

Farmers & Distribution

Connect your phone, set up farmers and club contracts, and issue inputs with the mobile app.

About this manual

This manual shows you, step by step, how to work with the **Farmers & Distribution** part of the mobile app. It starts where every new phone starts: getting the app, connecting the phone to your company's system and logging in. It then follows the work in the order it is done in the field: setting up a farmer, signing the club contract, the final approval by the club, and issuing inputs.

Chapter	What it covers	Who
1 • Get the app and connect the phone	Install the app and connect it to your company with the Connect a Phone QR code from the web system.	Administrator and field staff
2 • Log in with a login QR	Make a login QR in Settings › User Access and log in by scanning it. The first download and naming the phone.	Administrator and field staff
3 • Find your way around	The home screen, the Farmers page, and Sync : sending your work and getting new data.	Field staff
4 • Set up a farmer	Find the farmer, take his photo, map his face and let him sign. The club's Chairperson and Secretary.	Field staff
5 • Sign the club contract	Every farmer of the club confirms who he is and signs, then you sign as witness.	Field staff
6 • Contract final approval	The Chairperson and Secretary/Treasurer approve the contract and you send it to the office.	Field staff with the club's office bearers
7 • Issue inputs	Open the farmer with a face scan, issue a category and capture the evidence.	Field staff
8 • Quick reference	A daily checklist, messages you may see and what to do, and words used.	Everyone

How to read it

- Words in **bold** are buttons, tabs, fields and messages exactly as they appear on the screen.
- A path such as **Settings** › **User Access** means: open **Settings**, then click **User Access**.
- Numbers in orange circles on a picture match the numbered list next to it or under it.
- **Tap** means touch the phone screen with your finger. **Click** is used for the web system on a computer.
- **Club** means a location at the lowest level of your company's hierarchy. The screens use this word too, for example for club contracts.
- Fields your company creates itself (for example profile fields and location fields) have the names your company gave them. The pictures show example names.
- What you see depends on the access your administrator gave you and on your company's settings. If a tile or button in this manual is missing on your phone, ask your administrator.

About the pictures

The pictures come from a test copy of the system filled with example data: *Sample Farmer 001, Club 06, Fertiliser A, Your Company* and so on. None of it is real. The phone pictures show the app's dark appearance; your phone may show the light one (you can choose it in **Sync › Appearance**). Photos, signatures, the contract and the membership card are examples made for this manual.

The web system has its own manual

The office side of the same work (adding farmers, contracts, approvals, stock and reports) is in *Farmers & Distribution – Web user manual*, next to this manual in Training.

The work at a glance

This is the whole journey covered by this manual. The green steps are done on the phone, the blue steps on the web system.

1

Get the app and connect

Install the app and scan the **Connect a Phone QR**.

WEB + PHONE · CHAPTER 1

2

Log in

Scan your **login QR**. The phone downloads your farmers.

WEB + PHONE · CHAPTER 2

3

Set up the farmers

Photo, face and signature of every farmer, and the club's office bearers.

PHONE · CHAPTER 4

4

Sign the club contract

Each farmer is confirmed by face and signs. You sign as witness.

PHONE · CHAPTER 5

5

Final approval

The Chairperson and Secretary/Treasurer approve. You send it to the office.

7

Issue inputs

Open the farmer by face scan, issue a category, capture the evidence.

PHONE · CHAPTER 7

8

Sync

Send your work to the office every day.

PHONE · CHAPTER 3

Three habits that prevent most problems

- **Start the day with a Quick download** (Sync screen) while you have internet, so the phone has the latest farmers, contracts and decisions of the office.
- **End the day with Sync now**, so the office receives your work. The app saves everything on the phone first, so you can work without internet in between.
- **Never delete the app or clear its data** while records are waiting to send. They are on this phone only until you sync.

CHAPTER 1

Get the app and connect the phone

Before anyone can log in, the app must be on the phone and the phone must know which company system to talk to. You do this once per phone, with a QR code from the web system.

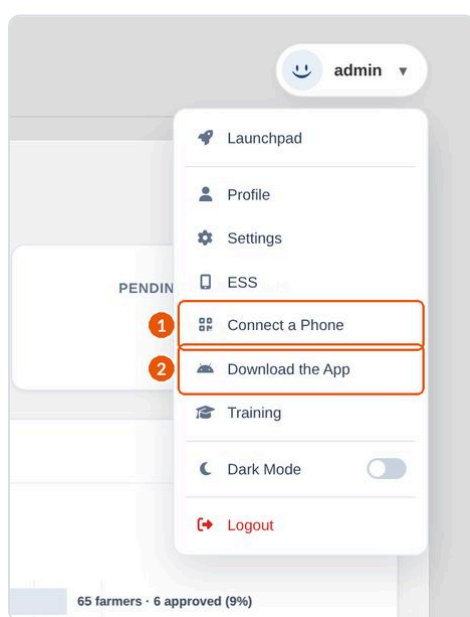

What you need

- ☐ An **Android phone** with a camera and internet for the set-up. The app is for Android phones only.
- ☐ Someone who can open **Settings** on the web system (usually your administrator). They show the **Connect a Phone** QR code and make login QR codes.
- ☐ A **user** for the person who will use the phone, with **App** access (Chapter 2) and access to the Farmers tiles of the mobile app. Your administrator gives this access.
- ☐ For face scanning: the company's face licence on the phone. It is fetched with internet on the Sync screen: **Offline face license** › **Fetch** (Chapter 3). When it is there, the row shows **Active**.

Two different QR codes

QR code	What it does	Where it comes from
Connect a Phone	Tells the phone which company system to use (the server address and your company's licence key). It does not log anyone in.	Web system: profile menu › Connect a Phone .
Login QR	Logs one user in without typing a password. If the phone is not connected yet, it connects the phone first.	Web system: Settings › User Access › QR icon of the user (Chapter 2).

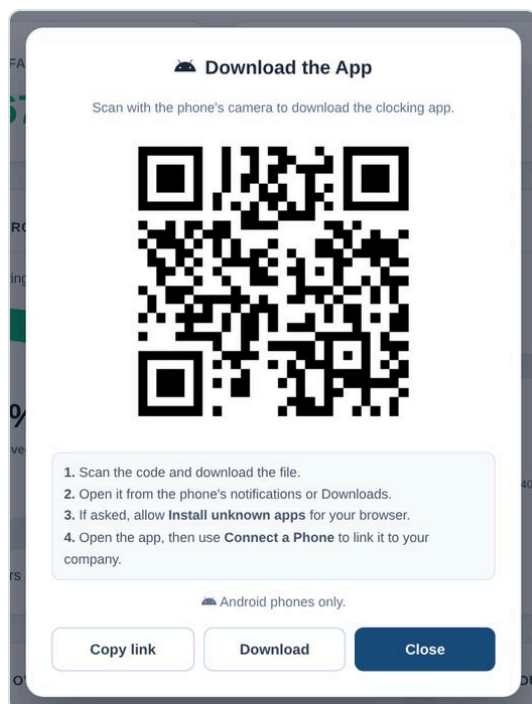

Install the app

The profile menu on the web system.

- 1 On the web system, click your name at the top right to open the profile menu.
- 2 Click **Download the App** 2. A pop-up shows a QR code.
- 3 On the phone, open the **camera** and point it at the QR code. Tap the link that appears to download the app file.
- 4 Open the file from the phone's notifications or **Downloads**. If the phone asks, allow **Install unknown apps** for your browser, then tap **Install**.

Connect a Phone 1 is used in the next section. It shows only for people who can open Settings.

Download the App: the QR code and the four steps.

The pop-up also has **Copy link** (to send the link to a phone, for example by message) and **Download** (to save the file on the computer).

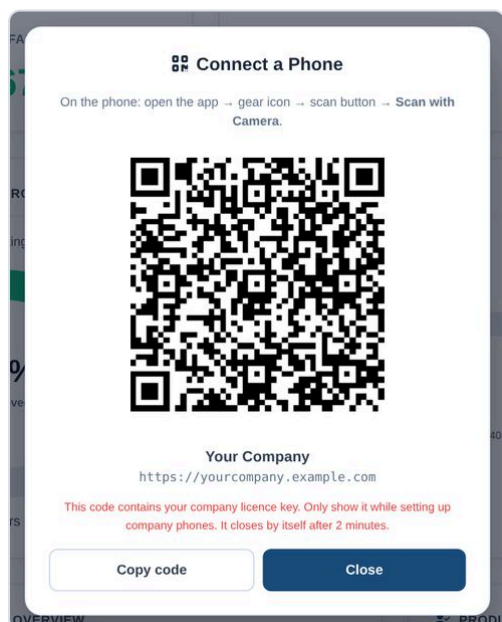

Updating the app later

When a newer version is out, use **Check for updates** next to **App version** on the Sync screen (Chapter 3). Tap **Sync now** before you update.

Connect the phone to your company

Do this the first time the app is opened on a phone, with the administrator next to you.

On the web system (administrator)

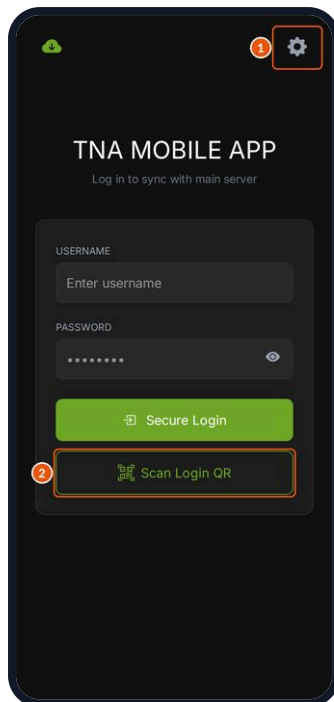

The Connect a Phone QR code.

- 1 Open the profile menu (your name at the top right) and click **Connect a Phone**.
- 2 Keep the pop-up open while the phone scans the code.

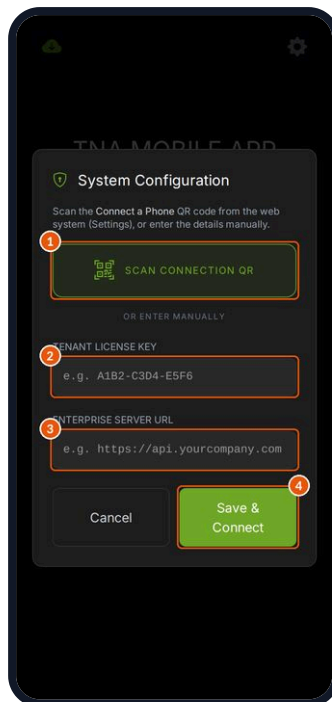

Keep this code private

The code contains your company's licence key. Only show it while setting up company phones. It closes by itself after 2 minutes. **Copy code** copies the same details as text.

On the phone

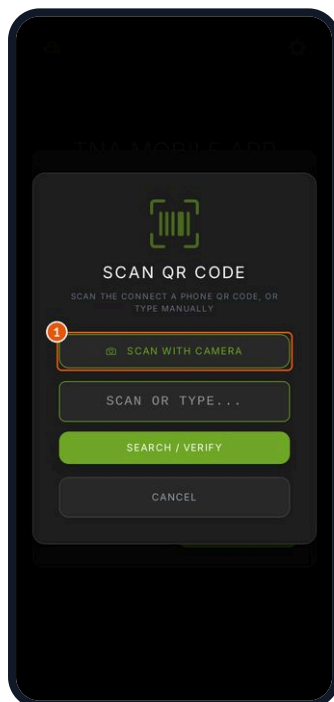

The first screen of a new phone.

System Configuration.

- 1 Open the app. It shows the login screen. Tap the **gear** at the top right (1 on the first picture). **Scan Login QR** (2) is for Chapter 2.

- 2 **System Configuration** opens. Tap **Scan Connection QR** (1 on the second picture).

The scan window.

Pointing the camera at the code on the computer screen.

- 3 Tap **Scan with Camera**. If the phone asks, allow the app to use the camera.
- 4 Point the camera at the QR code on the computer screen. Hold still until the phone reads it.
- 5 The phone asks **Connect this phone to:** with your company's name and the server address. Check them and tap **OK**.
- 6 The app saves the details and restarts on the login screen. The phone is now connected. Continue with Chapter 2 to log in.

No camera, or the scan does not work?

In **System Configuration**, type the **Tenant License Key** (2) and the **Enterprise Server URL** (3) your administrator gives you, then tap **Save & Connect** (4). The administrator can see both on the web system with **Copy code**.

Changing a phone to another server

If a phone still has records that were not synced to its old server, the app refuses to connect to a new one and says how many records are waiting. Sync them first. Connecting to a new server clears the data that came from the old one.

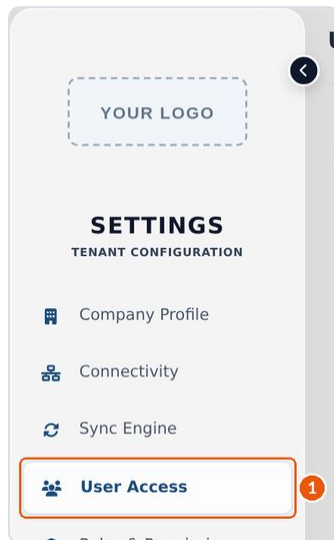

CHAPTER 2

Log in with a login QR

A login QR lets a person log in by scanning a code instead of typing a password. The administrator makes it on the web system, the user scans it on the phone.

Make a login QR (administrator)

You need access to **User Access** in Settings (administrators, or users with the user-management rights).

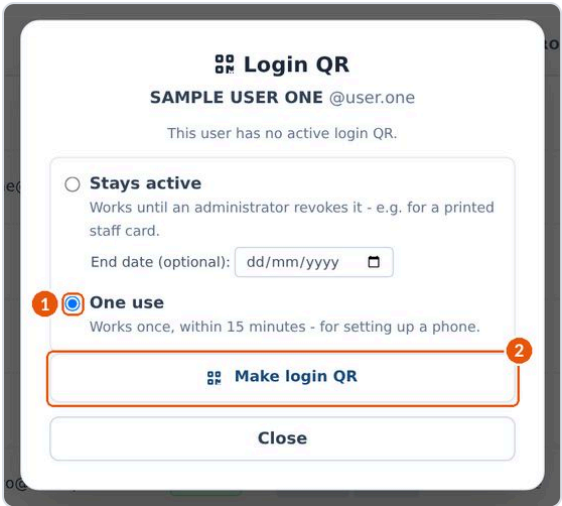

Settings menu.

- 1 Open the profile menu (your name at the top right) and click **Settings**.
- 2 Click **User Access** 1. The list of users opens.
- 3 Find the user. The **Access** column must show **APP** ; without App access a login QR cannot be made. To give App access, edit the user (pencil icon).
- 4 Click the **QR icon** in the user's **Actions**.

☐	USER PROFILE	EMAIL	STATUS	ACCESS	ASSIGNED ROLE	DATA SCOPE (DEPTS)	MODULES	ACTIONS
☐	ADMIN USER @admin	-	ACTIVE	WEB	Custom / None	No Scope Set	CONTRACTORS	  
☐	SAMPLE USER ONE @user.one	user.one@example.com	ACTIVE	WEB APP	Custom / None	No Scope Set	CONTRACTORS	 1  
☐	SAMPLE USER FIVE @user.five	-	ACTIVE	WEB APP	Custom / None	No Scope Set	CONTRACTORS	  
☐	SAMPLE USER SIX @user.six	-	ACTIVE	WEB	Custom / None	No Scope Set	CONTRACTORS	  
☐	SAMPLE USER SEVEN @user.seven	-	ACTIVE	WEB APP	Custom / None	No Scope Set	CONTRACTORS	  
☐	SAMPLE USER TWO @user.two	user.two@example.com	ACTIVE	WEB APP	Custom / None	No Scope Set	CONTRACTORS	  
☐	SAMPLE USER THREE @user.three	-	ACTIVE	WEB	Custom / None	No Scope Set	CONTRACTORS	  
☐	SAMPLE USER FOUR @user.four	user.four@example.com	ACTIVE	WEB	Custom / None	No Scope Set	CONTRACTORS	  

Showing 1 to 8 of 8 users 10 per page < Prev Next >

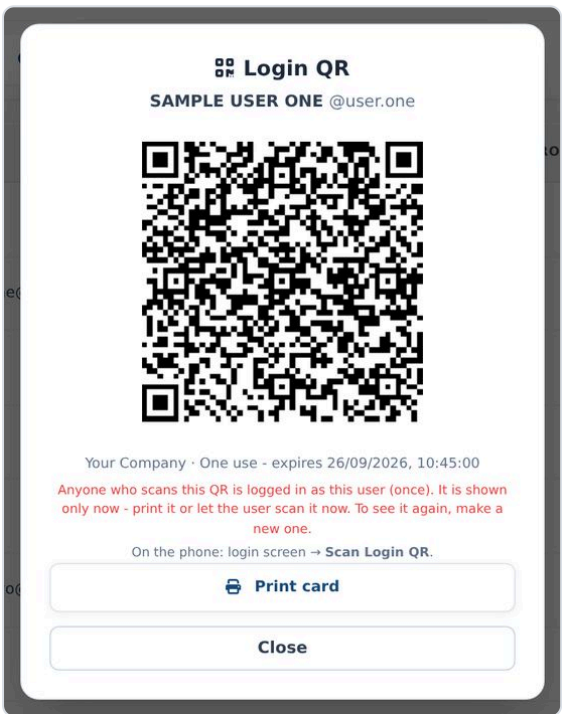

Settings › User Access: the QR icon of SAMPLE USER ONE.

Choose the kind of login QR.

- 5 Choose the kind of QR 1 (table below).
- 6 Click **Make login QR** 2.

Kind	Use it for
One use	Setting up a phone. Works once , within 15 minutes .
Stays active	A printed staff card the user keeps. Works until an administrator revokes it, or until the End date if you set one.

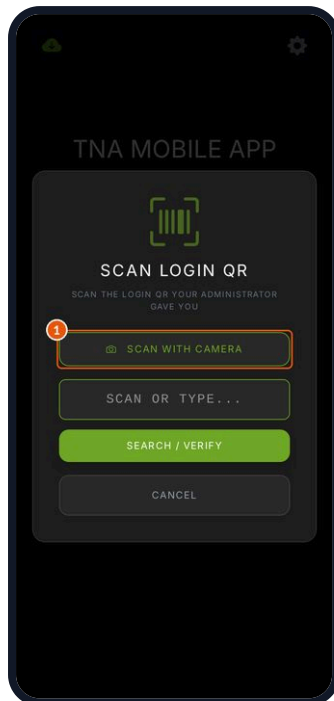

The login QR, shown only now.

- 7 The QR code shows with the company name and how long it works. Let the user scan it now (next section), or click **Print card** to print it.

Treat it like a password

Anyone who scans this QR is logged in as this user. It is shown only once: to see it again, make a new one. Making a new QR stops the old one straight away, also on a printed card.

Log in on the phone

The scan window.

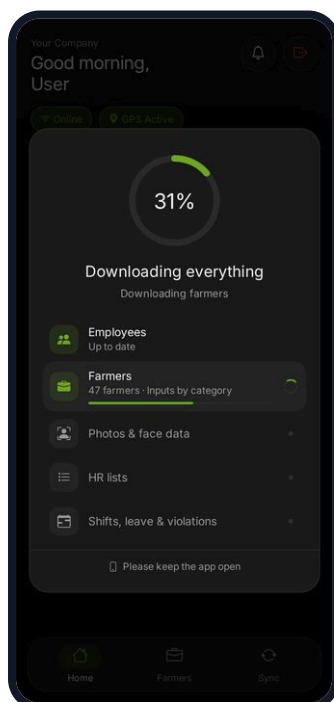

Scanning the login QR.

- 1 On the login screen, tap **Scan Login QR** (the green button under **Secure Login**).
- 2 Tap **Scan with Camera** (1).
- 3 Point the camera at the login QR, on the computer screen or the printed card.
- 4 The phone asks **Log in as username at company**. Check that it is you and tap **OK**.

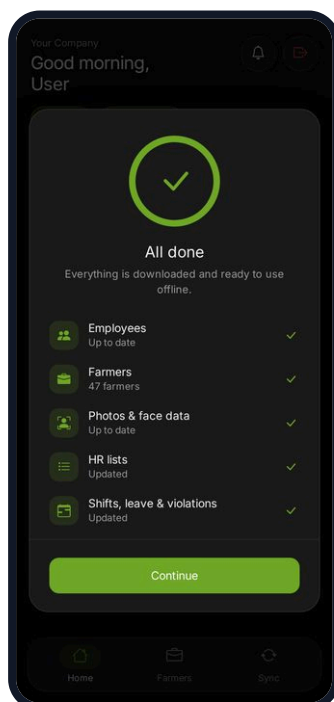

A login QR also connects a new phone

If the phone is not connected to your company yet, scanning the login QR connects it first. The app restarts and then logs you in by itself. So with a login QR you can skip the **Connect a Phone** step of Chapter 1.

The first download

Downloading everything.

All done.

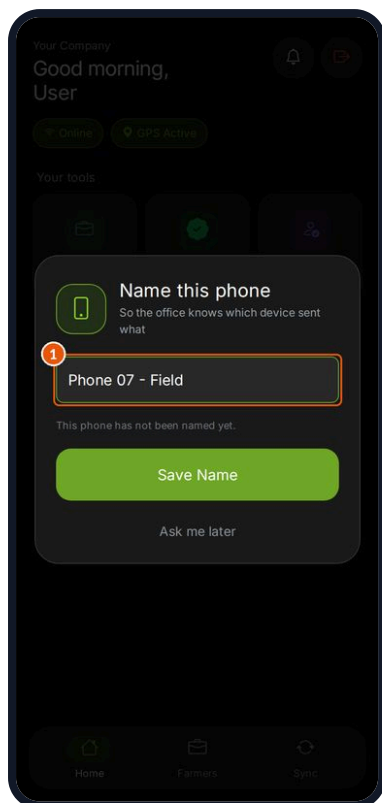

Straight after the first login, the app downloads everything it needs to work without internet: your farmers, their photos and faces, contracts, cycles and settings. The pop-up shows each part and how far it is.

- 1 Keep the app open and stay connected to the internet until the pop-up says **All done**. The first time can take a few minutes.
- 2 Tap **Continue**.

You only get the farmers of the locations your user is assigned to. If farmers are missing, ask the office to check your locations, then tap **Quick download** (Chapter 3).

If a part did not finish, the pop-up says which one and offers **Try again**. Your saved work is safe.

Name this phone

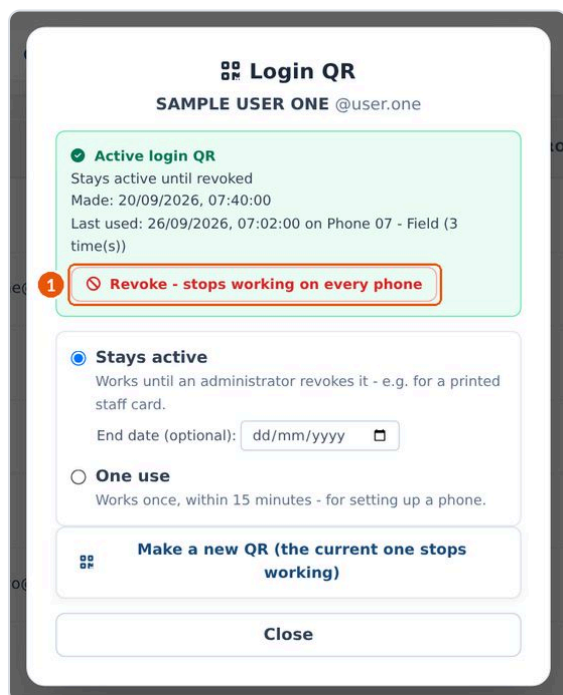

Name this phone.

A few seconds after the first login the app asks you to **name this phone**. The name goes with everything captured on it, so the office knows which phone sent what.

- 1 Type a name the office will recognise **1**, at least 3 characters. Your company may have a naming rule; use it.
- 2 Tap **Save Name**.

Ask me later skips it for today. The app asks again each day until the phone has a name.

Lost card, other ways to log in

A user with an active login QR.

A card is lost or a person leaves. On the web system, open the user's QR icon again. The pop-up shows the active QR: what kind it is, when it was made and when it was last used, on which phone. Click **Revoke** **1**: it stops working straight away on every phone. A user who is already logged in on a phone stays logged in there.

Username and password. On a connected phone you can also type your username and password and tap **Secure Login**. Logging in needs internet.

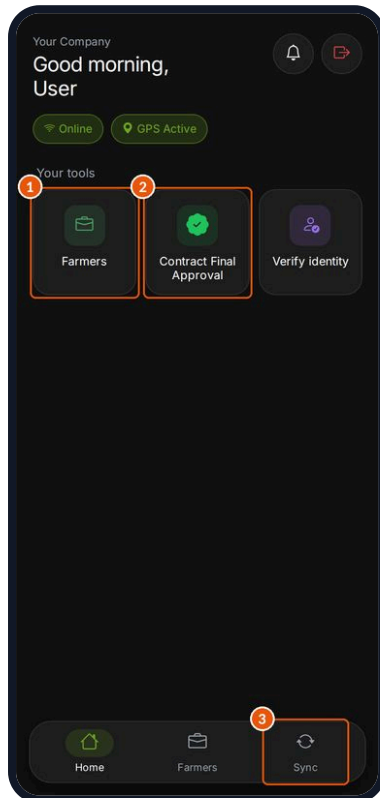

Fingerprint or face. After a login with your password, the app may offer **Fingerprint/Face ID** for next time. If you accept, **Biometric Sign-In** shows on the login screen.

CHAPTER 3

Find your way around

The home screen, the Farmers page where all the work in this manual starts, and the Sync screen that sends your work to the office.

The home screen

Home, with the Farmers tiles only.

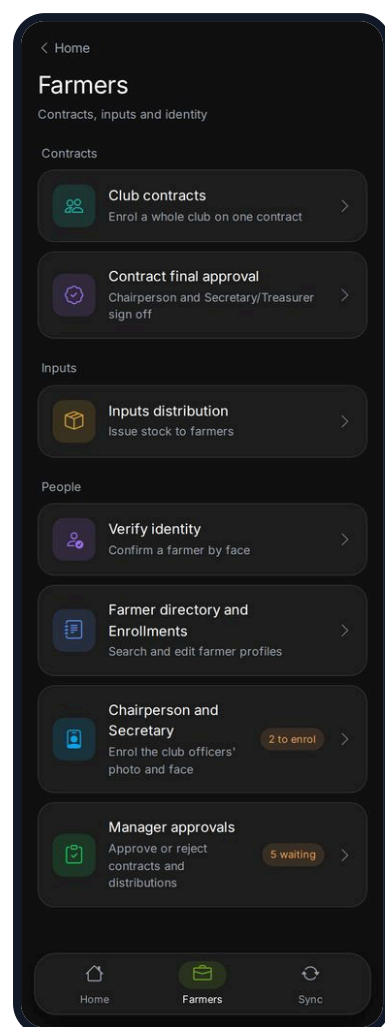

After logging in you see **Home**. It greets you and shows whether the phone is **Online** and has **GPS Active**. Under **Your tools** are the tiles your user may use. The pictures show a user with the Farmers tiles only; your phone may show more.

- 1 **Farmers:** the Farmers page (below).
- 2 **Contract Final Approval:** the club contracts waiting for the Chairperson and Secretary/Treasurer (Chapter 6). It shows how many are waiting.
- 3 **The bar at the bottom:** **Home**, **Farmers** and **Sync**, from every screen.

At the top right: the **bell** shows messages from the office, and the **red button** logs you out.

Verify identity confirms who a farmer is with a face scan, for example at a meeting. It is not needed for the steps in this manual.

The Farmers page

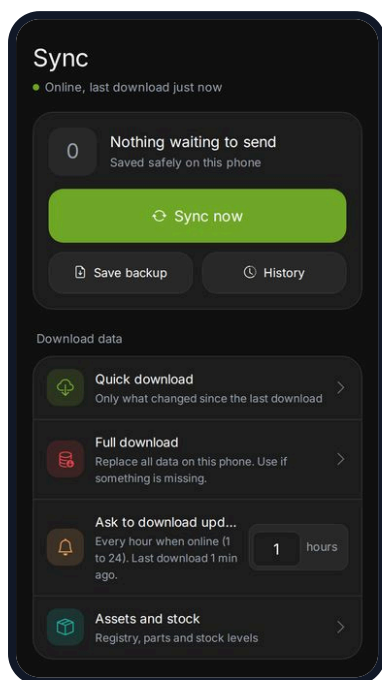

The Farmers page.

Button	Use it to
Club contracts	Let all the farmers of a club sign the club contract (Chapter 5).
Contract final approval	Let the club's Chairperson and Secretary/Treasurer approve the contract, and send it to the office (Chapter 6).
Inputs distribution	Issue inputs to a farmer (Chapter 7).
Verify identity	Confirm who a farmer is by face scan.
Farmer directory and Enrollments	Find a farmer and enrol his photo, face and signature (Chapter 4).
Chairperson and Secretary	See each club's office bearers and enrol them (Chapter 4). The badge shows how many still need enrolling.
Manager approvals	Only for managers whose approval step the office set to the mobile app: approve or reject contracts and issues.

The farmers on the phone are the farmers of the locations your user is assigned to.

Sync: send your work, get new data

The app is built to work **without internet**. Everything you capture is saved on the phone first and waits there until you send it. New farmers, contracts and decisions of the office reach the phone only when you download them.

The top of the Sync screen.

Part	What it does
The counter	How many records are waiting to send, for example <i>1 Record waiting to send</i> , with the kind of record underneath. <i>Nothing waiting to send</i> means the office has everything.
Sync now	Sends the records waiting on this phone to the office. Use it whenever you have internet, and always at the end of the day.
Save backup	Saves the records that are still waiting as a file on the phone. Use it if support asks you to, or before a phone is repaired.
History	What was sent, and anything the office could not accept.
Quick download	Gets what changed since the last download: new and changed farmers, contracts, cycles, settings and the office's decisions.
Full download	Replaces all the data on the phone with a fresh copy. Records waiting to send are kept. Use it only when something is missing after a Quick download.
Ask to download updates	How often (in hours) the app asks to download while online.

Further down, **This device** shows the **Offline face license** (**Active**, or **Fetch** to get it with internet), the app version with **Check for updates**, the **Appearance** (dark, light or the phone's own setting), the camera zoom and **Report a problem**, which sends the app's error log to support. **Sync tools** are for support.

Every working day

- 1 Morning, with internet:** tap **Quick download**.
- 2 During the day:** work as normal, with or without internet.
- 3 Evening, with internet:** tap **Sync now** and wait until the counter says *Nothing waiting to send*.

CHAPTER 4

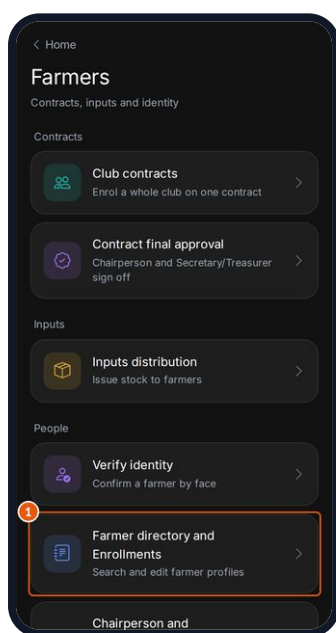

Set up a farmer

Before a farmer can sign a contract or receive inputs, the phone must be able to recognise him. You take his photo, map his face, and he signs to agree. This is called **enrolling** the farmer.

Before you start

- The farmer must already be on the system. Farmers are added and corrected by the office on the web system; the phone cannot add farmers or change their details. If a farmer is missing or a detail is wrong, ask the office, then tap **Quick download**.
- Mapping the face needs the Android app with the company's face licence on the phone: on the Sync screen, **Offline face license** shows **Active**. If not, tap **Fetch** there while you have internet.
- Choose a place with good light. The farmer should take off his hat and look straight at the camera.

Find the farmer

Farmers page: Farmer directory and Enrollments.

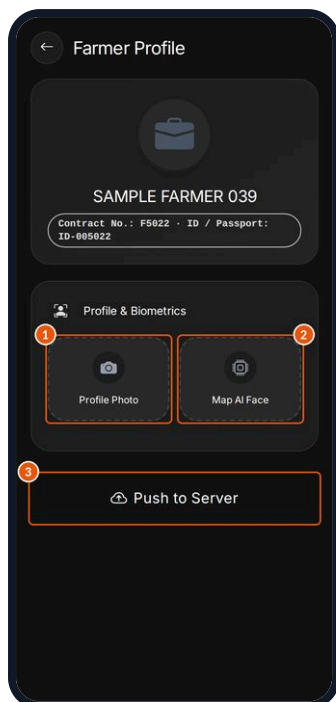

The farmer directory.

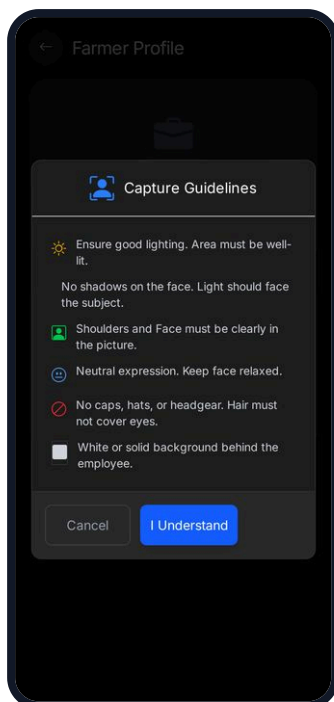

- 1 On the **Farmers** page, tap **Farmer directory and Enrollments**.
- 2 Type part of the farmer's name, contract number or ID in the search box (1 on the second picture). The list filters as you type.
- 3 Tap the farmer to open his profile.

The tabs **All**, **Enrolled** and **Not enrolled** show how many farmers are done. Farmers who are not enrolled have a red border and a **NEEDS PHOTO** badge, and are listed first; enrolled farmers show **ENROLLED**. The line above the list says which locations your farmers come from.

Take the profile photo

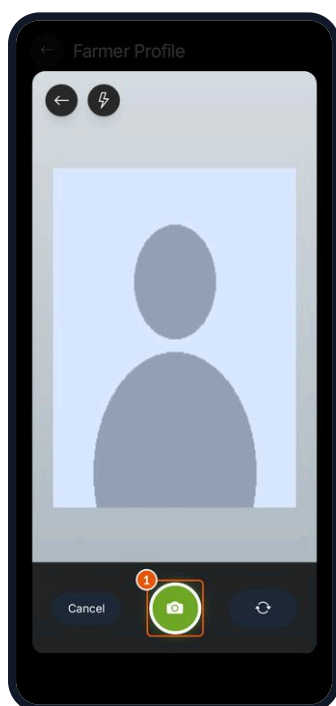

The farmer profile.

Capture Guidelines.

- 1 On the farmer profile, check the name and numbers at the top: it must be the farmer in front of you.
- 2 Tap **Profile Photo** (1). The **Capture Guidelines** show: good light, shoulders and face in the picture, no hat or cap, a plain background. Tap **I Understand**.
- 3 The camera opens. Frame the farmer's head and shoulders and tap the round green button. The flip button switches between the back and front camera; the arrow at the top left closes the camera.

The camera.

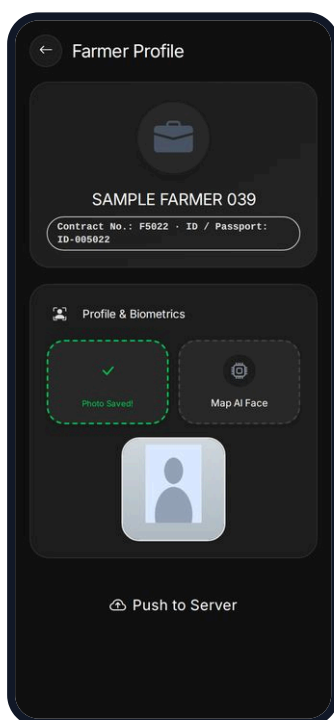

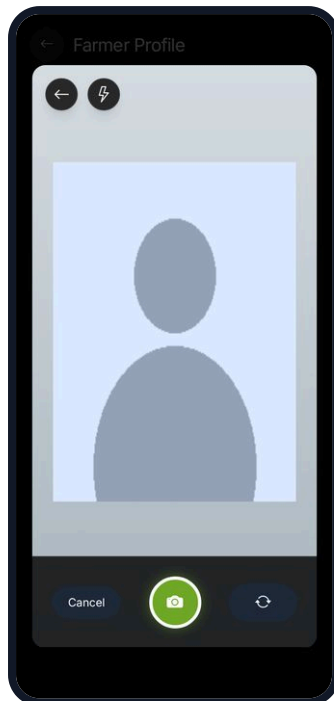

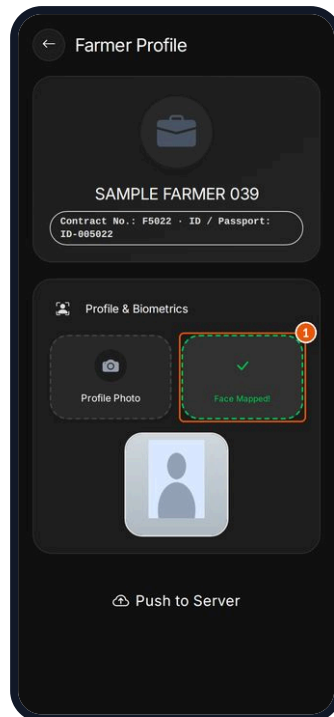

Photo Saved.

The button now says **Photo Saved!** and the photo shows underneath. To take it again, tap **Profile Photo** again.

Map the face

Map AI Face: the camera.

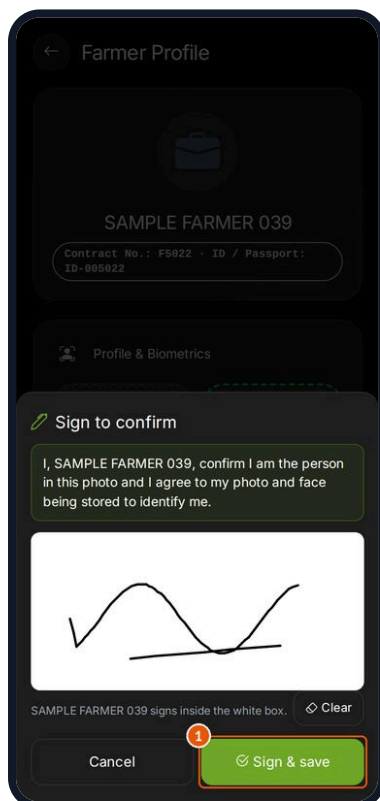

Face Mapped.

- 1 Tap **Map AI Face** (2 on the profile picture).
- 2 Ask the farmer to look straight at the camera, and tap the round green button.
- 3 The phone works out the face. When it is done it says **Face Mapped Successfully!** and the button turns green (1).

If it says **Face Analysis Failed**, try again with better light and the farmer looking straight at the camera. If it says no offline licence is saved on the device, fetch it on the Sync screen (**Offline face license › Fetch**) while you have internet, then try again.

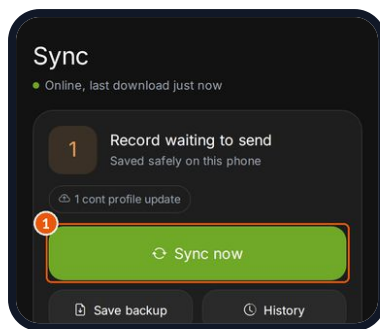

The farmer signs, and you save

Sign to confirm.

- 1 Tap **Push to Server** (3 on the profile picture).
- 2 **Sign to confirm** opens with a statement in the farmer's name: he confirms he is the person in the photo and agrees that his photo and face are kept to identify him. Read it to him if needed.
- 3 The farmer signs with his finger inside the white box. **Clear** starts again.
- 4 Tap **Sign & save** (1). The app says **Farmer Profile successfully enrolled offline!**

The signature is required: if you cancel, nothing is saved and you start again.

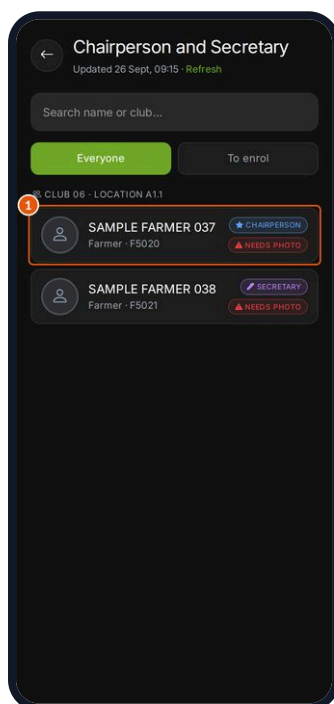

The enrolment waiting to send.

Push to Server saves on the phone

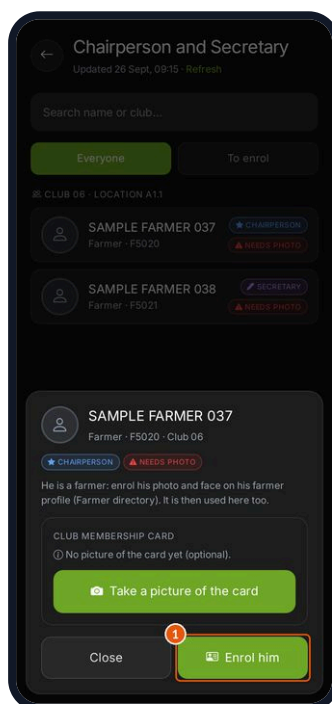

Despite its name, **Push to Server** saves the enrolment on the phone only. The phone can use the face straight away, but the office receives it when you tap **Sync now** on the Sync screen **1**. The counter shows it as *cont profile update* until then.

The club's Chairperson and Secretary

Every club has a **Chairperson** and a **Secretary**. They approve the club contract at the end (Chapter 6), so they must be enrolled too. The office records who they are on the web system.

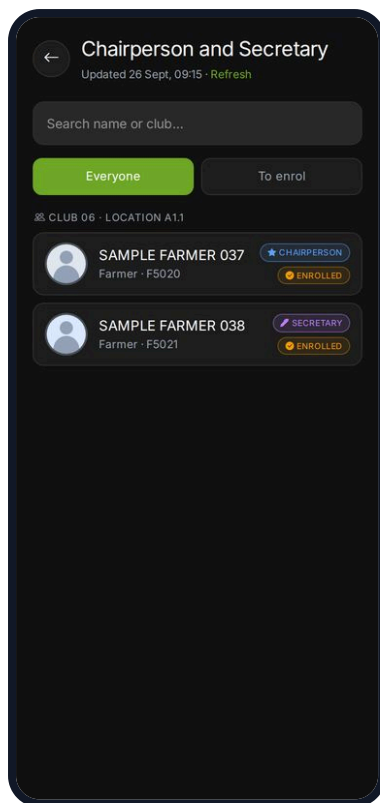

Chairperson and Secretary: two still to enrol.

An office bearer who is a farmer.

- 1 On the **Farmers** page, tap **Chairperson and Secretary**. The office bearers of your clubs are listed by club. **To enrol** shows only the ones still to do.
- 2 Tap a person (**1** on the first picture).
- 3 **If he is a farmer** (as in the pictures), his farmer profile is used: tap **Enrol him** (**1** on the second picture) and enrol him as above.
- 4 **If the person is not a farmer**, a screen with his name opens. Tap **Enrol photo and face**: one picture saves both his photo and his face. Then tap **Send now** while you have internet, or it goes with your next **Quick download**.

Both office bearers enrolled.

When an office bearer is enrolled, the list shows **ENROLLED**.

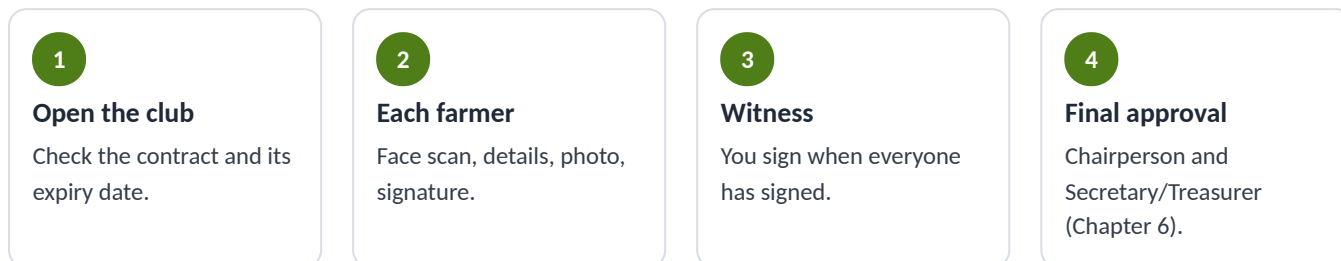

Club membership card. The sheet of an office bearer may also offer **Take a picture of the card**, for the club membership card. It is optional, and can also be done at the final approval (Chapter 6).

If nobody is listed for a club, the office has not recorded its Chairperson and Secretary yet. Ask them to, then tap **Refresh** at the top of the screen.

CHAPTER 5

Sign the club contract

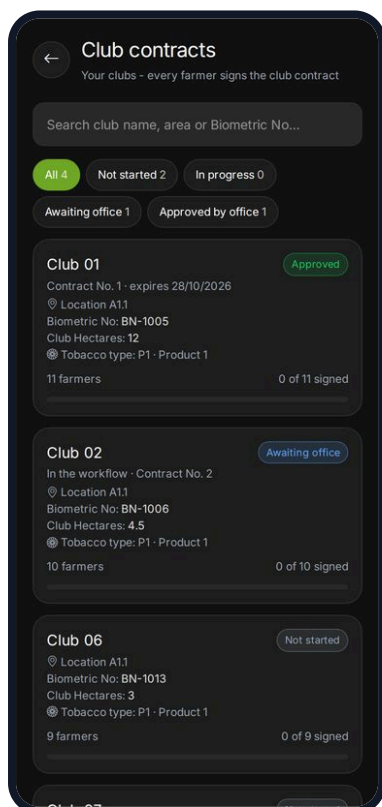

A club contract covers all the farmers of one club. You open the club, choose the contract once, and every farmer confirms who he is and signs, one after the other. Then you sign as witness.

Before you start

- Enrol the farmers and the office bearers first (Chapter 4), so the face scan recognises them.
- Check with the office that the farmers' details are right. A wrong detail must be corrected on the web, then downloaded, **before** that farmer signs.
- All the signing is saved on this phone. Nothing goes to the office until the contract is sent at the end of Chapter 6. Use the same phone for the whole club.

Open the club

Club contracts: your clubs.

- 1 On the **Farmers** page, tap **Club contracts**. Your clubs are listed with their location, the club's location fields, the number of farmers and how many have signed.
- 2 Tap the club. Use the search box or the tabs to find it quickly.

Status	Meaning
Not started	No club contract yet, or the last one ended.
In progress	Being signed or approved on this phone. The line underneath says which step.
Awaiting office	Sent, and waiting in the office's approval workflow.
Approved	The office approved it. The line shows the contract number and when it expires.
Rejected	The office rejected it. The club must sign a new contract.

A club that has not started.

- 1 **Contract:** the contract the club signs. The app chooses it for you when there is only one, or the office's default contract; you can choose another before anyone signs.
- 2 **Contract expires on:** filled in with the contract's standard period. Change it if the office tells you to. It is required, and no inputs can be issued against the contract after this date. If your company uses season dates, **Contract dates** shows the season and its dates instead, and they cannot be changed here.
- 3 **Read contract:** opens the contract (next section).
- 4 **Start signing:** opens the first farmer who has not signed.

At the top are the club's details. **Inputs this club gets** shows what the whole club receives in the running cycle, worked out from each farmer's hectares; **See per farmer** shows it farmer by farmer.

Once a farmer has signed, the contract and the date are **locked**.

Read the contract with the club

Read Contract.

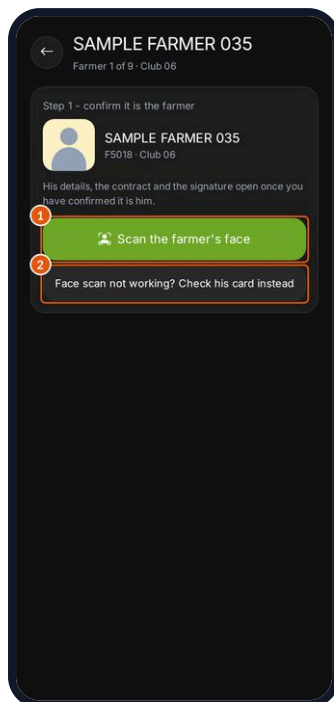

Read contract shows the contract on the phone, with the club's details in their places when the office has mapped them. Use -, + and **Fit** at the top, or two fingers, to zoom.

Go through it with the farmers before the first one signs. Tap **Close & Continue to Signing** when you are done.

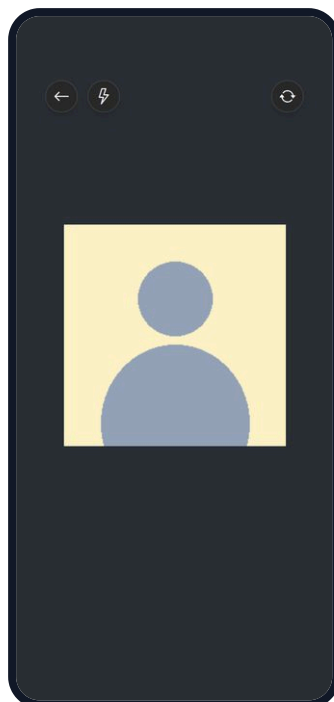

The contract is kept on the phone after a download, so it also opens without internet.

Each farmer confirms who he is and signs

Step 1: confirm it is the farmer

Step 1 - confirm it is the farmer.

The face scanner.

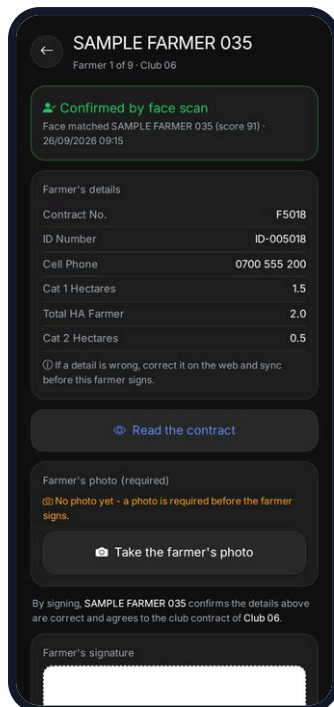

- 1 The screen shows the farmer's name, photo and club. His details and the signature stay hidden until he is confirmed.
- 2 Tap **Scan the farmer's face** (1). The scanner opens.
- 3 Point the phone at the farmer's face. When the face matches, the scanner closes by itself and the screen shows **Confirmed by face scan**.

If the face belongs to someone else, the phone says whose face it is: only the farmer himself can sign. If the farmer has no face enrolled yet, the screen offers **Enrol his face now**: one picture saves his photo and face and confirms him.

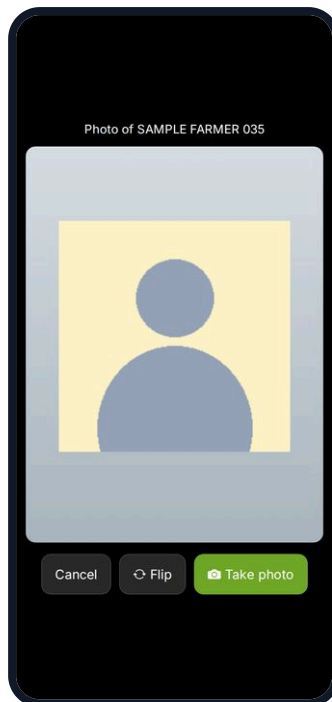

Card check: outside procedure

Only when the face scan really cannot be used, tap **Face scan not working? Check his card instead** (2). The phone warns that this is outside procedure. Choose why the face scan was not used, type what you checked (for example the card or ID number) and tap **I checked - it is name**. The card check is logged with your name and the reason, and shown to the office.

Step 2: details, photo and signature

Confirmed: the farmer's details.

The farmer's photo.

- 4 Check the **Farmer's details** with him. If a detail is wrong, he does not sign: the office corrects it on the web and you download before he signs.
- 5 **Read the contract** opens the contract again if he wants to read it.
- 6 Tap **Take the farmer's photo**. The camera opens; tap **Take photo**. A photo is required with every signature.

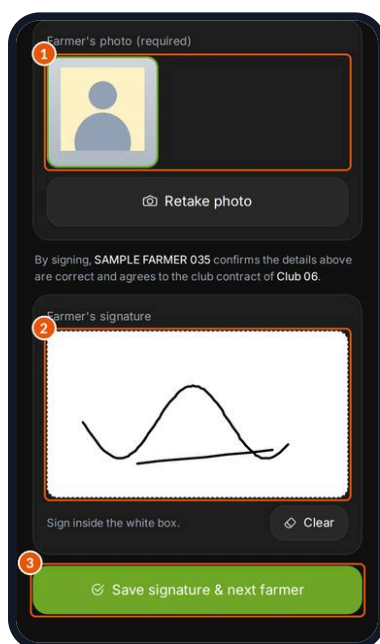

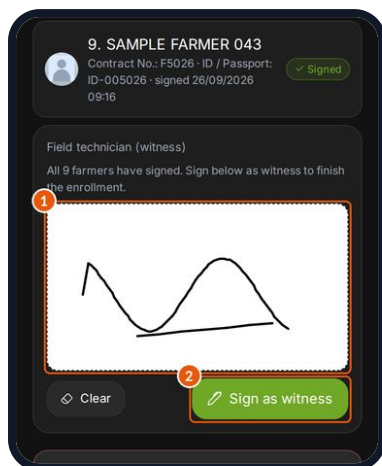

Photo and signature, ready to save.

- 7 The photo shows in the photo box (1). **Retake photo** takes it again.
- 8 The farmer signs inside the white box with his finger (2). By signing he confirms his details and agrees to the club contract. **Clear** starts the signature again.
- 9 Tap **Save signature & next farmer** (3). The next farmer who has not signed opens, at Step 1.

Repeat for every farmer. The top of the screen says *Farmer 2 of 9* and so on. You can stop at any time: the club keeps what was signed, and **Continue with the next farmer** takes you on later.

Sign as witness, and the biometric check

All farmers signed: the witness signs.

When every farmer has signed, the club screen shows **Field technician (witness)** under the list of farmers.

- 1 Sign inside the white box (1).
- 2 Tap **Sign as witness** (2).

A club with one farmer

If your company switched on its own witness for one-farmer clubs, the screen asks for a **Witness** instead: type the witness's name and surname, the witness signs, and you tap **Witness signs**.

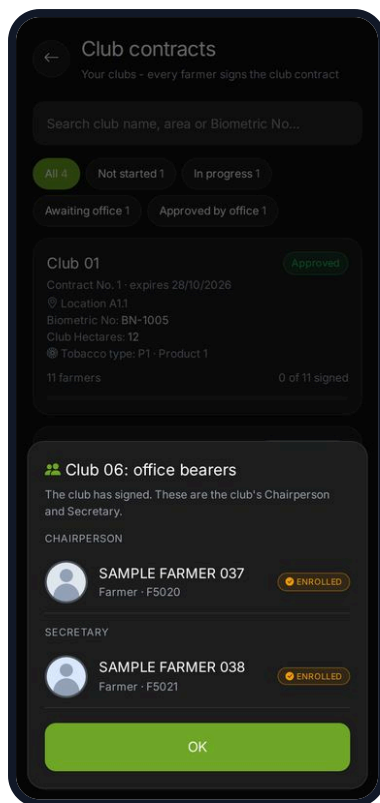

Witness signed, biometric check done.

Under the witness's signature the club now says what happens next.

Biometric check. When your company requires it, every farmer must have been confirmed by a face scan before the contract can be sent. Farmers who were confirmed by a face scan when they signed are already done, as in the picture. For a farmer who was confirmed by a card check, the check offers a face scan now; if it really cannot be done, you can skip him with a reason, which is shown to the office.

- 3 Tap **Done** (1).

The club's office bearers.

After **Done**, the phone shows who the club's **Chairperson** and **Secretary** are, and whether they are enrolled. Tap **OK**. They approve the contract next, in **Contract final approval** (Chapter 6). The club shows **In progress** with *Waiting for the Chairperson and Secretary/Treasurer*.

Automatic approval

If your company switched on automatic approval, a club whose Chairperson and Secretary signed as farmers of the club may be approved with those signatures and sent straight away. It then does not appear in Contract final approval.

Fix a mistake

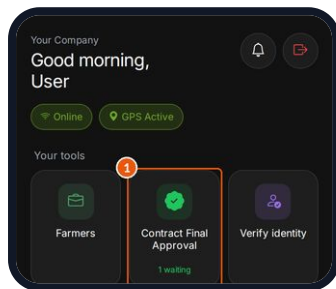

Situation	What to do
A farmer must sign again	Tap the farmer in the club's list, tap Confirm it is the farmer to sign again , confirm him and sign again. If the witness had signed, the witness signs again too.
A farmer's details are wrong	Ask the office to correct them on the web, tap Quick download , then let him sign again.
The wrong contract or date was chosen	Reset club (remove all signatures) at the bottom of the club screen removes every signature on this phone, so the club can start again. Use it only when you must.
The club was sent back to you	If the Chairperson or Secretary/Treasurer sent it back (Chapter 6), a red card on the club says who sent it back and why. Fix what is needed, then sign as witness again.

CHAPTER 6

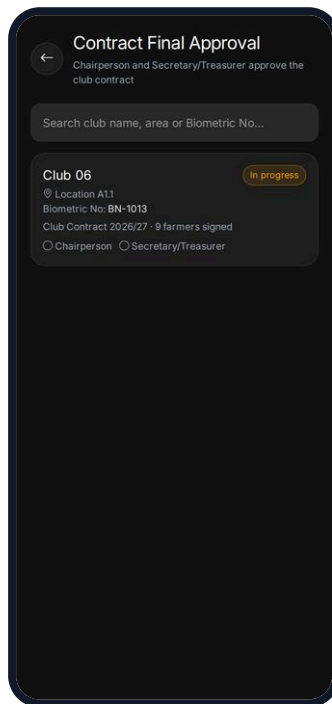

Contract final approval

After the farmers and the witness have signed, the club's **Chairperson** and **Secretary/Treasurer** approve the contract on your phone. Each is confirmed by face, signs and writes their initials. Then you send the contract to the office.

Open the club

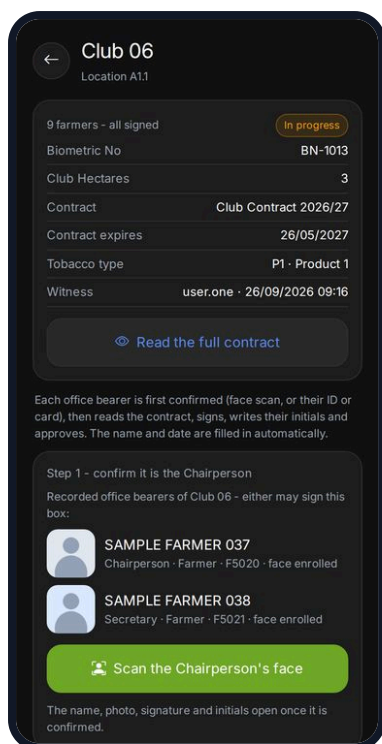

Home: 1 club waiting.

Contract Final Approval.

- 1 On **Home**, tap **Contract Final Approval** (1), or on the **Farmers** page tap **Contract final approval**. The tile shows how many clubs are waiting.
- 2 The list shows the clubs waiting for approval on this phone, with the contract, the number of farmers who signed, and which office bearer has approved (a circle turns into a tick).
- 3 Tap the club.

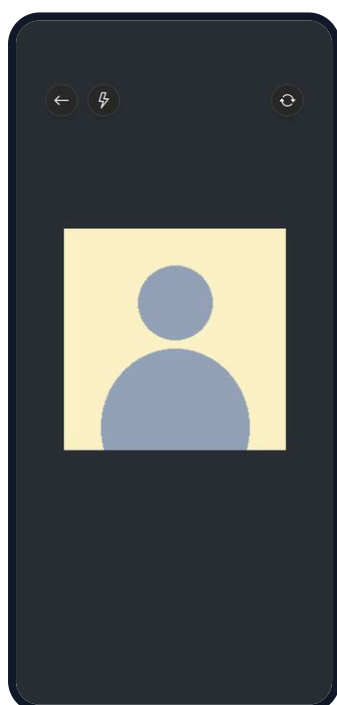

The club: details and the Chairperson's box.

The top card sums up the contract: the club's details, the contract, when it expires and who witnessed it. **Read the full contract** opens it for the office bearers to read.

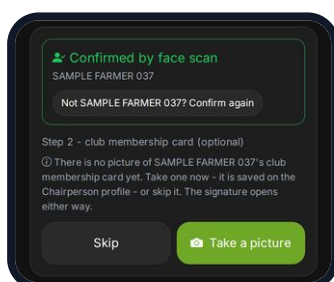

Below are two boxes: one for the **Chairperson** and one for the **Secretary/Treasurer**. Each box lists the office bearers the office recorded for the club. Either of them may sign either box.

If a box says nobody is recorded for the club, nobody can approve it yet: the office must record the club's Chairperson and Secretary on the web system, and you download again.

The Chairperson is confirmed

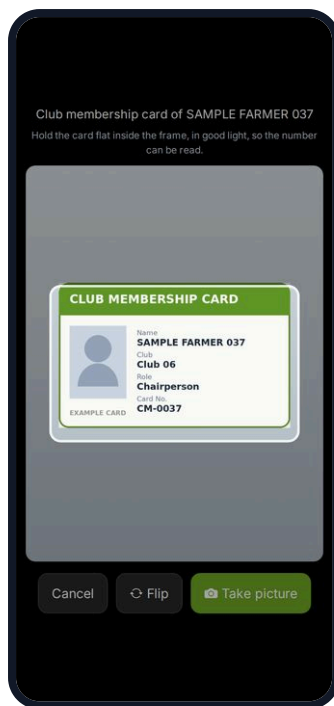

The face scanner.

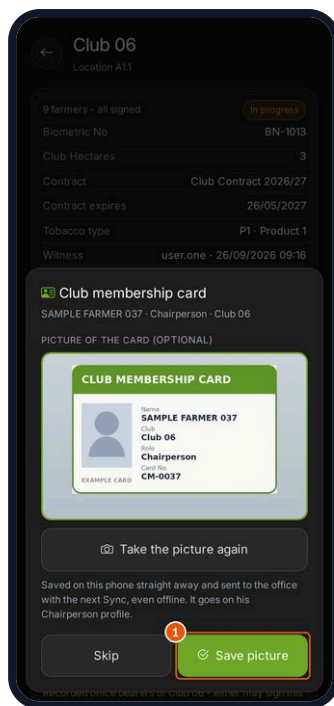

Confirmed, and the club membership card.

- 1 In the Chairperson's box, tap **Scan the Chairperson's face** and point the phone at the Chairperson's face. When it matches, the box shows **Confirmed by face scan** with the name.
- 2 **Club membership card** (optional): if there is no picture of the person's card yet, the box offers **Take a picture** (1) or **Skip** (2).

If the person has no face enrolled, the box offers to enrol it now. If the face scan cannot be used, a card check is possible; as in Chapter 5, it is **outside procedure**, needs a reason and is shown to the office.

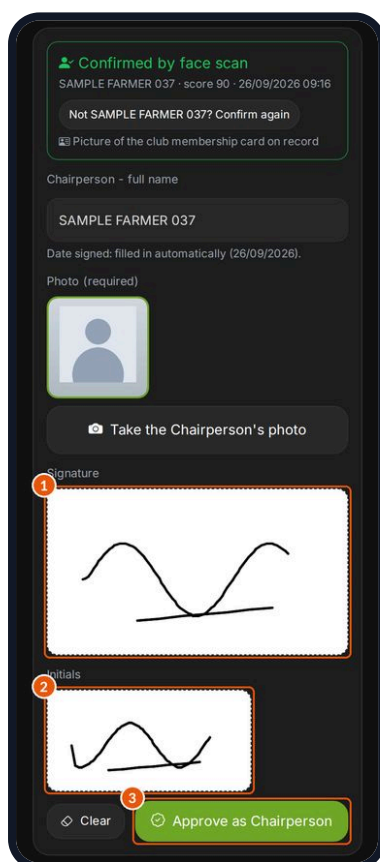

The card in the frame.

Save picture.

- 3 To take the card picture: tap **Take a picture of the card**, hold the card flat inside the frame in good light so the number can be read, and tap **Take picture**.
- 4 Check the picture and tap **Save picture** (1). It is saved on the phone straight away and goes to the person's profile at the office with your next **Quick download**.

Sign and approve

The Chairperson signs and writes initials.

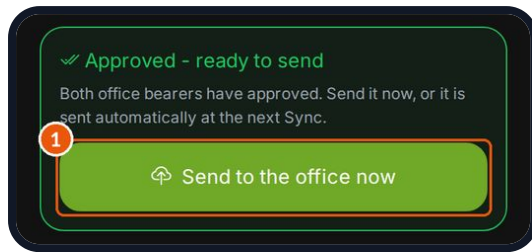

The rest of the box opens. The name is filled in from the face scan and the date is filled in automatically.

- 1 Tap **Take the Chairperson's photo** and take the photo. It is required.
- 2 The Chairperson signs in the **Signature** box (1).
- 3 The Chairperson writes their initials in the **Initials** box (2). **Clear** empties both boxes.
- 4 Tap **Approve as Chairperson** (3). The box turns green: **Chairperson approved**.
- 5 Do the same in the **Secretary/Treasurer** box: face scan, card (optional), photo, signature, initials, **Approve as Secretary/Treasurer**.

Undo on a green box removes that approval, for example when the wrong person signed.

When one person is recorded as both Chairperson and Secretary, they sign once and that signing fills both boxes.

Send to the office

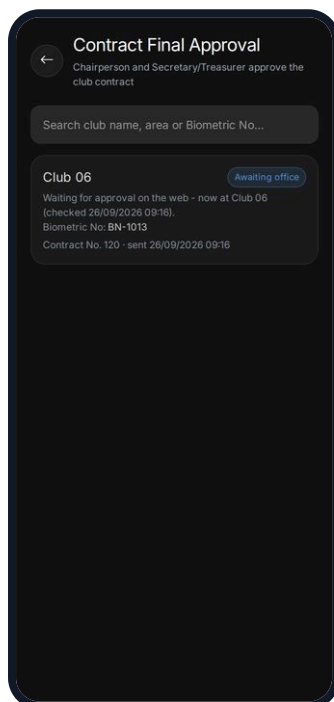

Approved - ready to send.

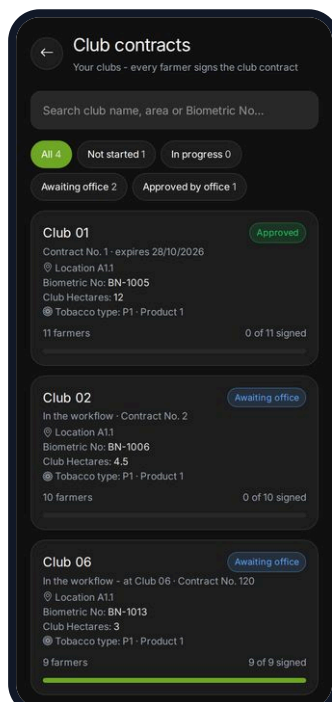

When both have approved, the club shows **Approved - ready to send** at the bottom of the screen.

- 1 Make sure the phone has internet.
- 2 Tap **Send to the office now** (1).
- 3 The phone says **Sent to the office** with the contract number.

Without internet the contract waits on the phone and is sent with your next **Quick download** while online.

Sent: waiting for approval at the office.

Club contracts: Club 06 is Awaiting office.

The contract now goes through your company's approval workflow on the web system (web manual, Chapter 5). **Club contracts** shows the club as **Awaiting office**, with the step it is waiting at. After the office has approved it and you have done a **Quick download**, the club shows **Approved** and its farmers can receive inputs (Chapter 7).

Something wrong?

If the Chairperson or Secretary/Treasurer finds a mistake, do not approve. At the bottom of the club screen, type what must be fixed in **Something wrong?** and tap **Send back to the field technician**. The club goes back to Club contracts with the note (Chapter 5, Fix a mistake).

CHAPTER 7

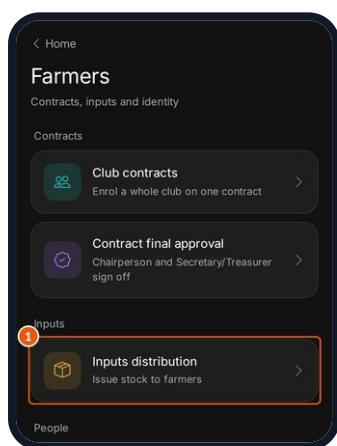

Issue inputs

When a farmer's contract is approved and a distribution cycle is running, you can issue his inputs. You open the farmer by scanning his face, choose a category, and capture photos and signatures as evidence.

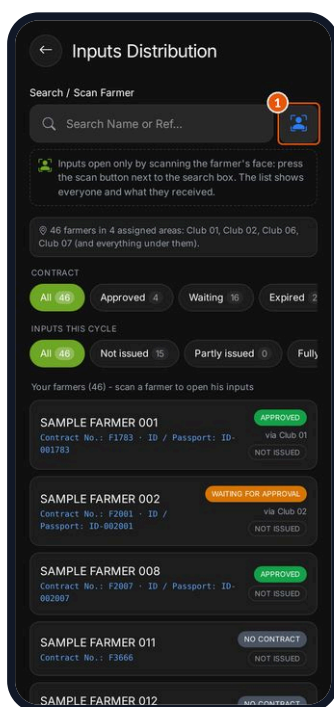

Before you start

- The farmer's contract (his club's contract or his own) must be **approved by the office** and not expired, and a cycle must be running.
- His face must be enrolled (Chapter 4).
- Tap **Quick download** that morning, so the phone knows what was already issued, also by other phones.
- How much he gets is worked out for you from the cycle's quantities and his hectares per category. You cannot type other amounts.

Open the farmer with a face scan

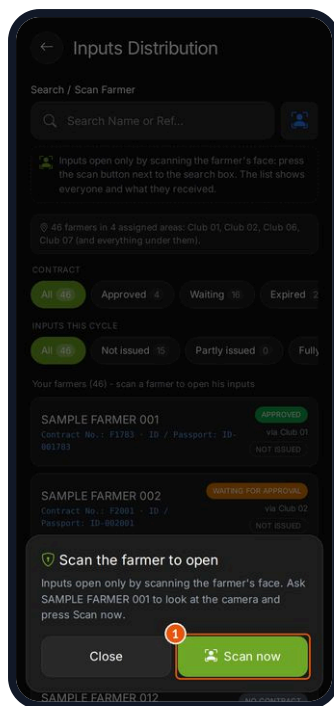

Farmers page: Inputs distribution.

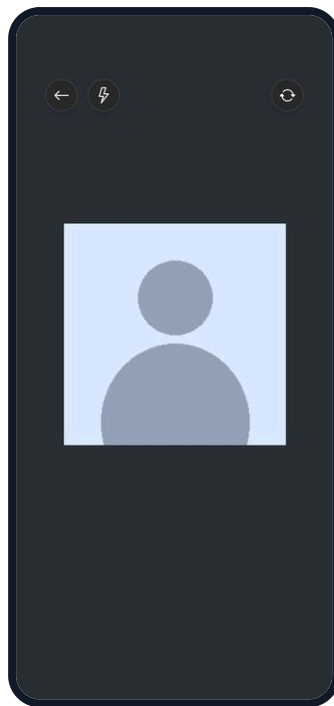

Inputs Distribution: your farmers.

- 1 On the **Farmers** page, tap **Inputs distribution**.
- 2 The list shows all your farmers, with the state of their contract (for example **APPROVED** via Club 01, **WAITING FOR APPROVAL**, **NO CONTRACT**) and what they received this cycle. Use the tabs under **CONTRACT** and **INPUTS THIS CYCLE** to filter, for example **Approved** and **Not issued**.
- 3 Tap the **scan button** next to the search box (1 on the second picture) and point the phone at the farmer's face.

Tapping a farmer: Scan the farmer to open.

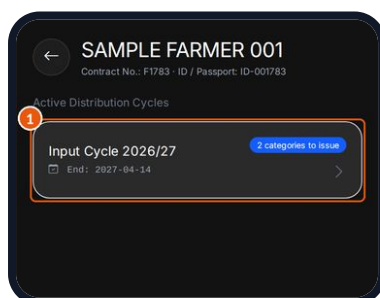

The face scanner.

Inputs open **only by scanning the farmer's face**, so every issue is recorded as a face scan. Tapping a farmer in the list shows **Scan the farmer to open** with a **Scan now** button (1). A farmer with no face enrolled cannot be opened: enrol him first. (Your company can switch this rule off in the web system; then tapping a farmer opens him.)

Check the name

The phone opens the farmer whose face it recognises. Always check the name at the top of the next screen before you issue anything.

Choose the cycle and the category

The farmer's cycles.

- 1 The farmer's running cycles are listed, with the end date and how many categories are still to issue. Tap the cycle (1).

Inputs by category.

The category screen shows:

- the **contract** he is covered by, its tobacco type and when it expires;
- FARMER'S HECTARES** in each category (Cat 1 to Cat 4) and in total;
- one card per category, with each item, how it is worked out (for example $50 \times 2 \text{ ha}$ (Cat 1)), the quantity, and the value.

- Tap **Issue Cat 1 - full amount** (1) for the category the farmer collects now.

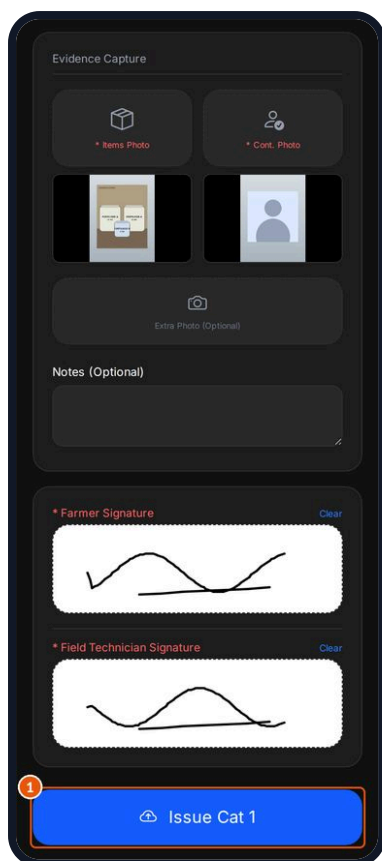

A category is issued in full, then it is **locked** for the cycle. **Other items for this cycle (not by category)** opens the cycle's other items.

Capture the issue

The issue screen: items and evidence.

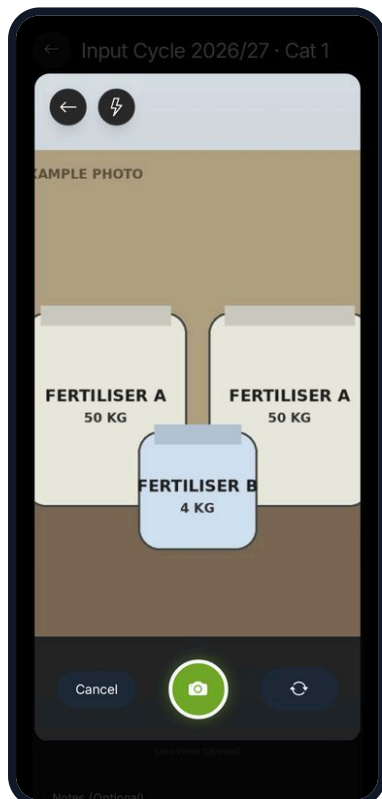

- Quantity** of each item: the full amount, which cannot be changed (unless your company allows less, below).
- Warehouse** the item comes from. When only one warehouse is linked to the farmer's club, it is already chosen. When there are several, choose the one you issue from. When none is linked, the office assigns it later.
- * **Items Photo**: a photo of the inputs being handed over.
- * **Cont. Photo**: a photo of the farmer receiving them.

Target Contract at the top is the contract the issue is recorded against. **Running Total Value** shows the value of what you issue. A star (*) means required.

Evidence and signatures, ready to issue.

- 1 Tap * **Items Photo** and take the photo with the round green button. Do the same for * **Cont. Photo**. Each photo shows under its button.
- 2 If needed, add an **Extra Photo (Optional)** and **Notes (Optional)**.
- 3 The farmer signs in * **Farmer Signature**. You sign in * **Field Technician Signature**. **Clear** starts a signature again.
- 4 Tap **Issue Cat 1** (1). The phone says **Inputs Distribution logged securely offline!** and goes back to the Farmers page.

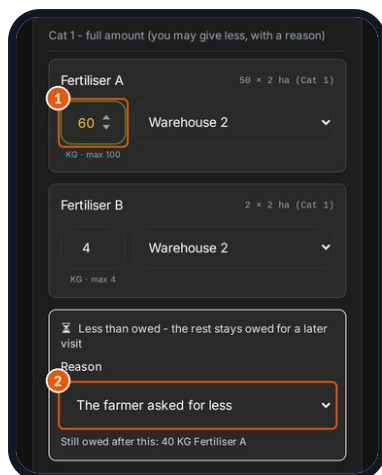

Taking the items photo.

Good evidence photos

- Items photo: all the bags or packs in the picture, with their labels readable.
- Farmer photo: the farmer's face clearly visible, with the inputs if possible.
- Hold the phone still and use the flash button in poor light.

When the farmer gets less than his full amount

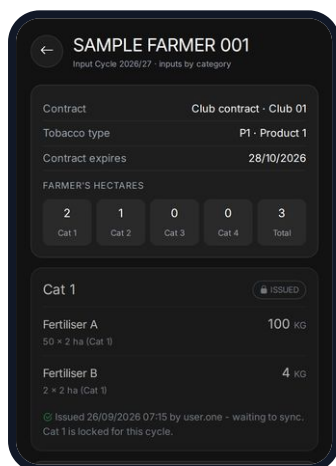

Less than owed, with the reason.

Only if your company allows partial issues. The category then says *you may give less, with a reason*, and the quantity can be lowered (never above the amount owed).

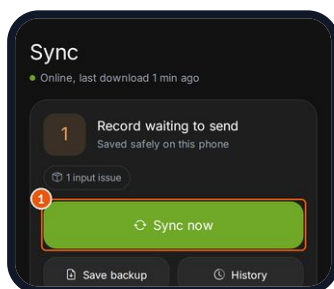

- 1 Type the quantity he takes (1).
- 2 A box **Less than owed - the rest stays owed for a later visit** appears. Choose the reason (2). With *Other*, explain in the box underneath.
- 3 Capture the evidence and issue as usual.

The line **Still owed after this** shows what he can collect later. The category stays open until nothing is owed.

After the issue: send it

Cat 1 issued and locked.

1 input issue waiting to send.

When you open the farmer again, the category shows **ISSUED** with who issued it and when, *waiting to sync*, and that it is locked for this cycle. The other categories can still be issued.

- 1 Go to **Sync**. The counter shows the issue waiting to send (1 input issue).
- 2 Tap **Sync now** (1) while you have internet, and wait until it says *Nothing waiting to send*.

The office then sees the issue on the web system, where it goes through your company's approval workflow (web manual, Chapter 5).

Issued by another phone first

If another phone issued the same category before your issue reached the office, the office refuses yours. The category screen then shows the refused issue with a button to remove it from your phone.

CHAPTER 8

Quick reference

Checklists for the day and for a new phone, the messages you may see and what to do about them, and the words used in this manual.

Checklists

Setting up a new phone

- ☐ The user has **App** access (Settings › User Access).
- ☐ App installed (profile menu › Download the App).
- ☐ Phone connected (Connect a Phone QR), or skip this and use a login QR.
- ☐ Logged in with a **One use** login QR.
- ☐ First download finished: *All done*.
- ☐ Phone named.
- ☐ Sync › **Offline face license** shows **Active**.

Every working day

- ☐ Morning, with internet: **Quick download**.
- ☐ Check the Farmers page badges: office bearers to enrol, contracts to approve.
- ☐ Work with or without internet.
- ☐ Evening, with internet: **Sync now** until *Nothing waiting to send*.
- ☐ Then a **Quick download**, to send approved club contracts and read the office's decisions.

A club from start to inputs

- 1 Enrol every farmer and both office bearers (Chapter 4).
- 2 Club contracts: check the contract and date, read it with the club, every farmer is confirmed by face and signs, you sign as witness, **Done** (Chapter 5).
- 3 Contract final approval: the Chairperson and Secretary/Treasurer approve, **Send to the office now** (Chapter 6).
- 4 The office approves on the web. You do a **Quick download**: the club shows **Approved**.
- 5 Inputs distribution: face scan, category, evidence, **Issue**, then **Sync now** (Chapter 7).

Messages and what to do

Connecting and logging in

Message	What to do
Please open settings (gear icon) and enter your Server URL and License Key...	The phone is not connected yet. Do Chapter 1, or log in with a login QR.
This QR code does not contain a valid server address.	You scanned another code. Scan the Connect a Phone QR from the web system.
This is not a login QR code.	Scan the login QR made for you in Settings › User Access , not another code.
This phone cannot read QR codes from the camera.	Type the licence key and the server address in System Configuration (Chapter 1).
This phone still has ... record(s) that have not synced to ...	The phone was connected to another server. Sync those records first (or Save backup), then connect again.
You must be online to log in for the first time.	Connect to the internet (mobile data or Wi-Fi) and try again.
<i>On the web:</i> This user has no App access. A login QR cannot be made.	Give the user App access first (edit the user), then make the login QR.

Enrolling

Message	What to do
Cannot enroll face: No offline AI license saved on this device...	On the Sync screen, tap Fetch next to Offline face license while online.
Facial enrollment requires the compiled Android app with an active tenant license.	Faces can only be mapped in the Android app, with face scanning switched on for your company. Ask your administrator.
Face Analysis Failed...	Better light, no hat, the farmer looking straight at the camera. Try again.
Not saved - the farmer must sign to confirm the enrolment.	The signature was cancelled. Tap Push to Server again and let the farmer sign.

Club contracts and approval

Message	What to do
Choose the contract for this club first. / Choose the contract expiry date first (Contract card).	On the club screen, choose the contract and the expiry date before anyone signs.
No imported PDF contract templates on this phone.	Tap Quick download while online. If it stays, the office has not set up the club contract yet.
This contract PDF is not on this device yet...	Tap Quick download while online; after that it also opens offline.
This face is ..., not ...	Someone else was scanned. Only the farmer himself can sign; scan him again.
The farmer must sign inside the white box first.	Let the farmer sign in the white box, then save.
No Chairperson or Secretary is recorded for ... (Contract final approval)	Ask the office to record the club's office bearers, then Quick download .
This club is no longer waiting for final approval...	Farmers or the witness changed after the club was finished. Open it in Club contracts and complete it again.

Inputs

Message	What to do
... has no face enrolled yet. Enrol his photo and face on his profile first...	Enrol the farmer (Chapter 4), then scan him.
Farmer allocations not found. Please sync.	Tap Quick download while online, then scan the farmer again.
No active cycles.	No cycle is running for this farmer. Ask the office.
Scanner Locked: No offline facial license found.	Fetch the face licence on the Sync screen while online.

Words used

Word	Meaning
App access	The right of a user to log in on the mobile app, set on the user in the web system.
Category (Cat 1 to Cat 4)	A group of a cycle's inputs. A farmer gets a category's inputs according to his hectares in that category.
Club	A location at the lowest level of your company's hierarchy. Its farmers sign one club contract together.
Connect a Phone QR	The code on the web system that connects a phone to your company's system.
Cycle	A distribution period with its own items and quantities, set up by the office.

Word	Meaning
Enrol	Saving a person's photo and face on the system (with his signature), so the phone can recognise him.
Face scan	Confirming who a person is with the phone's face scanner, against his enrolled face.
Login QR	A code made for one user, to log in without a password. One use or Stays active .
Office bearers	The club's Chairperson and Secretary/Treasurer, who approve the club contract.
Outside procedure	A card or ID check instead of the face scan. Allowed only with a reason, logged with your name and shown to the office.
Quick download	Gets what changed at the office since the last download.
Sync now	Sends the records waiting on the phone to the office.
Witness	The person who signs after all the farmers of a club have signed: normally you, the field technician.
