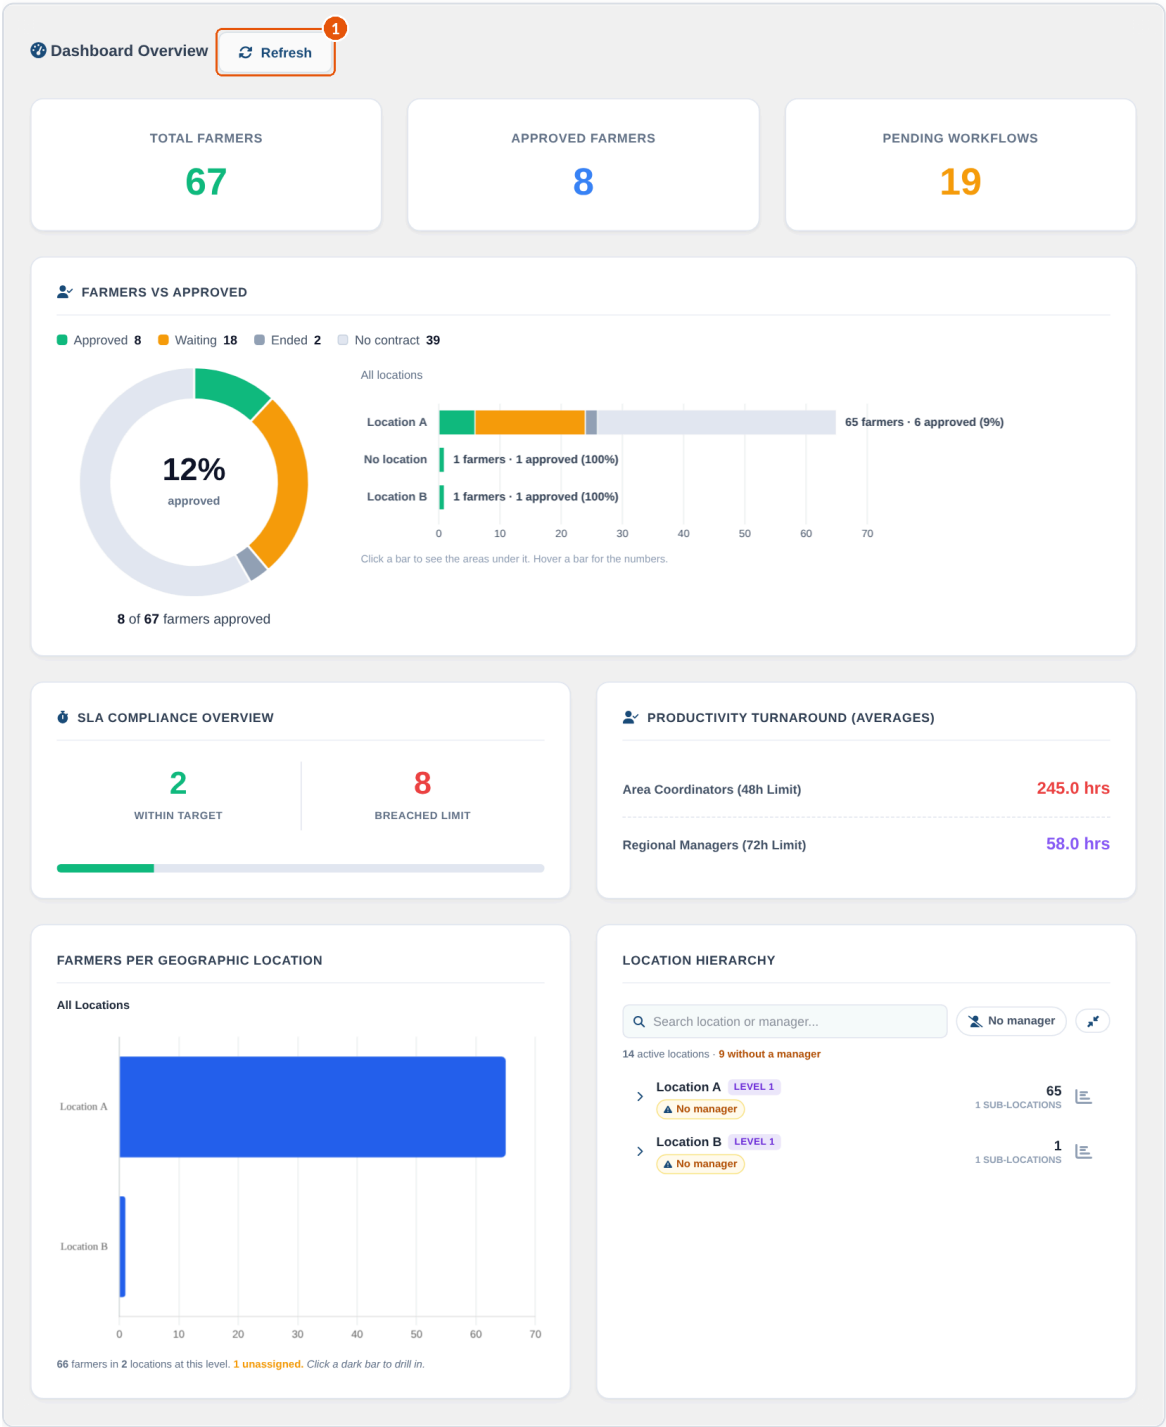

- 1 Click **Transfer Stock** (or **Transfer** in a warehouse).
- 2 Choose the **From Warehouse** and **To Warehouse**.
- 3 Choose the item (only items in stock at the source are listed, with the quantity available) and type the **Transfer Quantity**.
- 4 Type the reason and click **Process Transfer**.

CHAPTER 7

Monitoring

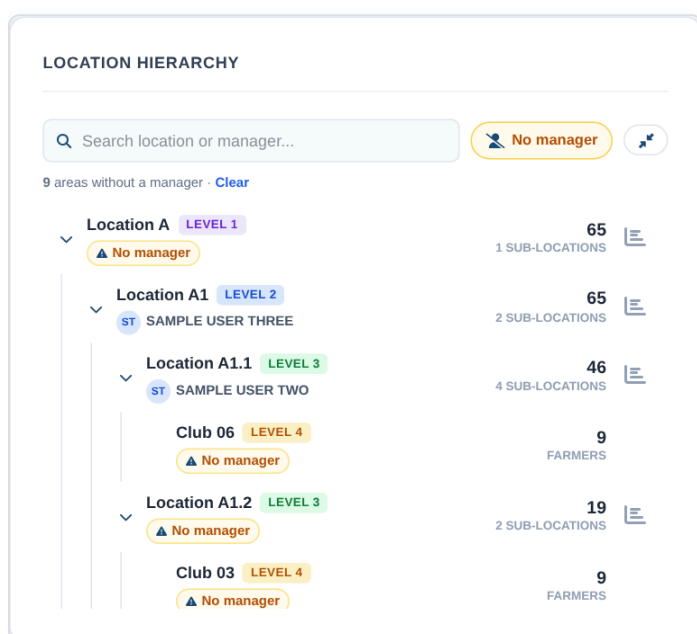

Following the work: the **Dashboard**, **Progress** on Contracts and on Distribution Master, **Reports**, messages to users with **Internal Broadcasts**, and the **Audit Log**.

Dashboard

Dashboard Overview.

- **Total Farmers** (active farmers), **Approved Farmers** and **Pending Workflows** (contracts waiting for approval). Approved Farmers counts **farmers**, not contracts: a farmer counts when his newest contract (his own, or a club contract he signed) is approved and not expired, the same way as the Contracts Report.
- **Farmers vs Approved** shows, for your farmers, how many are **Approved**, **Waiting**, **Ended** (expired, retired or rejected) or have **No contract**, with the percentage approved in the ring. The bars show the same for each location one level down; click a bar to see the locations under it, and use the path above the bars to go back up. Point at a bar for its numbers.
- **SLA Compliance Overview** counts approval steps done within their time limit and steps that took longer. **Productivity Turnaround** shows the average hours per approval step, with a limit of 48 hours for the first step and 72 hours for the later steps. A figure over its limit turns red.
- **Farmers per Geographic Location** is a bar chart per location. Click a dark bar to see the locations inside it; the path above the chart takes you back up.
- **Location Hierarchy** is the location tree with the managers of each location and its number of farmers. Search it by location or manager. **No manager** shows only the locations nobody is assigned to.

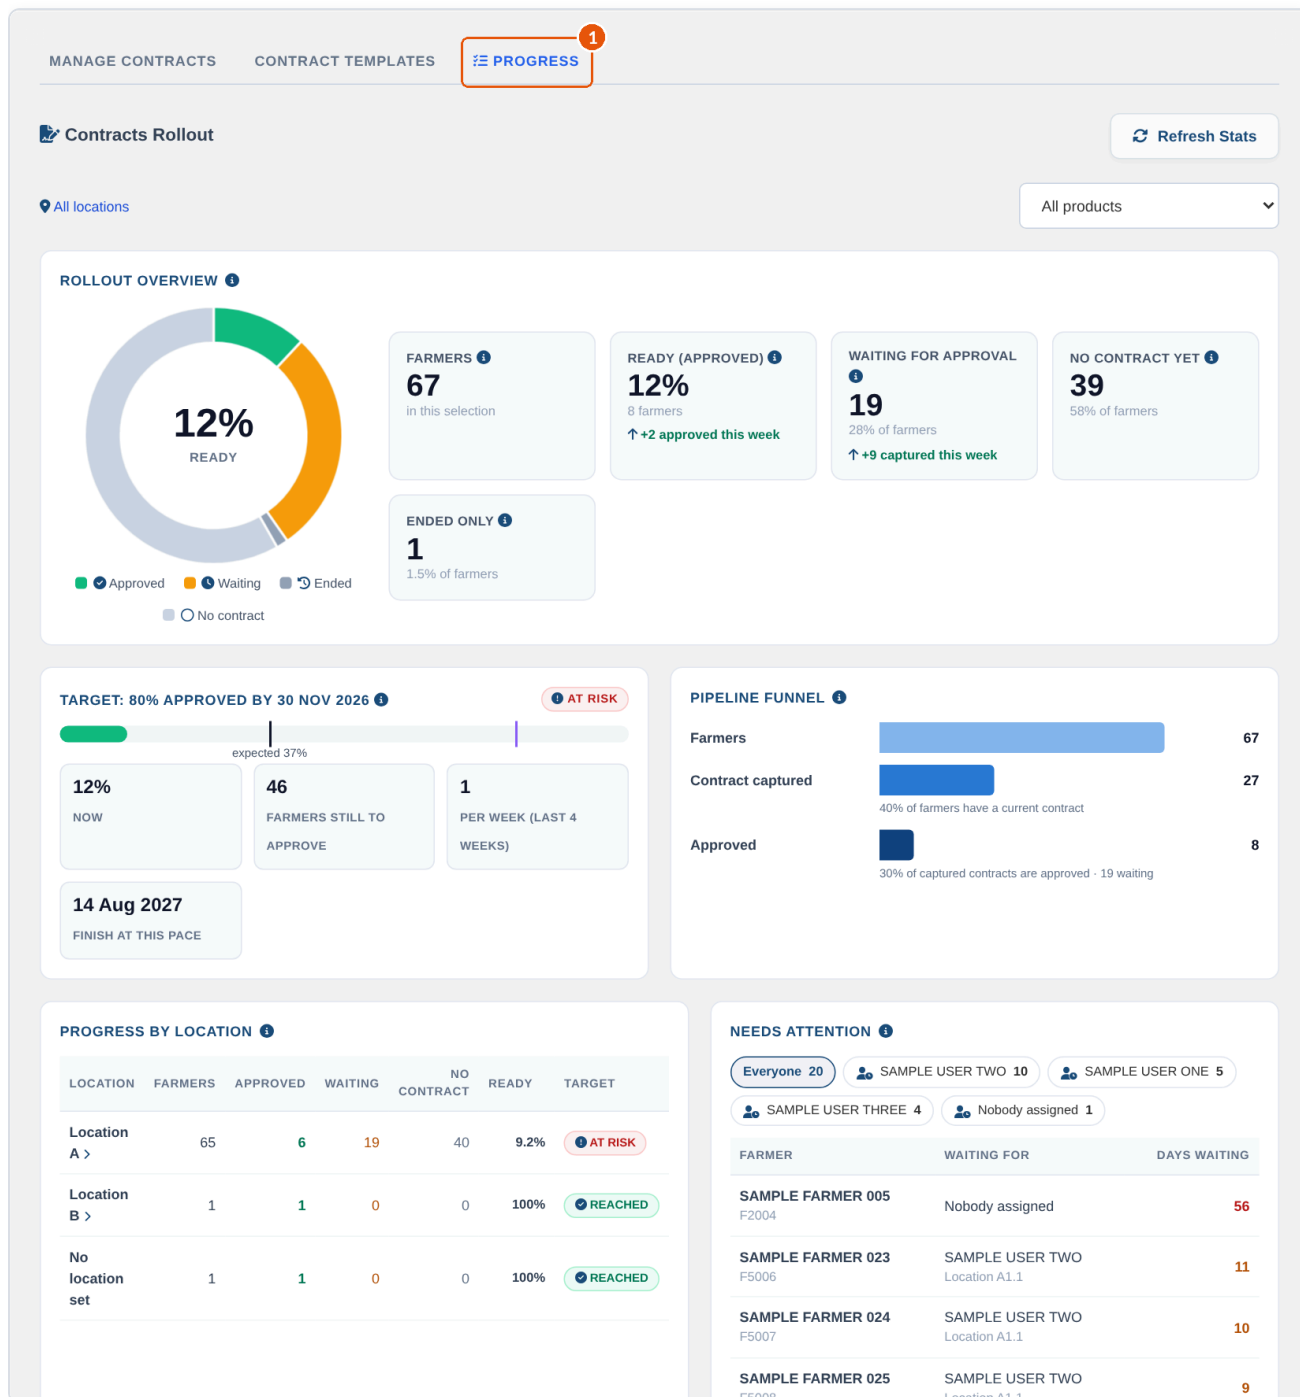

Location Hierarchy filtered on locations with no manager.

Refresh reloads the figures.

Progress

Progress is a tab on two screens: **Contracts › Progress** for the contracts rollout, and **Distribution Master › Progress** for the inputs distribution. Both start at **All locations**: click a location in **Progress by location** to go down into it, and use the path at the top to go back up. **Refresh Stats** reloads the figures. Each box has an (i) that explains it.

Contracts › Progress

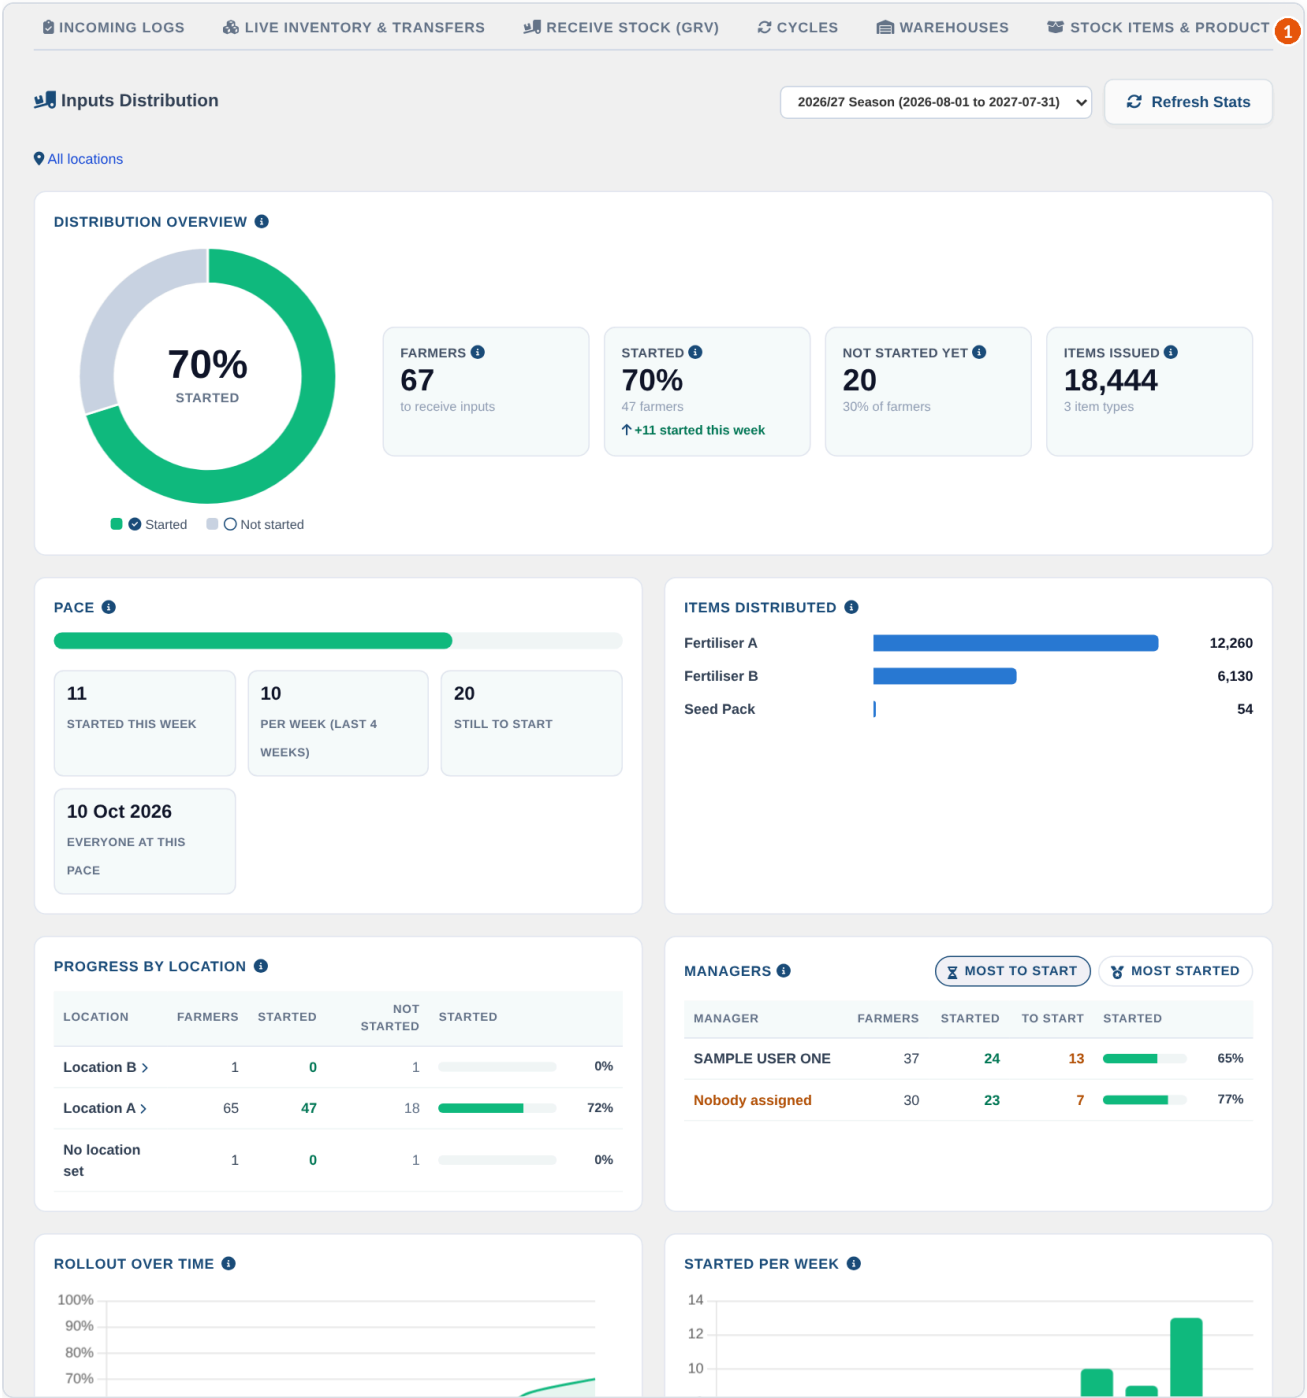

Contracts Rollout, with a target of 80% by 30 November.

Every active farmer is counted once, by his best contract: **Approved** (an approved, current contract), **Waiting** (for approval), **Ended** (every contract expired or retired; he needs a new one) or **No contract**. A club contract counts for every farmer who signed it. Choose a product at the top right to see one product only.

- **Rollout overview.** The ring shows the percentage ready, and the cards show the farmers, how many are ready, waiting, without a contract or ended, with what changed this week.
- **Target.** When a rollout target is set (**Settings › General**, Chapter 2), this box shows the target, where you should be by today (**expected**), where you are now, the farmers still to approve, the pace per week over the last 4 weeks, and when the target will be reached at this pace. The status is **Target reached**, **On track**, **Behind**, **At risk** or **Target date passed**.
- **Pipeline funnel.** Farmers, then those with a contract captured, then those approved, with the percentage at each step.
- **Progress by location.** The locations one level down, lowest completion first, with a **Target** column when a target is set.
- **Needs attention.** Contracts waiting for approval, longest wait first. Click a manager's chip to see only theirs. Waits of 7 days or more show in amber, 14 days or more in red.
- **Rollout over time** (the percentage approved week by week, with the target line) and **Weekly trend** (farmers captured and approved per week).
- **Contracts.** Every contract in the selection, with a search box. Click a row in Needs attention or Contracts to open the contract.

Distribution Master › Progress

Inputs Distribution for the 2026/27 season.

Choose the season at the top right (the active season at first). A farmer has **started** when he has received anything in that season, that is, an issue to him has been approved.

- **Distribution overview.** The ring shows the percentage started; the cards show the farmers, how many have started (and how many this week), how many have not, and the items issued.
- **Pace.** Farmers started this week and per week over the last 4 weeks, how many are still to start, and when everyone will have started at this pace.
- **Items distributed.** The quantity issued of each item; **All N items** shows the full list.
- **Progress by location**, worst first, and **Managers:** per manager, his farmers, how many have started and how many are still to start. Each farmer counts for the managers assigned to his own club.

- **Rollout over time** and **Started per week**, for the last 12 weeks.

Audit Log.

A permanent record of every create, update and delete in this module, including bulk approvals, value-rule decisions and steps marked outside procedure. Records cannot be changed or removed. Choose the **Dates** (the current week at first) and search by user, action, module or detail. Each row shows when, who, the action, the module, what it was about and the details. The magnifier at the end of a row opens the full record.

Inspect Audit Record.

CHAPTER 8

Reference

Statuses, the rules the system enforces, the Excel files, and the words used in the module.

Statuses

Record	Status	Meaning
Contract (Contracts list)	Under review	Waiting in the approval workflow.
	Approved	Fully approved (straight away when an administrator assigned it, unless high value).
	Expired	The end date has passed (at the end of that day), or it was expired early (from the start of the day chosen).
	Legacy	Not approved and not waiting at any level, for example after it was rejected.
	High value	The size is at or above the threshold in Settings › Contract Rules.
Farmer's contract (Contracts Report, Dashboard)	Approved · Waiting · Expired · Retired · Rejected · No contract	From the farmer's newest contract, his own or a club contract he signed.
Issue or return	Missing warehouse	Waiting for approval; at least one item has no warehouse yet.
	Pending approval	Waiting for approval; every item has a warehouse.
	Assigned / Approved	Approved at the Final level. The stock has moved.
	Rejected	Rejected in the Inbox. Stock taken for an issue is put back.
Inputs in a cycle	Gets · Issued · Does not get	Farmers Master, per running cycle, with the categories or the reason.
Category issued	Not issued yet · Partly issued · Issued	On the farmer profile, per category of the running cycle.
Farmer	Active Profile · Deactivated	Deactivated farmers stay in the system with the reason and date.
Cycle allocation	Active · Ends this week · Overdue · Fully received	On the farmer profile, per active cycle.
Rollout target	Target reached · On track · Behind · At risk · Target date passed	Contracts › Progress, when a target is set.

Record	Status	Meaning
Club	Not assigned	The club has no Chairperson and/or no Secretary.
Template	Active · Deactivated · Default on phones	Versions show as Active Current or Archived.
Season	Active · Inactive	Only one season can be active.
Stand-in	Active Now · Scheduled · Expired	Based on today's date and the rule's dates.
Bulk approval item	Finished · Sent to the next level · Left alone (moved on) · Failed · Pending	Reports › Bulk Approvals.
Broadcast recipient	Read · Pending · Accepted · Awaiting Accept	Whether the user has opened and accepted the message.

Rules to remember

Area	Rule
Farmers	Contract numbers may contain letters and digits only.
	A farmer import stops completely if any row names a location that does not exist, unless Create missing locations from this file is ticked.
	Mandatory profile documents must be uploaded before a profile can be saved.
	Rolling back a farmer import deletes the farmers it created, and fails if one of them already has a contract.
	Renaming a profile field keeps every farmer's value; two fields cannot have the same name.
Locations	A location's circle must fit inside its parent's circle.
	Only the most recent Locations import can be undone.
	A level cannot be deleted while locations use it.
Contracts	A PDF template cannot be used until its fields are mapped.
	Changing a template in use creates a new version; signed contracts keep their version.
	Club contracts are created and renewed on the phone; the web shows them.
	Only one season can be active. With season dates on and no active season, no contract can be added.
	There is one default contract for the phones.

Area	Rule
Approvals	Items stop at the Final level; levels above it are not used, unless a value rule sends a club's contracts higher.
	Auto-escalation never passes an item up from its Final level.
	Stock moves only when the Final level approves an issue or a return, and it can go below zero.
	A reason of at least 10 letters is required to reject.
	Bulk approval asks whether you reviewed each item; the answer is kept for the audit.
	A manager cannot stand in for themselves.
Distribution	Each category gives its quantity × the farmer's hectares in that same category; a category with no quantity or no hectares gives nothing.
	With partial distribution on, more than is still owed in a category is refused.
	A transfer cannot be more than the stock available at the source warehouse.
	An item with batch or lot tracking needs its batch or lot number on a GRV.
	Cycles are deactivated, not deleted.

Excel files

Where	Files
Farmers Master › Data Tools	Blank template, Export Farmer Data, Export Custom List, Import Excel Data, View Import History (rollback).
Chairperson & Secretary › Data Tools	Import template, Import Excel, Export Custom List, Export All Fields, History (undo a one-farmer club step).
Locations Master	Download Template, Export Locations, Import Locations, Import History (undo the latest).
Farmers Hierarchy › Manager Assignments › Data Tools	Blank template, Bulk Upload Assignments (roll back after applying).
Distribution Master › Incoming Logs › Data Tools	Export Custom List.
Distribution Master › Warehouses › Data Tools	Blank template, Export Warehouses, Import Excel Data, Club warehouses download list and import.
Distribution Master › Stock Items & Product Types	Download template, Export to Excel, Import from Excel, Import history (undo).
Distribution Master › Live Inventory	Export from the warehouse view (a CSV file).

Where	Files
Reports	Export on each report; Scheduled Mailers email reports.

Words used

Word	Meaning
Level (L1, L2 ...)	A layer of your hierarchy. L1 is the top. Your company names each level, and the screens use those names.
Location	One place in the hierarchy, at a level. Some older screens and files still say area.
Club	A location at the lowest level. Farmers belong to a club.
Final level	The last level that approves. Nothing goes above it.
Value rule	A workflow rule that gives the contracts of clubs that meet a number (for example their hectares) a different Final level.
Product (tobacco type)	What a farmer grows. It decides which items the farmer's contract receives.
Recipe	The default list of inputs for a tobacco type, copied into each cycle.
Cat 1 – Cat 4	The four categories of a farmer's hectares, used to work out quantities per hectare.
Cycle	One distribution round, with its own list of items per contract.
Season	The growing year. Only one is active; its dates can be used for every contract, and it is used by the season filters of Progress and the reports.
Partial issue	Part of a category given now; the rest stays owed until it is given.
Rollout target	The percentage of farmers that should be approved by a date.
GRV	A delivery of stock into a warehouse, against a PO or reference number.
Issue / Return	Inputs given to a farmer, or brought back by him, captured on the phone.
Log	One issue or return as it arrives from the phone.
Escalate	Pass an item up to the next level without approving it.
Bulk approval run	One use of <i>Approve selected</i> in the Inbox, recorded with a number for the audit.
Stand-in	A user who receives another user's approvals for a period.
SLA	The time limit for an approval step.
Outside procedure	A step done another way than the rules ask, for example a card check instead of a face scan. It is shown to the office and kept in the Audit Log.
