

Farmers & Distribution

How to set up and run the module on the web: farmers, contracts, approvals, stock and distribution, progress and reports.

About this manual

This manual explains the **Farmers & Distribution** module of the web system from start to finish. It covers every screen: setting the module up, keeping farmer records, assigning and approving contracts, receiving and issuing stock, and following progress. It is written for everyone who works in the web system, whatever their job.

The chapters follow the order in which the work is normally done. Read Chapter 1 first. After that, read the chapters for the work you do, or read the whole manual to learn the whole module.

Chapter	What it covers
1 • Getting started	The screen layout, finding screens, and the controls every screen shares.
2 • Setting up	Hierarchy levels, locations, managers, settings and the approval workflow.
3 • Farmers	Farmer records, imports and exports, and club Chairpersons and Secretaries.
4 • Contracts	Assigning, changing and ending contracts, club contracts and contract templates.
5 • Approvals	The Inbox: approving and rejecting contracts, issues and returns.
6 • Distribution	Warehouses, stock items, cycles, receiving stock, issues from the phone and stock levels.
7 • Monitoring	Dashboard, Progress, Reports, Internal Broadcasts and the Audit Log.
8 • Reference	Statuses, rules to remember, Excel files and words used.

How to read it

- Words in **bold** are buttons, tabs, fields and messages exactly as they appear on the screen.
- A path such as **Distribution Master** › **Warehouses** means: open **Distribution Master** in the menu, then click the **Warehouses** tab.
- Numbers in orange circles on a picture match the numbered list under it.
- **Levels are written L1, L2, L3 and L4.** L1 is the top of your hierarchy and the highest number is the lowest level. Your company gives each level its own name. The example data in this manual calls them Level 1 to Level 4.
- **Club** means a location at the lowest level of your hierarchy (L4 in the examples). The screens use this word too, for example for club contracts and club warehouses.
- What you see depends on the rights your administrator gave you. If a screen or button in this manual is missing on your screen, you do not have access to it (Chapter 1).

About the pictures

The pictures come from a test copy of the system filled with example data: *Sample Farmer 001, Location A1.1, Club 01, Warehouse 2, Fertiliser A* and so on. None of it is real. Your company logo appears where the pictures show **YOUR LOGO**. Colours can differ slightly from your screen.

CHAPTER 1

Getting started

What the module does, how the screen is laid out, and the controls that work the same way on every screen.

What the module does

Farmers & Distribution keeps the records of your farmers, the contracts they sign and the inputs they receive. The field staff capture contracts and issues on the mobile app. The web system is where everything is set up, checked, approved and followed up. The work moves through six stages:

1**Set up**

Hierarchy levels, locations, managers, settings and approval rules.

CHAPTER 2**2****Farmers**

Farmer records, imported from Excel or added one by one, and club Chairpersons and Secretaries.

CHAPTER 3**3****Contracts**

Contracts are captured on the phone or assigned on the web, from your contract templates.

CHAPTER 4**4****Approvals**

Contracts, issues and returns move up the hierarchy. Each level approves them in its Inbox.

CHAPTER 5**5****Distribution**

Stock is received into warehouses, issued to farmers on the phone and leaves the warehouse when the issue is approved.

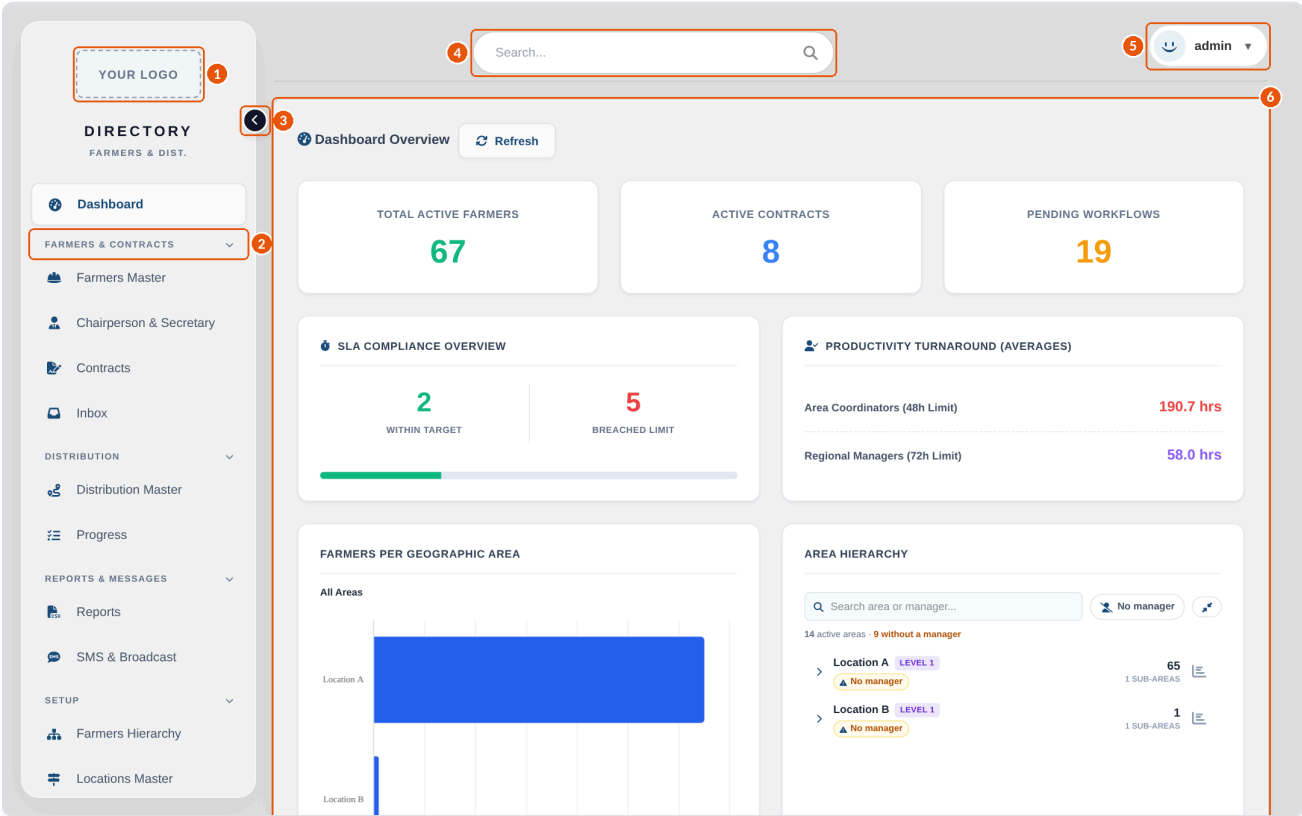

CHAPTER 6**6****Monitoring**

Dashboard, Progress, Reports, broadcasts to users and the Audit Log.

CHAPTER 7

The screen

Open the module from the Launchpad. Every screen has the same layout.

The Dashboard, the first screen after opening the module.

- 1 **Your company logo.** Click it to go back to the Launchpad.
- 2 **The menu.** Screens are grouped under **Farmers & Contracts**, **Distribution**, **Reports & Messages** and **Setup**. **Dashboard** sits above the groups. Click a group title to open or close it. The system remembers which groups you left open, and always opens the group of the screen you are on.
- 3 **Menu size.** The round arrow button (**Toggle Sidebar**) shrinks the menu to icons only, to give the screen more room. Click it again to show the names.
- 4 **Search.** Finds any screen you may open, in this module and in the rest of the system.
- 5 **Your profile menu.** Your name and photo, with the Launchpad, your profile, Dark Mode and Logout.
- 6 **The work area.** The screen you chose in the menu.

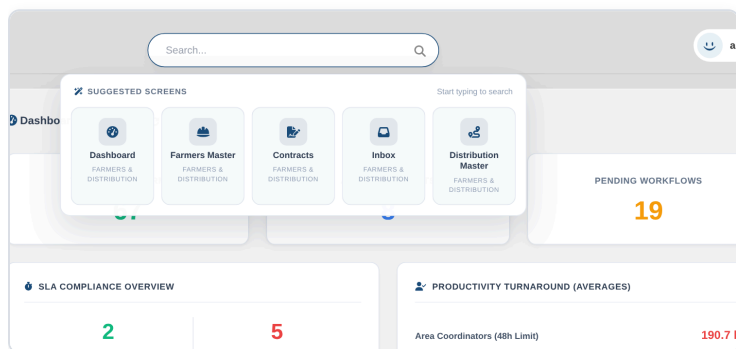

The menu contains these screens:

Group	Screen	Used for
-	Dashboard	Totals, approval speed and the location tree with managers (Chapter 7).

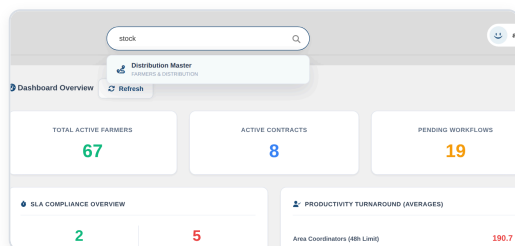

Group	Screen	Used for
Farmers & Contracts	Farmers Master	Farmer records, imports and exports (Chapter 3).
	Chairperson & Secretary	The office bearers of each club (Chapter 3).
	Contracts	Contracts and contract templates (Chapter 4).
	Inbox	Approvals waiting for you and for the levels below you (Chapter 5).
Distribution	Distribution Master	Issues from the phone, stock, deliveries, cycles, warehouses and stock items (Chapter 6).
	Progress	How far contracts and distribution have come, by area (Chapter 7).
Reports & Messages	Reports	Reports on screen and in Excel, and reports emailed on a schedule (Chapter 7).
	SMS & Broadcast	Messages to system users: Internal Broadcasts (Chapter 7).
Setup	Farmers Hierarchy	Hierarchy levels and manager assignments (Chapter 2).
	Locations Master	Every location and club, with its details (Chapter 2).
	Workflow	Approval rules, timers and stand-in approvers (Chapter 2).
	Settings	Module settings (Chapter 2).
	Audit Log	A permanent record of every change (Chapter 7).

Finding a screen

Click in the **Search...** box at the top. Before you type, it shows five screens to go to straight away: **Pinned & most visited**, **Your most visited screens** or, when you are new, **Suggested screens**. Each card shows how often you opened it. Click the pin on a card to keep it there; you can pin up to five screens. Your pins and visits are saved with your user, so they follow you to another computer.

Quick access, before typing.

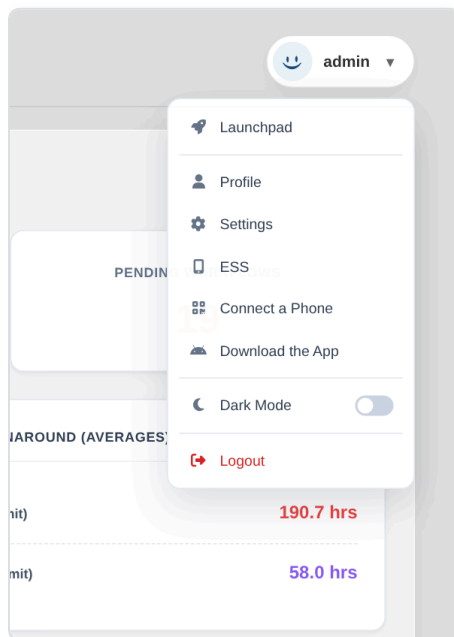

Search results while typing.

Start typing to search. The list shows up to eight screens you may open, from every module of the system. Use the arrow keys and **Enter**, or click a result. **Esc** closes the list. When nothing matches you see **No matching screens you have access to**.

Search on one word

Every word you type must appear in the screen name, the module name or the screen's key words. When a longer phrase finds nothing, try one word, for example *hierarchy* or *stock*.

Your profile menu

The profile menu.

Click your name at the top right.

- **Launchpad** goes back to the list of modules.
- **Profile** changes your first name, last name, email address and password. Leave the password boxes empty to keep your password.
- **Settings** opens System Settings. It shows only when you have rights there.
- **ESS** opens ESS.
- **Connect a Phone** shows the QR code that links a company phone to your company. It contains your company licence key, so show it only while setting up company phones. It closes by itself after two minutes. It shows only when you have rights in System Settings.
- **Download the App** shows a QR code and a link to download the Android app.
- **Dark Mode** switches the colours to dark. **Logout** signs you out.

Automatic logout

After 15 minutes without activity you are logged out with the message **You have been automatically logged out due to 15 minutes of inactivity**. Log in again to continue. Anything you had typed but not saved is lost.

Controls on every screen

Lists

- **Search boxes** filter the list as you type.
- **Filters** opens more filters in a drop-down. On some screens the filters only apply after you click **Apply Filters**.
- **Data Tools** holds the Excel actions of a screen: download a blank template, export, import, and see past imports.
- **Paging**. Long lists show one page at a time, with **Previous** and **Next** underneath.
- **Headings with arrows** sort the list. Click again to reverse the order.

Pop-ups

Adding and editing is done in pop-ups. **Cancel** or the **✕** closes a pop-up without saving. A pop-up can be made bigger: drag the small diagonal grip in its bottom-right corner (**Drag to resize (double-click to reset)**). The system remembers the size you choose on this computer.

Dates

Where a screen filters on a period, the **Dates** box opens a calendar. Drag across the days, or click a start day and then an end day. For one day, click that day twice. The ✕ in the box clears the dates.

Excel imports

Imports work in a similar way on every screen:

- 1 Download the template (or an export) so the columns are right.
- 2 Fill it in, save it, and choose it in the import.
- 3 Most imports check every row and show a preview first. **Nothing is saved until you click the import button.** Each chapter explains what its import checks.
- 4 Some imports can be undone afterwards. Chapter 8 lists which.

What you can see and do

Two things decide what the module shows you:

- **Your rights.** Your administrator decides which screens and which actions you may use (System Settings, on your role or your own user). Screens and buttons you may not use are hidden. When you try an action you have no right to, the message **You do not have permission for: ...** tells you which right is missing. Ask your administrator to add it.
- **Your locations.** On **Farmers Hierarchy** › **Manager Assignments** you are assigned to one or more locations. You see the farmers, contracts, warehouses and approvals of those locations and of every location below them.

Users with no locations see everything

Administrators, and users who are not assigned to any location, are not limited to locations: they see every farmer, contract and warehouse. Assign every user to their locations.

CHAPTER 2

Setting up

The screens under **Setup** in the menu: the hierarchy, locations, managers, settings and the approval workflow. They are normally set up once, before the season starts, and changed only when your organisation changes.

The order to set things up

Each step uses what the steps before it created. Following this order avoids import errors.

#	Where	What
1	Settings › General, Contract Rules, Seasons	Currency, what the phones are allowed to do, and the season.
2	Farmers Hierarchy › Hierarchy Levels	The levels of your organisation, L1 at the top.
3	Settings › Location Fields	Extra details kept on locations, for example a unique club number.
4	Locations Master	Every location and club, usually imported from Excel.
5	Distribution Master › Stock Items & Product Types	Stock items, products and what each product gets (Chapter 6).
6	Distribution Master › Warehouses	Warehouses and the locations they serve (Chapter 6).
7	Settings › Profile Fields, Contract Fields, Chairperson & Secretary Fields	Extra details kept on farmers, contracts and club office bearers.
8	Contracts › Contract Templates	The contract documents (Chapter 4).
9	Farmers Hierarchy › Manager Assignments	Which user looks after which locations.
10	Workflow	How approvals move up the levels.
11	Distribution Master › Cycles	The distribution round and what each contract receives (Chapter 6).
12	Farmers Master	The farmers, usually imported from Excel (Chapter 3).

Hierarchy levels

Farmers Hierarchy › **Hierarchy Levels** holds the levels of your organisation, from the top (L1) down to the clubs. Each level has the name your company uses for it.

LEVEL	POSITION	ACTION
▼ L1 Level 1	TOP	
▼ L2 Level 2		
▼ L3 Level 3		
📍 L4 Level 4	DEEPEST	

Four levels. The names are your own; the example uses Level 1 to Level 4.

- The tree shows each level with its number (L1, L2 ...) and its **Position: Top or Deepest**.
- The pencil renames a level. The bin deletes it. A level that locations still use cannot be deleted; the system lists what is still using it.

To add a level

Add Hierarchy Level.

- 1 Click **Add Level**.
- 2 Type the **Level Name**.
- 3 Choose the **Position**: at the top, between two levels, or at the bottom. The hint underneath says which number the new level gets. Levels below it move down one number and keep their locations, managers and workflow rules.
- 4 Click **Save Level**. It is saved straight away.

Level names are column headings

The level names become the column headings of the Locations, Farmers and Manager Assignment Excel templates. Give each level a different name.

Locations

Locations Master holds every location of your hierarchy, down to the clubs. Farmers belong to a club, and users are assigned to locations.

Locations & Areas Master

Download Template

BIOMETRIC NO	HIERARCHY TREE	TOBACCO TYPE	WAREHOUSE	HIERARCHY LEVEL	STATUS	ACTIONS
-	Location A	-	-	Level 1 (L1)	Active	 
-	↳ Location A1	-	-	Level 2 (L2)	Active	 
-	↳ Location A1.1	-	-	Level 3 (L3)	Active	 
BN-1005	↳ Club 01	Product 1	Warehouse 2	Level 4 (L4)	Active	 
BN-1006	↳ Club 02	Product 1	Warehouse 2	Level 4 (L4)	Active	 
BN-1013	↳ Club 06	Product 1	Warehouse 2	Level 4 (L4)	Active	 
BN-1014	↳ Club 07	Product 1	Warehouse 2	Level 4 (L4)	Active	 
-	↳ Location A1.2	-	-	Level 3 (L3)	Active	 
BN-1007	↳ Club 03	Product 1	-	Level 4 (L4)	Active	 
BN-1008	↳ Club 04	Product 1	-	Level 4 (L4)	Active	 

Locations & Areas Master. The tree shows each location under its parent.

- **Search Locations** finds a location by its name or by any value shown in the list. **Filter by Level** shows one level. **Rows Per Page** sets how many show at once. **Clear** resets the filters.
- **Choosing columns.** Click any column heading to open **Columns to show** and tick the details you want to see, for example a unique club number, the **Tobacco Type** or the **Warehouse**. Your choice is saved for your user.
- The pencil in **Actions** opens the location.

To add or change a location

Edit Area for a club, with its warehouse.

- 1 Click **Add Area**, or the pencil next to a location.
- 2 Fill in **Area Name**. Choose the **Parent Area (Optional)** (leave it empty for a top-level location) and the **Hierarchy Level**.
- 3 **Area Radius (Meters)** is the size of the circle around the location's pin (500 by default). Drag the pin on the map to the right place.
- 4 For a club, choose its **Tobacco Type** (the product the club grows).
- 5 **Warehouse (clubs only, when editing)**. Choose the one warehouse that serves this club; the phones then offer only that warehouse for the club's farmers. The list shows the warehouses linked to the club or to a level above it, nearest first. -- **None (the nearest level above)** -- uses the warehouses of the nearest level above the club.
- 6 Fill in the location fields for this level, if your company uses them, and click **Save Area**.

The circle must fit inside its parent

A location's circle must lie inside the circle of its parent. If it reaches outside, the location cannot be saved. Move the pin or make the radius smaller.

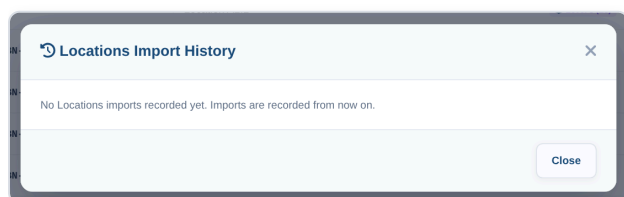

Locations in Excel

- **Download Template** gives an empty file with one column per level, then **Tobacco Type**, **Warehouse** and your location fields, and an Instructions sheet. Fill one row per club, from the top level down.
- **Export Locations** gives every location with the same columns, filled in, plus reference columns (Location ID, Status, Latitude, Longitude, Radius) that the import does not read. Edit the export and import it again to change many locations at once.
- **Warehouse column.** Type the name of the warehouse that serves the club on that row. It must be linked to the club or a level above it. Capitals and extra spaces do not matter.

Import Areas reads the file and asks how to use it:

Mode	What it does
Add & update	Adds new locations and fills in values. Never renames, moves or clears anything. A blank cell changes nothing. A club whose unique value already belongs to another club is reported as a possible duplicate, not created.
Overwrite - replace with this file	Your locations become exactly this file. Every location not in the file is removed, or deactivated if farmers, contracts, warehouses or users are still on it. Blank cells clear values. If any row fails, nothing is removed. The system asks you to confirm.
Move under new parents	For regrouping. A location that already exists somewhere else is moved under the parent named in the file, with everything under it. Old parents left empty afterwards are removed, unless someone is still assigned to them. The system asks you to confirm.

After the import, **Import Results** shows what happened: new areas, areas that already existed, field values, tobacco types and warehouses set, and anything renamed, moved or removed. Problem rows are listed underneath. **Undo this import** reverses it.

Locations Import History.

Import History lists past imports with who ran them and what they changed. **Only the most recent import can be undone.** To go further back, undo them one at a time, newest first.

Manager assignments

Farmers Hierarchy › **Manager Assignments** links users to locations. A user assigned to a location receives the approvals of that location, and sees the farmers, contracts and warehouses of that location and of every location below it.

HIERARCHY LEVELS

MANAGER ASSIGNMENTS

Manager Assignments

SEARCH MANAGER

Search managers...

Download Blank Template

Bulk Upload Assignments

Data Tools on Manager Assignments.

- 1 Open **Data Tools** and click **Download Blank Template**. It has a **Username** column, one column per level and your unique location field. Every cell has a drop-down list.
- 2 Fill one row per user and location. Repeat the username for more locations. Fill in the level the user sits at; higher levels are optional but are checked when filled.
- 3 Open **Data Tools**, click **Bulk Upload Assignments** and choose the file.
- 4 Check the preview. Each row is **OK**, **SKIPPED** (with the reason) or **FLAGGED** (the name matches more than one location and no unique value was given). Users are found by username, then email, then first and last name.
- 5 Click **Apply Assignments**, or **Discard**. Nothing a user already holds is removed.

- 6 The result shows the new assignments. **Roll back now** puts every user back as before; **Keep the import** closes it. Rows that were not applied stay listed in a red bar, which you can print as a PDF.

Settings

Settings has a menu on the left. Each section has an **(i)** with more help. The **Location Fields** card shows under every section.

☐ Can distribute with contract awaiting approval ⓘ

☐ Can distribute if contract expired ⓘ

☐ Can have multiple contracts ⓘ

High-Value Contract Threshold (Size/Hectares) ⓘ

Contracts of this size (hectares) or bigger are marked HIGH VALUE and always go through the approval workflow, even when an administrator captures them. There is no separate approval route. Club contracts have no size, so they are never marked. 0 = off.

e.g. 100

Save Rules

Contract Rules.

These rules apply to everyone who uses the field app. Tick a rule to allow it, then click **Save Rules**.

Rule	When ticked
Can Distribute without contract	The field app can issue inputs to a farmer who has no contract at all.
Can distribute with contract awaiting approval	Inputs can be issued as soon as a contract is captured, before it finishes the approval workflow.
Can distribute if contract expired	A farmer whose contract end date has passed can still receive inputs.

Rule	When ticked
Can have multiple contracts	One farmer can hold more than one active contract.
High-Value Contract Threshold (Size/Hectares)	Contracts of this size or bigger are marked HIGH VALUE . 0 switches it off. Club contracts have no size, so they are never marked.

Products & Recipes, with the recipe of Product 1 open.

A product is what the farmer grows (the screens also call it a tobacco type). Each product has a **recipe**: the default list of inputs for it. The recipe is copied into a distribution cycle, where it can be adjusted for that cycle (Chapter 6).

- To add a product, type the **Tobacco Type Code** and **Tobacco Type Name** (and a description if you like) and click **Save**. Its recipe opens straight away.
- The list icon opens a product's recipe; the pencil edits the product; the last button deactivates it. A deactivated product is no longer offered for new contracts or cycles; existing contracts keep it.
- In the recipe, find the stock item, choose the **Math Rule** and the quantity, and click **+**. The rules are **Fixed Amount**, **Multiply by Contract Size** and **By category (per hectare)**, which takes a quantity per hectare for Cat 1 to Cat 4. Adding an item that is already in the recipe updates its rule.

Many products at once

Products and their recipes can also be set up from one Excel file on **Distribution Master > Stock Items & Product Types** (Chapter 6).

- 3 Click **Save**. **Replace** or **Add signature** changes a signature later. An approver who opens this screen can sign for themselves with **Sign now**.

Signatures are not printed yet

As the screen says, signatures are only saved for now; they are not yet printed on contracts. Removing an approver keeps their signature, so adding them again brings it back.

API Integrations

Connections that bring data in from other systems. **Add API Endpoint** opens the set-up: **Configuration Name**, **HTTP Method**, **Endpoint URL**, the **Auth Type** and its details, and the **Data Field Mapping**, which links each key in the other system's data to a farmer field. Set these up together with whoever runs the other system.

Location Fields

 **Location Fields**

Extra information stored on each location in Locations Master (e.g. Biometric Number, Hectares). Pick a level to show a field on that level only. Tick Unique when no two locations may share the same value.

ACTIVE FIELDS

DEACTIVATED (ARCHIVED)

Field Name

e.g., Biometric Number, Hectares

Text

Applies To Level

All levels

☐ Mandatory

☐ Unique

+ Add

FIELD NAME	DATA TYPE	LEVEL	MANDATORY?	UNIQUE?	ACTIONS
Biometric No	Text	Level 4 (L4)	No	Unique	

Location Fields, shown under every Settings section.

Extra details kept on locations, for example a club number or hectares. Type the **Field Name**, choose the **Data Type** and the level under **Applies To Level** (or all levels), tick **Mandatory** if it must be filled in, and tick **Unique** when no two locations may share the same value. A unique field is the safest way to find a club in Excel files, because two clubs can have the same name.

Column	Meaning
Is Final Level?	The last level that approves. Once approved here the item is fully approved and never goes further up. Every level above it is greyed out and not used.
Approve From Mobile App?	The managers of this level approve or reject on the phone. They can still do it on the web after confirming, for example when the phone is broken. It cannot be on together with Approve On Arrival.

Ticking Approve On Arrival or Is Final Level clears and locks that level's timers. Click **Save Rules** when done. The **Saved workflows** table underneath shows what is saved for each workflow, and when.

Distribution

Every issue and return starts at the farmer's club and is approved level by level up to the Final level, where the stock moves. A level only finishes an issue by itself when every item already has its warehouse.

Until the Distribution rules are saved, an issue or return is approved in one step. The Saved workflows table then says **Not saved yet - approved in one step, as before**.

WORKFLOW COMPLETE (FULLY AUTHORIZED)

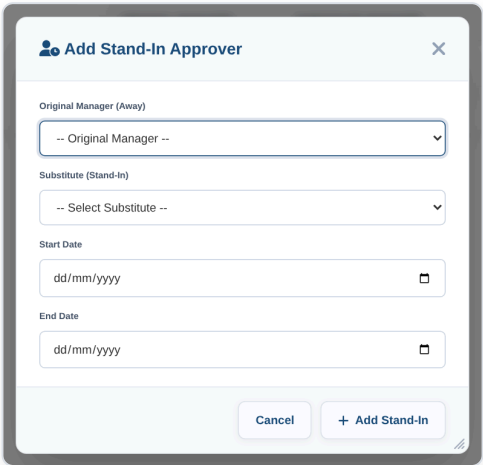

Path Preview for a contract that starts at Club 01.

Choose the **Workflow** and a starting location. The screen shows every step the item goes through and who approves it at each step, up to **Workflow Complete (Fully Authorized)**. A step with nobody assigned shows **No Manager Assigned**. Nothing is changed here; it is a check only.

Stand-in approvers

Stand-In Approvers.

Add Stand-In Approver.

Between the start and end dates, items that would go to the original manager go to the stand-in instead. After the end date it switches back by itself. Click **Add Stand-In**, choose the **Original Manager (Away)**, the **Substitute (Stand-In)** and the dates, and click **Add Stand-In**. The list shows each rule as **Active Now**, **Scheduled** or **Expired**. The bin removes a rule, and routing goes back to the original manager at once. A manager cannot stand in for themselves.

CHAPTER 3

Farmers

Farmer records on **Farmers Master**: finding, adding, changing and deactivating farmers, importing and exporting them in Excel, and the club office bearers on **Chairperson & Secretary**.

The farmer list

The screenshot shows the 'Farmers Master' interface. At the top, there's a search bar (1) labeled 'SEARCH ANY FIELD' with the placeholder 'Search farmers...'. To its right is a 'Filters' button (2). Further right are 'Data Tools' (3) and 'Add Farmer' (4) buttons. Below the search bar are two tabs: 'Active Farmers' and 'Deactivated Profiles' (5). The main part of the interface is a table with columns: CONTRACT NO., FARMER NAME, ID / PASSPORT, CELL PHONE, ASSIGNED AREA, MANAGER, PHOTO, and ACTIONS. The table lists 12 sample farmers. The first row (F1783) has a callout (6) pointing to the 'ACTIONS' column, which contains three icons: an eye (view), a pencil (edit), and a red circle with a slash (deactivate).

CONTRACT NO.	FARMER NAME	ID / PASSPORT	CELL PHONE	ASSIGNED AREA	MANAGER	PHOTO	ACTIONS
F1783	SAMPLE FARMER 001	-	-	Club 01	SAMPLE USER THREE	X	[Eye] [Pencil] [Deactivate]

F3666	SAMPLE FARMER 011	-	-	Club 01	SAMPLE USER THREE	X	[Eye] [Pencil] [Deactivate]
F4001	SAMPLE FARMER 012	ID100407	0700	Club 07	SAMPLE USER THREE	X	[Eye] [Pencil] [Deactivate]

Farmers Master.

- 1 **Search farmers...** searches every value on the farmer record as you type, including the profile fields.
- 2 **Filters:** filter by area and by profile status (below).
- 3 **Data Tools:** templates, export, import and import history.
- 4 **Add Farmer** opens a new farmer profile.
- 5 **Active Farmers** and **Deactivated Profiles** switch between the two lists.
- 6 The actions of each farmer: view the profile (eye), edit (pencil) and deactivate (red).

Each row shows the contract number, the farmer's name, ID or passport, cell phone, assigned area, the manager responsible and whether a photo is on file. **Manager** shows the managers of the highest level above the farmer that has someone assigned. **No Managers Assigned** means nobody is assigned anywhere above the farmer; **No manager** means

the farmer has no area. The list shows 50 farmers per page. A red warning next to a name means the farmer's pin is outside his area's radius; an orange **POSSIBLE DUPLICATE OF** badge means the system found a very similar farmer.

The screenshot shows the 'Farmers Master' interface. At the top, there's a search bar and a 'Filters' button. A dropdown menu for 'Filter Options' is open, showing 'Filter by Area' (set to 'All Areas') and 'Profile Status' (set to 'All Farmers'). Below the filters, there's a table with columns: CONTRACT NO., FARMER NAME, ASSIGNED AREA, MANAGER, PHOTO, and ACTIONS. The table lists several farmers, including 'SAMPLE FARMER 001' through 'SAMPLE FARMER 005'. A 'Data Tools' dropdown and an 'Add Farmer' button are also visible.

Filter options.

Filter by Area shows the farmers of one area. It matches that area only; farmers in the areas below it are not included.

Profile Status shows, for example, farmers with a missing photo or missing biometrics, fully enrolled farmers, or flagged duplicates.

Click **Apply Filters** for the filters to take effect.

Adding and changing a farmer

Click **Add Farmer**. The form has two tabs.

The screenshot shows the 'Add New Farmer' form. At the top, there's a header 'Add New Farmer' with a close button. Below it, there's a 'New Profile' section with a camera icon and the text 'SETUP REQUIRED INFO BELOW'. The form has two tabs: 'PERSONAL & CONTACT' (selected) and 'LOCATION & DOCS'. The 'PERSONAL & CONTACT' tab contains two main sections: 'CORE DETAILS' and 'CONTACT & ADDRESS'. The 'CORE DETAILS' section includes fields for FIRST NAME, SURNAME, MIDDLE NAME, KNOWN AS, ID NUMBER, PASSPORT NUMBER, CONTRACT NUMBER, and OPENING BALANCE. The 'CONTACT & ADDRESS' section includes fields for CELL PHONE, ALTERNATIVE PHONE, ADDITIONAL CONTACT DETAILS, and PHYSICAL ADDRESS. At the bottom, there's an 'ASSIGNED AREA' dropdown menu with a '-- None --' option. A note below the dropdown says 'No area assigned yet.' At the bottom right, there are 'Cancel' and 'Save Farmer' buttons.

Add New Farmer: the Personal & Contact tab.

- 1 **Personal & Contact.** Fill in at least **First Name**, **Surname** and **Cell Phone** (marked *). The other details are optional: middle name, known as, ID number, passport number, contract number, opening balance, alternative phone, additional contact details and physical address.
- 2 Choose the **Assigned Area**: the farmer's club. The full chain of levels shows under it, so you can check it is the right one.
- 3 **Location & Docs.** Drag the pin to the farmer's home or field. Upload the ID or passport document, and fill in the profile fields your company uses (below).
- 4 Click **Save Farmer**.

The screenshot shows the 'Add New Farmer' form with the 'LOCATION & DOCS' tab selected. The form is divided into several sections:

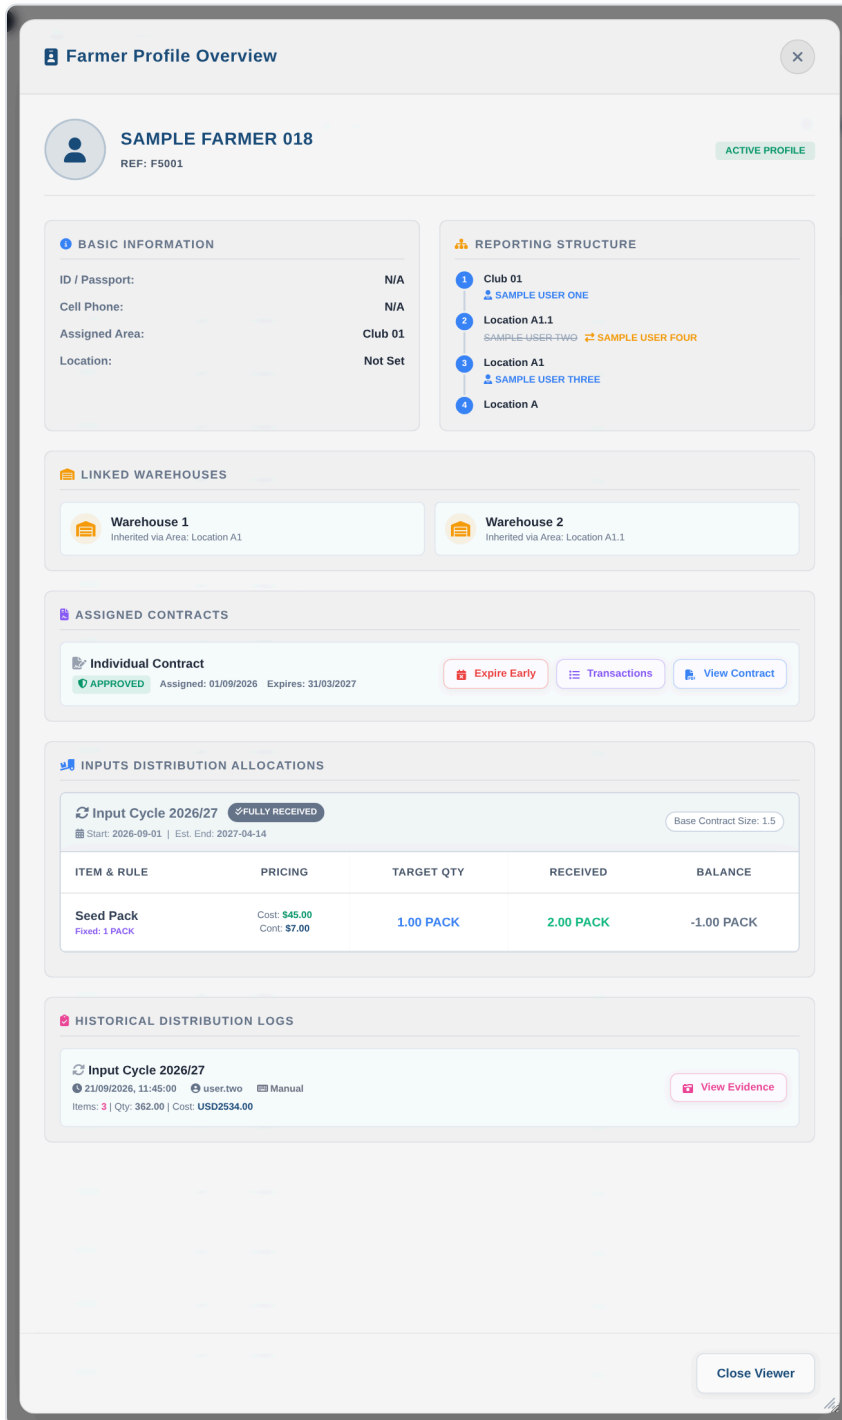

- Header:** 'Add New Farmer' with a close button (X).
- Profile Section:** 'New Profile' with a camera icon and a note 'SETUP REQUIRED INFO BELOW'.
- Navigation:** Two tabs: 'PERSONAL & CONTACT' and 'LOCATION & DOCS' (selected).
- GEO-LOCATION SETUP:** A map area with a pin and a note 'Drag the pin to set the exact physical location or home base for this farmer.' The map is powered by Leaflet and OpenStreetMap.
- FIXED DOCUMENTS:** A section for 'ID / Passport Document' with a 'View' button and a 'Browse File' button.
- CUSTOM ATTRIBUTES & DOCS:** A section with various fields:
 - Chairperson:** A checkbox labeled 'Yes'.
 - Secretary:** A checkbox labeled 'Yes'.
 - Cat 1 Volume:** A text input field.
 - Cat 2 Volume:** A text input field.
 - Cat 3 Volume:** A text input field.
 - Cat 4 Volume:** A text input field.
 - Total VOL Farmer:** A text input field.
 - Cat 1 Hectares:** A text input field.
- Footer:** 'Cancel' and 'Save Farmer' buttons.

The Location & Docs tab.

- **Profile fields** are set up in **Settings › Profile Fields & Documents**. The Cat 1–4 hectare and volume fields are built in; their totals are worked out as you type. The **Chairperson** and **Secretary** ticks put the farmer on the Chairperson & Secretary screen (see the end of this chapter).
- A mandatory document must be uploaded before the profile can be saved: **Please upload all mandatory documents before saving.**
- If the pin is outside the area's radius, the system warns you. You can still save; the profile is then flagged.
- Contract numbers may contain letters and digits only, with no spaces or symbols.

To change a farmer, click the pencil in the list. **Edit Farmer Profile** has the same two tabs. Click **Save Profile Updates** when done. The photo menu at the top lets you view, upload or remove the photo.

The farmer profile

Farmer Profile Overview.

The eye in the list opens the **Farmer Profile Overview**, everything about one farmer on one screen:

- **Basic Information** and whether a location is set (**View Map**).
- **Reporting Structure**: each level above the farmer with its managers. A stand-in shows as the manager crossed out and the stand-in next to him.
- **Linked Warehouses**: the warehouses that serve the farmer's area, directly or from a level above.
- **Assigned Contracts**, each with its status and dates, and the buttons **Expire Early**, **Transactions** (every item issued under that contract, with costs, and **Print Transactions**) and **View Contract**.

- **Inputs Distribution Allocations:** for each active cycle, what the farmer should get (**Target Qty**), what he has **Received** and the **Balance**, with a status such as **ACTIVE**, **ENDS THIS WEEK**, **OVERDUE** or **FULLY RECEIVED**.
- **Historical Distribution Logs:** every issue and return. **View Evidence** shows the photos, signatures and location captured on the phone, with **Print Evidence**.

Deactivating and reactivating

Deactivate Profile.

Farmers are never deleted. To take a farmer out of use, click the red button in the list, type the **Reason for Status Change** and click **Deactivate**. The farmer moves to **Deactivated Profiles**, with the date and reason.

To bring a farmer back, open **Deactivated Profiles**, click **Reactivate**, type the reason and confirm.

Importing farmers from Excel

Use an import to add many farmers at once, or to update many existing farmers.

- 1 Open **Data Tools** and click **Download Blank Template**. It has the farmer columns, one column per level (with drop-down lists) and your profile fields, and an Instructions sheet.
- 2 Fill in one row per farmer. Put each farmer's club under the level columns.
- 3 Open **Data Tools**, click **Import Excel Data** and choose the file. Leave **File contains a header row** ticked when row 1 has the column names.

Step 2: Map Columns.

- 4 **Map Columns.** The system matches each column in your file to a system field; check the matches and change any that are wrong. Choose **-- Ignore Column --** for columns you do not want. **First Name** is required.
- 5 Tick the options you need (below) and click **Preview Staging Area**.

- 6 **Staging & Verification.** Every row is checked and labelled: **NEW**, **UPDATE** (an existing farmer, found by Farmer ID, then contract number, then ID number) or **REJECTED** with the reason.
- 7 Click the import button to save the valid rows, or **Cancel / Abort**.

Import Farmers (Excel)

data alternatus.

STEP 3: STAGING & VERIFICATION

Review the data before committing. Updates are matched by Contract Number (or ID Number when a row has none). If errors occur during the save process, the entire batch will safely roll back.

STATUS / ACTION	VALIDATION NOTES	FIRSTNAME	LASTNAME	CONTRACTNUMBER	IDNUMBER	CELLPHONE	LEVEL 1	LEVEL 2
REJECTED	Contract No. contains invalid symbols/spaces	NEW	FARMER 104	F-91 04	ID900104	0700 900104	Location A	Location A1
NEW	✓ Valid	NEW	FARMER 101	F9101	ID900101	0700 900101	Location A	Location A1

☐ **Overwrite mode**
Treat this file as the complete list. Anyone not in it moves to Deactivated Profiles, and anyone in it who is deactivated is switched back on. All history is kept.

Cancel / Abort **Import**

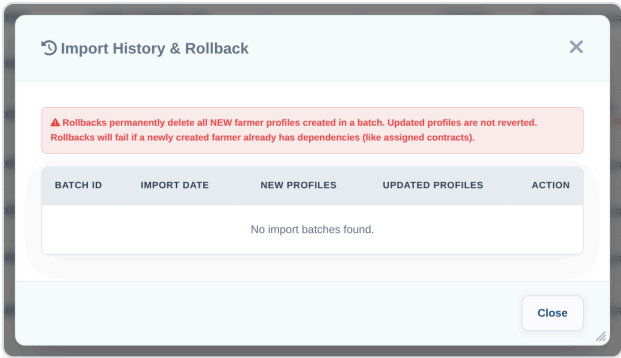

Step 3: a rejected row (the contract number has a space and a symbol) and a new farmer.

Option	What it does
Create missing areas from this file	An area in the file that is not in the hierarchy is created instead of stopping the import. You see the list first. The level above it must already exist.
Update existing farmers only	For a file from Export Farmer Data . Nobody is added, blank cells change nothing, and a different club moves the farmer. It needs a column that finds the farmers: Farmer ID, contract number or ID number.
Overwrite mode	Treats the file as the complete list. Anyone not in it moves to Deactivated Profiles, and anyone in it who is deactivated is switched back on. All history is kept. You must type the number of farmers who will be deactivated to confirm, and a snapshot of them is downloaded first.

An unknown area stops the whole import

If a row names an area that does not exist, nothing is imported and the import button reads **Area Not Found on ... Row(s) - Import Locked**. Fix the area names in the file, or tick **Create missing areas from this file**.

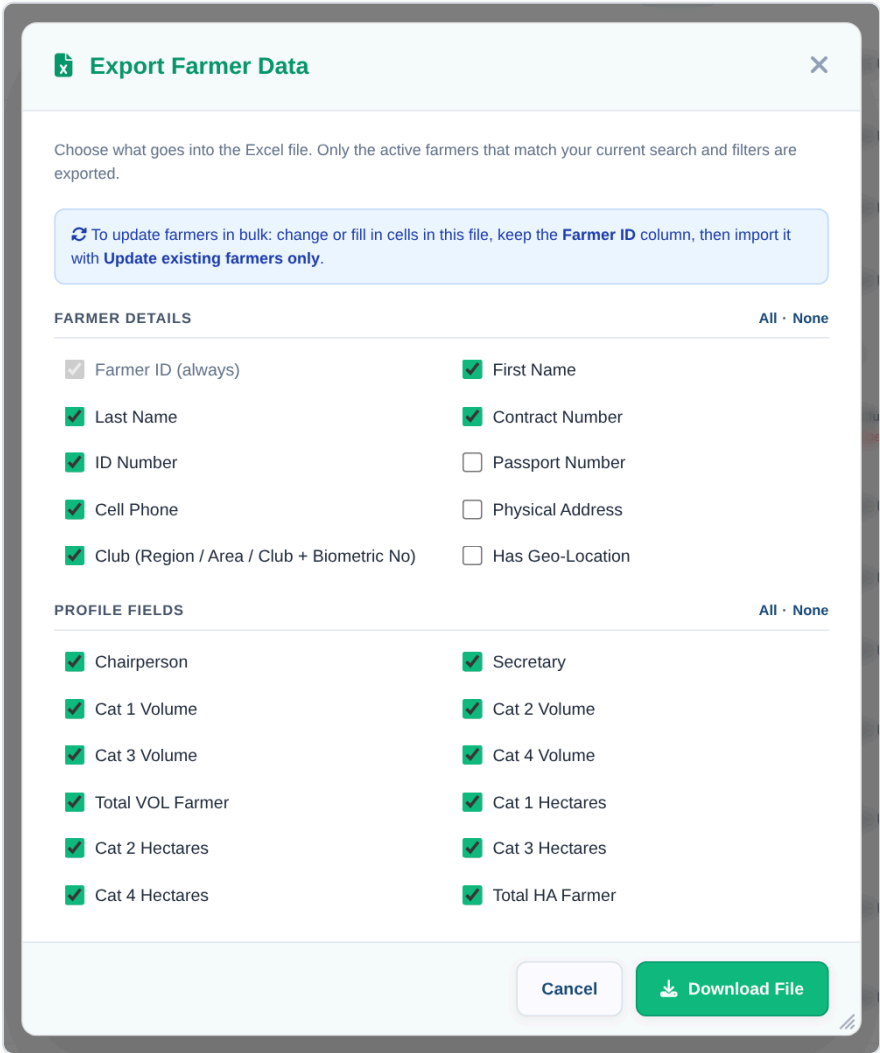

After the import, **Import Complete** shows the new, updated, deactivated and reactivated counts. Choose **Roll back now** to reverse it, or **Keep the import**.

Import History & Rollback.

View Import History lists past imports. A rollback permanently deletes the new farmers created by that import. It fails if a new farmer already has a contract.

Exporting farmers

Export Farmer Data.

Data Tools › Export Farmer Data downloads farmers to Excel. Tick the farmer details and profile fields you want (**All** and **None** help), and click **Download File**. The **Farmer ID** column is always included: keep it in the file to update the same farmers later with **Update existing farmers only**. Use the search box and the area filter first to limit the file to the farmers you need.

Chairperson & Secretary

Chairperson & Secretary lists the office bearers of each club. They sign club contracts on the phone. A farmer ticked **Chairperson** or **Secretary** on his profile (or in the farmer import) shows here by himself. People who are not farmers are added on this screen. One person can be both. Their photo and face are enrolled on the phone.

Chairperson & Secretary

Farmers ticked **Chairperson** or **Secretary** on their farmer profile (or by the farmer import) show here by themselves. Add people who are not farmers here, one by one or with **Data Tools > Import Excel**. One person can be both. Their photo and face are enrolled on the phone (Farmers > Chairperson and Secretary).

SEARCH

NAME	ROLE	CLUB	FARMER	PHOTO & FACE	ACTIONS
SAMPLE FARMER 002	SECRETARY	Club 02 Location A1.1	FARMER F2001	NEEDS ENROLMENT from his farmer profile	
SAMPLE OFFICER 01	CHAIRPERSON	Club 06 Location A1.1	Not a farmer	NEEDS ENROLMENT	

Showing 1-2 of 2 · 1 chairperson, 1 secretary

Chairperson & Secretary: one farmer and one person who is not a farmer.

- Search by name, club or contract number, and filter by **Role** and by **Who** (farmers, not farmers, two in one club, face not enrolled).
- Photo & face** shows **Enrolled**, **Photo only** or **Needs enrolment**. A ⚠ next to a role means the club has two people in that role.
- For a farmer, the remove button takes the role away; he stays a farmer. A person who is not a farmer is deactivated instead, and can be reactivated from the **Deactivated** tab.

To add a Chairperson or Secretary

Add Chairperson / Secretary

IS THIS PERSON ALSO A FARMER?

☐ No - not a farmer
 ☒ Yes - a farmer

FIRST NAME * SURNAME *

CLUB *

PROFILE PICTURE

Or take it on the phone when enrolling his/her face (Farmers > Chairperson and Secretary).

ROLE (ONE PERSON CAN BE BOTH)

☒ Chairperson
 ☐ Secretary

CHAIRPERSON & SECRETARY FIELDS

PHONE

Someone who is not a farmer.

Add Chairperson / Secretary

IS THIS PERSON ALSO A FARMER?

☐ No - not a farmer
 ☒ Yes - a farmer

SAMPLE FARMER 002
 Farmer · F2001 · Club 02
 NOT ENROLLED

Name, club, photo and face are kept on his farmer profile (Farmers Master); his face is enrolled in the phone's Farmer directory.

ROLE (ONE PERSON CAN BE BOTH)

☐ Chairperson
 ☒ Secretary

CHAIRPERSON & SECRETARY FIELDS

PHONE

A farmer.

- 1 Click **Add Chairperson / Secretary**.
- 2 Answer **Is this person also a farmer?**
 - **No - not a farmer:** type the first name and surname, find the club, and add a picture if you have one (or take it on the phone when the face is enrolled).
 - **Yes - a farmer:** find the farmer by name, contract number or ID number and pick him. His name, photo and face come from his farmer profile.
- 3 Tick **Chairperson, Secretary** or both, fill in any extra fields, and click **Save**.

Data Tools has **Download Import Template**, **Import Excel** and **Export This List**. In the template, farmers need only their contract number and Yes or No under Chairperson and Secretary; other people need their names and club. A club name used in two places needs its Club ID. The import shows a preview first; nothing is saved until you click **Import**.

CHAPTER 4

Contracts

The **Contracts** screen: following every contract through approval, assigning contracts on the web, changing and ending them, viewing club contracts, and keeping the contract templates.

The contract list

Contracts are captured on the phone (farmer contracts and club contracts) or assigned on the web. **Contracts › Manage Contracts** lists them all.

Manage Contracts | Contract Templates

SAMPLE FARMER 030 F5813	P1 - PRODUCT 1	1.5	1 Sept 2026	31 Mar 2027	UNDER REVIEW	Waiting for SAMPLE USER TWO at Location A1.1 - Level 3 (L3)	None yet	[Icons]

Manage Contracts.

- 1 Search by farmer name, contract number or template.
- 2 **Filters:** area, status, expiration and the user who approved it. A number on the button shows how many filters are in use.
- 3 **Assign Contract** assigns a contract on the web.
- 4 **Next Step:** who the contract is waiting for, at which location and level, or **Fully approved**.
- 5 **Approvals:** how many levels have approved so far and who approved last. Click it to see every step with its time.
- 6 The actions for each contract (below).

The **Farmer** column shows the farmer and contract number; a club contract shows the club and its number of farmers. The status is one of:

Status	Meaning
UNDER REVIEW	Waiting in the approval workflow. Next Step says where.
APPROVED	Fully approved.
REJECTED	Rejected in the Inbox. Next Step shows who rejected it and why.
EXPIRED	The end date has passed, or it was expired early.
LEGACY	Not approved and not waiting at any level.
HIGH VALUE	Shown next to the status when the contract size is at or above the threshold in Settings > Contract Rules .

The action buttons depend on the contract:

- **View club** (club contracts): the farmers, photos and signatures (see below).
- **Renew** (expired farmer contracts): opens Assign Contract with the farmer and template filled in, ready for the new dates and size.
- **Edit contract**: size, product and dates.
- **View PDF**: the contract document with the farmer's details filled in, with **Download** and **Open in new tab**.
- **Where it was signed**: when the phone recorded a location.
- **Expire early** (approved, not yet expired) and **Retire early**.

Assigning a contract on the web

Assign Contract to Farmer

1. Select Farmer
SAMPLE FARMER 010 (F2009)

2. Select Template
Club Contract 2026/27 (v1)

Valid From (Signed Date) 26/09/2026 Valid To (End Date) dd/mm/yyyy

☐ Set as Permanent Contract (No Expiry)

Contract Size
2.5

Product *
-- Select Product --

Decides which product items this contract receives in distribution cycles.

Contract Variables
Target Yield (kg)

SPECIFIC GEO-LOCATION (OPTIONAL)
Drag the pin to set the exact physical location where this specific contract will be executed.

Cancel Assign Contract

Assign Contract to Farmer.

- 1 Click **Assign Contract**.
- 2 Choose the farmer under **1. Select Farmer** and the template under **2. Select Template**. A PDF template whose fields are not mapped yet is greyed out (see Contract templates below).
- 3 **Valid From (Signed Date)** is today. Choose **Valid To (End Date)**, or tick **Set as Permanent Contract (No Expiry)**.
- 4 Type the **Contract Size**, choose the **Product** (it decides which product items the contract receives in distribution cycles), and fill in the **Contract Variables** your company uses.
- 5 Optionally drag the pin to where the contract applies, and click **Assign Contract**.

A contract assigned by a user starts in the approval workflow like any other (Chapter 5). **A contract assigned by an administrator is approved straight away**; its approvals show **Auto-Approved (Admin Override)**. A high-value contract always goes through the approval workflow, whoever assigns it. If the farmer already has a current contract and **Can have multiple contracts** is not ticked in Settings, the system refuses and says why.

Changing and ending a contract

Edit Contract Details.

Expire Contract.

Retire Contract Early.

- **Edit.** Change the size, product, dates or permanent tick and click **Save Changes**. When you change the product, the system asks you to confirm: from then on the contract receives the new product's items; items already issued stay recorded under the old product.
- **Expire.** Choose the **Expiration Date** (today by default), type the reason and click **Confirm Expiration**. The contract stops being valid from the start of that day.
- **Retire.** Type the reason and click **Confirm Retirement**. The contract's end date becomes today.

A reason is always kept

The reason you type shows in the contract's **Next Step** column.

Club contracts

A club signs one contract together on the phone: each farmer signs, then the Chairperson and the Secretary / Treasurer, with the field technician as witness. On the web a club contract can be followed and viewed; it is created and renewed on the phone.

Club 01 Location A1.1 · 3 farmer(s) · Club Contract 2026/27 · approved

#	Photo	Farmer	Contract No.	ID Number	Signature	Signed
1		SAMPLE FARMER 001	F1783	-		10/09/2026, 10:12:00

10/09/2026, 11:07:00

The club view: each farmer with photo and signature, and the office bearers underneath.

Click **View club** on the contract. The view lists every farmer with photo, contract number, ID number, signature and time signed, and underneath the cards of the Chairperson, the Secretary / Treasurer and the field technician (witness). Click a photo or signature to enlarge it. A yellow note warns when signatures have no photo.

Contract templates

Manage Contracts | **Contract Templates**

Contract Templates

Active Templates | Deactivated

Import Contract PDF ¹

TITLE	STATUS	CREATED DATE	ACTION
Club Contract 2026/27 VERSION V1	ACTIVE	29/09/2026, 11:34:02	
Individual Contract VERSION V1	ACTIVE	29/09/2026, 11:34:02	

Contract Templates.

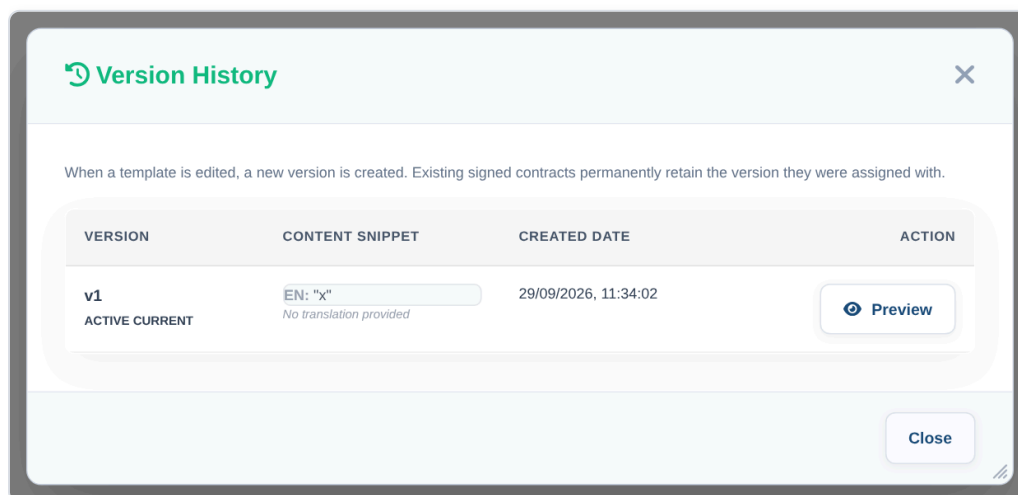

Contracts › **Contract Templates** holds the documents contracts are made from. Each template shows its version and type: **Text**, **PDF** · **N fields**, or **PDF** · **Not mapped**. Deactivated templates are on their own tab.

To add a template from a PDF

- 1 Click **Import Contract PDF** and choose the contract as a PDF file. It is kept exactly as it is.

- 2 The field mapper opens. On the page, drag a box where a value must be printed, choose the field under **Map this area to** and click **Assign**. Fields include the farmer's details and your contract fields; image fields such as photos and signatures are marked (image).
- 3 In **Mapped Fields**, set each field's size and alignment, and whether to hide the text underneath. **Show** finds it on the page, **Delete** removes it. Use **Prev** and **Next** for other pages.
- 4 Click **Save Field Map**. The template can now be used to assign contracts.

The actions on a template are **Map Fields** (the pin, for PDF templates), **Version History**, **Edit** and **Deactivate** or **Reactivate**. A deactivated template is no longer offered when assigning contracts; existing contracts are not affected.

Version History.

Versions protect signed contracts

When a template in use is edited, or its field map is changed, the system saves a new version. Contracts already signed keep the version they were signed with. **Version History** lists every version with **View PDF** or **Preview**.

CHAPTER 5

Approvals

The **Inbox**: approving and rejecting contracts, issues and returns at your level, and acting for the levels below you.

How approval works

Every contract, issue and return starts at the farmer's club and moves up one level at a time. At each level it waits in the Inbox of the users assigned to that location, until one of them approves it. It stops at the level ticked **Is Final Level?** on the Workflow screen, where it is fully approved. For an issue or a return, that is also when the stock moves. (Until the Distribution rules are saved on the Workflow screen, issues and returns are approved in one step.)

L1	Above the Final level: not used.	Not used
L2 • Final level	Fully approved here. For issues and returns, the stock moves.	Final
L3	Approves and sends it up.	Approves
L4 • club	Captured on the phone. Starts here.	Approves

Example only: your own rules are on the Workflow screen (Chapter 2). Levels can also approve on arrival, approve or escalate after a number of days, or approve on the mobile app.

My Approvals

Inbox (Pending Approvals)

Resend approver mails

Refresh Queue

My Approvals

Subordinate Inboxes

Tick rows to approve several at once - the box in the header ticks them all.

Approve selected

FARMER	CONTRACT TEMPLATE	ROUTING LOCATION	HIERARCHY LEVEL	ACTION
☐ SAMPLE FARMER 020 F5003 CONTRACT 12 Sept 2026, 04:15 (14 days ago)	Individual Contract	Location A1.1	Level 3 (L3)	☐

| ☐ SAMPLE FARMER 021 F5004 CONTRACT 13 Sept 2026, 05:15 (13 days ago) | Individual Contract | Location A1.1 | Level 3 (L3) | ☐ |

The Inbox of a user assigned to Location A1.1 (L3).

- 1 **My Approvals:** items waiting at your own level.
- 2 **Subordinate Inboxes:** items waiting at levels below you.
- 3 **Resend approver mails** emails the approvers a reminder (below).
- 4 The box in the header ticks every row you can approve, on all pages.
- 5 The actions of each item.

Each row shows the farmer, the type of item (**Contract**, **Dist. Issue** or **Dist. Return**), when it came in and how long it has been waiting, the template (for a contract), the location it is routed to and its level. Flags such as **High-Value Exception** and **Overdraft Outlier** show under the name. The list shows 10 items per page. **Refresh Queue** reloads it.

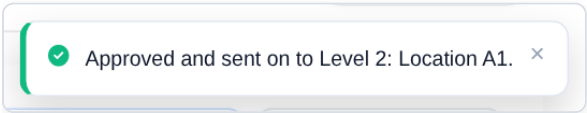

Button	What it does
Eye	Opens the contract document.
Green tick	Approves a contract at your level.
Resolve	Opens an issue or a return to choose its warehouse and approve it.
Red X	Rejects the item and sends it back.

Approving

Click the green tick. Before anything happens, the system tells you exactly what will happen, for example:

Approve and send it on to Level 2: Location A1 (SAMPLE USER THREE)?

At the Final level it says instead that this is the final approval and the contract will be fully approved.

The result.

Click **OK** to approve. The result shows at the top right, for example **Approved and sent on to Level 2: Location A1.** or **Fully approved - it will not go to anyone else.** The item leaves your Inbox and appears in the Inbox of the next level.

Approving several items at once

Inbox (Pending Approvals)

Resend approver mailsRefresh Queue

Contracts, returns and issues routed to you or waiting at your team's lower levels. Approve them at your level - they move up until the Final level set on the Workflow screen.

My ApprovalsSubordinate Inboxes

3 rows selected ClearApprove selected (3)

FARMER	CONTRACT TEMPLATE	ROUTING LOCATION	HIERARCHY LEVEL	ACTION
✓ SAMPLE FARMER 020 FS003 CONTRACT 12 Sept 2026, 04:15 (14 days ago)	Individual Contract	Location A1.1	Level 3 (L3)	EyeGreen tickRed X
✓ SAMPLE FARMER 021 FS004 CONTRACT 13 Sept 2026, 05:15 (13 days ago)	Individual Contract	Location A1.1	Level 3 (L3)	EyeGreen tickRed X
SAMPLE FARMER 022				

Three rows ticked.

- 1 Tick the rows, or tick the box in the header to select every row you can approve.
- 2 Click **Approve selected**. The system lists what you are about to approve and asks you to confirm.
- 3 Each item is approved at the level where it is waiting, exactly as its own button would. The result says how many were finished and how many were sent on. Items that moved on since the Inbox was loaded are left alone and listed.

An issue can be ticked only when its warehouse is already known. If a row's box is greyed out, point at it to see why, for example **Choose its warehouse first - press Resolve**.

Rejecting

Rejecting a contract.

Click the red **X**, type the **Reason** (it is required) and click **Reject**. The level below is told on the phone.

- **A contract** must be captured and signed again.
- **A club contract** must go through the Chairperson, the Secretary and the field technician again.
- **An issue or a return:** nothing is taken from or added to stock.

The item then shows as **Rejected** on Contracts or Incoming Logs.

Issues and returns

Issues and returns captured on the phone arrive in the Inbox like contracts. Click **Resolve** to open one.

An issue with an item that has no warehouse.

A return.

- 1 Check or choose the warehouse under **Assign Warehouse**. It is filled in from the phone's choice, then from the warehouse proposed by the level below, then from the warehouse of the location. Items whose warehouse was chosen on the phone keep it.

- 2 Click the approve button. Its name tells you what will happen:
 - **Approve & Pass Up:** you approve at your level and it goes to the next level. The stock moves when the Final level approves.
 - **Assign & Approve, Approve or Receive & Approve** (returns): at the Final level. The stock moves now.
- 3 Or click **Escalate** to pass it up without approving it. Escalate is not shown at the top of the hierarchy or at the Final level.

Stock can go below zero

When the Final level approves an issue, the stock leaves the warehouse even if the warehouse does not have enough. Negative stock shows in red on Live Inventory (Chapter 6) until the missing stock is received or transferred in.

Subordinate Inboxes

☐	SAMPLE FARMER 036 F5019 CONTRACT 12:00 (3 days ago)	Club 02	Level 4 (L4)	SAMPLE USER ONE	☐ ☒ ☐

Subordinate Inboxes: items waiting at the clubs below Location A1.1.

This tab shows what is waiting at the levels below you, with the manager assigned there (or **Unassigned** / **Orphan** when nobody is). Use **Filter by Hierarchy Level** to see one level. You can approve, resolve or reject these items for the level below; the system tells you that you are approving on behalf of that manager. Use this when a manager is away, or when a level has nobody assigned.

Levels that approve on the mobile app

When **Approve From Mobile App?** is on for a level (Chapter 2), its managers approve and reject on the phone. Their items show **Approve on the mobile app** in their Inbox, and **Their level approves on the mobile app** under Subordinate Inboxes. You can still act on the web: the system first asks whether you want to do it on the web instead, for example because the manager's phone is broken.

Reminder emails

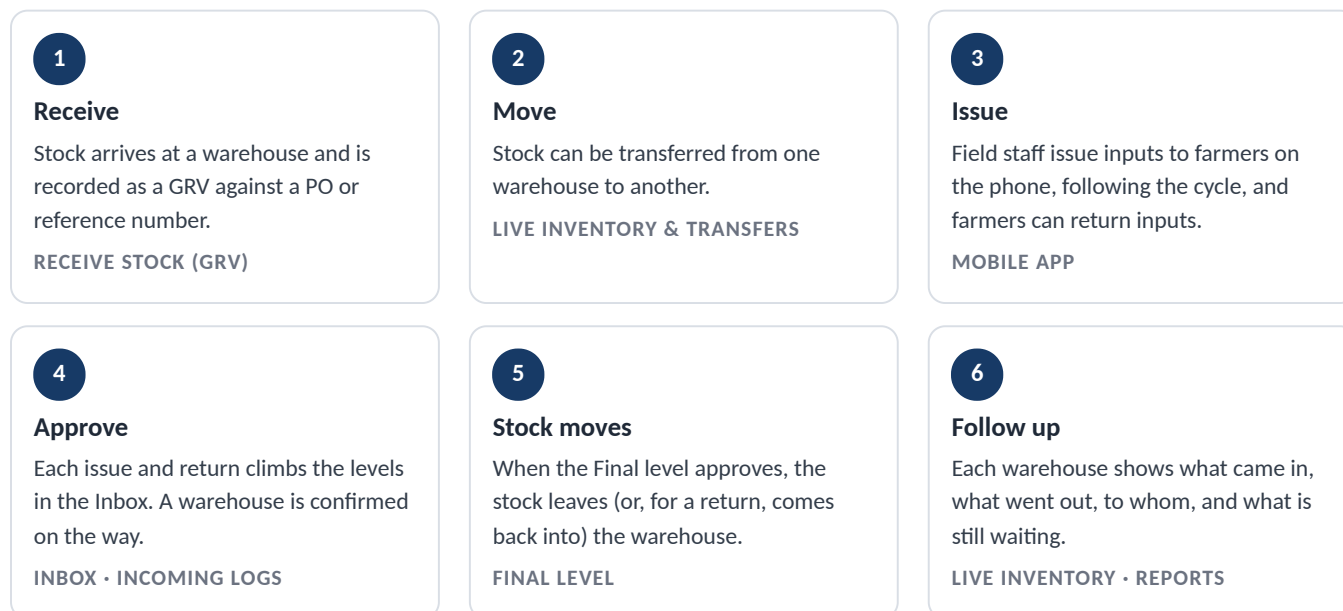

Resend approver mails emails the approvers of each level (and their stand-ins) about what is waiting there: the rows you ticked, or everything in your Inbox when nothing is ticked. Before sending, the system shows who will receive what, and who cannot be emailed, for example because their profile has no email address. Email (SMTP) must be set up under Tenant Settings first.

CHAPTER 6

Distribution

Distribution Master: warehouses, stock items and products, distribution cycles, receiving stock, the issues and returns captured on the phone, and the stock in each warehouse.

How stock moves

WAREHOUSE NAME	LINKED AREA	ACTION
Warehouse 1	Location A1 +5 Sub-Areas Inherited	
Warehouse 2	Location A1.1 +4 Sub-Areas Inherited	
Warehouse 3	Location A1.2 +2 Sub-Areas Inherited	

Distribution Master › Warehouses.

Each warehouse is linked to one location. It serves that location and every location below it (the list shows how many sub-areas it covers). The field staff's phones offer the warehouses of the farmer's club, or of the nearest level above it that has one. A club can also be given its own single warehouse in Locations Master (Chapter 2).

The 'Edit Warehouse' modal form contains the following fields and controls:

- Warehouse Name ***: A text input field with the value 'Warehouse 1'.
- Linked Geographic Area**: A dropdown menu with the value 'Location A1'.
- Sub-areas under the linked area are covered automatically.
- Buttons**: 'Cancel' and 'Update' buttons at the bottom right.

Click **Create Warehouse**, or the pencil next to a warehouse. Type the **Warehouse Name**, choose the **Linked Geographic Area**, and click **Save** (or **Update**).

Use the search box to find a warehouse by its name or area.

Edit Warehouse.

The 'Warehouses' page includes a navigation bar with tabs: Incoming Logs, Live Inventory & Transfers, Receive Stock (GRV), Cycles, Warehouses (active), and Stock Items & Product Types.

Distribution Warehouses

Link physical storage locations to your Geographic Areas for mobile field distribution.

Try a farmer

Quantities are per hectare. Cat 4 is always there, even when it is 0.

Quantity in ONE category only
 Quantity × the farmer's Total HA (Cat 1 + 2 + 3 + 4). Example: 8 per ha × 14 ha = 112.

Quantities in TWO or more categories
 Each category's quantity × the farmer's hectares in that category, added up.

New distribution cycle
 Cycles › Copy all product types brings these lines in, ready to adjust for that cycle.

P1 Product 1 3 items Active

STOCK ITEM	ITEM CODE	CAT 1	CAT 2	CAT 3	CAT 4	HOW IT IS WORKED OUT
Fertiliser A	FERT-A	50	50	50	—	× ha per category
Fertiliser B	FERT-B	2	3	—	—	× ha per category
Seed Pack	SEED	1	—	—	—	× Total HA

P2 Product 2 2 items Active

STOCK ITEM	ITEM CODE	CAT 1	CAT 2	CAT 3	CAT 4	HOW IT IS WORKED OUT
Fertiliser A	FERT-A	40	—	—	—	× Total HA
Fertiliser C	FERT-C	—	—	—	25	× Total HA

Product types, with the quantities per hectare for Cat 1 to Cat 4.

How quantities are worked out

- Quantity in ONE category only:** the quantity × the farmer's total hectares (Cat 1 + 2 + 3 + 4). Example: 8 per ha × 14 ha = 112.
- Quantities in TWO or more categories:** each category's quantity × the farmer's hectares in that category, added up.

To import stock items and products

- Click **Download template**, or **Export to Excel** to start from what is in the system now.
- Fill in one row per item, per product type: product type, item code and name, the quantity per hectare for Cat 1 to Cat 4, category and unit.
- Click **Import from Excel** and choose the file. Leave **Create product types that don't exist yet** ticked to add new products. Tick **Replace each product type's whole recipe with this file** only when items not in the file must come off.

Page 46 of 67

- Click **Check the file**. The check shows every change; nothing is saved yet. Download the skipped rows to fix them.
- Click the import button. **Undo this import** reverses it. **Import history** lists every import; undo the newest first.

Receive Bulk Stock (GRV).

- 1 Click **Receive New Stock**.
- 2 Type the **PO / Ref Number** and choose the **Destination Warehouse**.
- 3 Choose each item, type the **Quantity** (and the batch or lot number when the item needs one) and click **Add**.
- 4 Click **Process GRV**. The stock is added to the warehouse straight away.

To correct a delivery, click the pencil on the GRV, change the quantities and click **Save Changes**. The warehouse stock is corrected with it. Items cannot be added to or removed from a saved GRV.

Incoming Logs

Distribution Master › **Incoming Logs** lists the issues and returns captured on the phones, newest first. It shows the 100 most recent logs.

The screenshot shows the 'Incoming Distribution Logs' page. At the top, there are navigation tabs: 'Incoming Logs' (active), 'Live Inventory & Transfers', 'Receive Stock (GRV)', 'Cycles', 'Warehouses', and 'Stock Items & Product Types'. Below the tabs, the page title 'Incoming Distribution Logs' is followed by a 'Refresh Feed' button. A descriptive text states: 'Transactions captured by field staff in the mobile app. To bulk assign a warehouse to unassigned logs, filter by Area and specific Date to assure accurate targeting.' Below this is a filter section with three dropdowns: 'Filter by Assigned Area' (set to 'All Areas'), 'Dates' (set to 'Pick dates...'), and 'Status' (set to 'All Statuses'). A 'Bulk Assign Whs' button is to the right. The main table has columns: 'DATE & TIME', 'FARMER', 'AREA', 'CYCLE NAME', 'WAREHOUSE', 'TOTAL ITEMS', 'STATUS', and 'ACTION'. The first row is highlighted with a red box around the 'Inspect' button, labeled with a red circle 5. Other rows show various statuses like 'PENDING APPROVAL' and 'MISSING WAREHOUSE'. A red box around the 'Warehouse 2' link in the first row is labeled with a red circle 4. A red box around the 'Status' dropdown is labeled with a red circle 3. A red box around the 'Dates' dropdown is labeled with a red circle 2. A red box around the 'Filter by Assigned Area' dropdown is labeled with a red circle 1.

Click an item to see every movement with a running balance. Opening stock + received + transfers – issued = in stock now. Left after approval is what stays once the waiting issues are approved.

The warehouse view: Stock summary.

- **Header.** **All warehouses** goes back to the tiles; **Switch warehouse** opens another one. **Receive stock (GRV)** and **Transfer** start from this warehouse. **Export** downloads what the tab shows. **All time**, **Last 30 days** and **Last 7 days** set the period (In stock is always today's figure).

- **Totals.** In stock now (with its value at cost price), Received, Issued to farmers, Transfers in and out, and Waiting approval. Each has a link to the details.
- **Stock summary.** Per item: opening stock, received, transfers, issued, in stock now, waiting approval, and what is left after approval. Click an item for its stock card.

Waiting approval

Issues captured on the phones but not yet approved at the Final level have not left the warehouse. **Left after approval** shows what will remain once they are approved. A red figure there warns that the warehouse will be short.

Reason / Notes: e.g. Replenishing Area 2 Depot

Buttons: Cancel, Process Transfer

Transfer Bulk Stock.

A transfer cannot be more than the stock available at the source, and the two warehouses must be different.

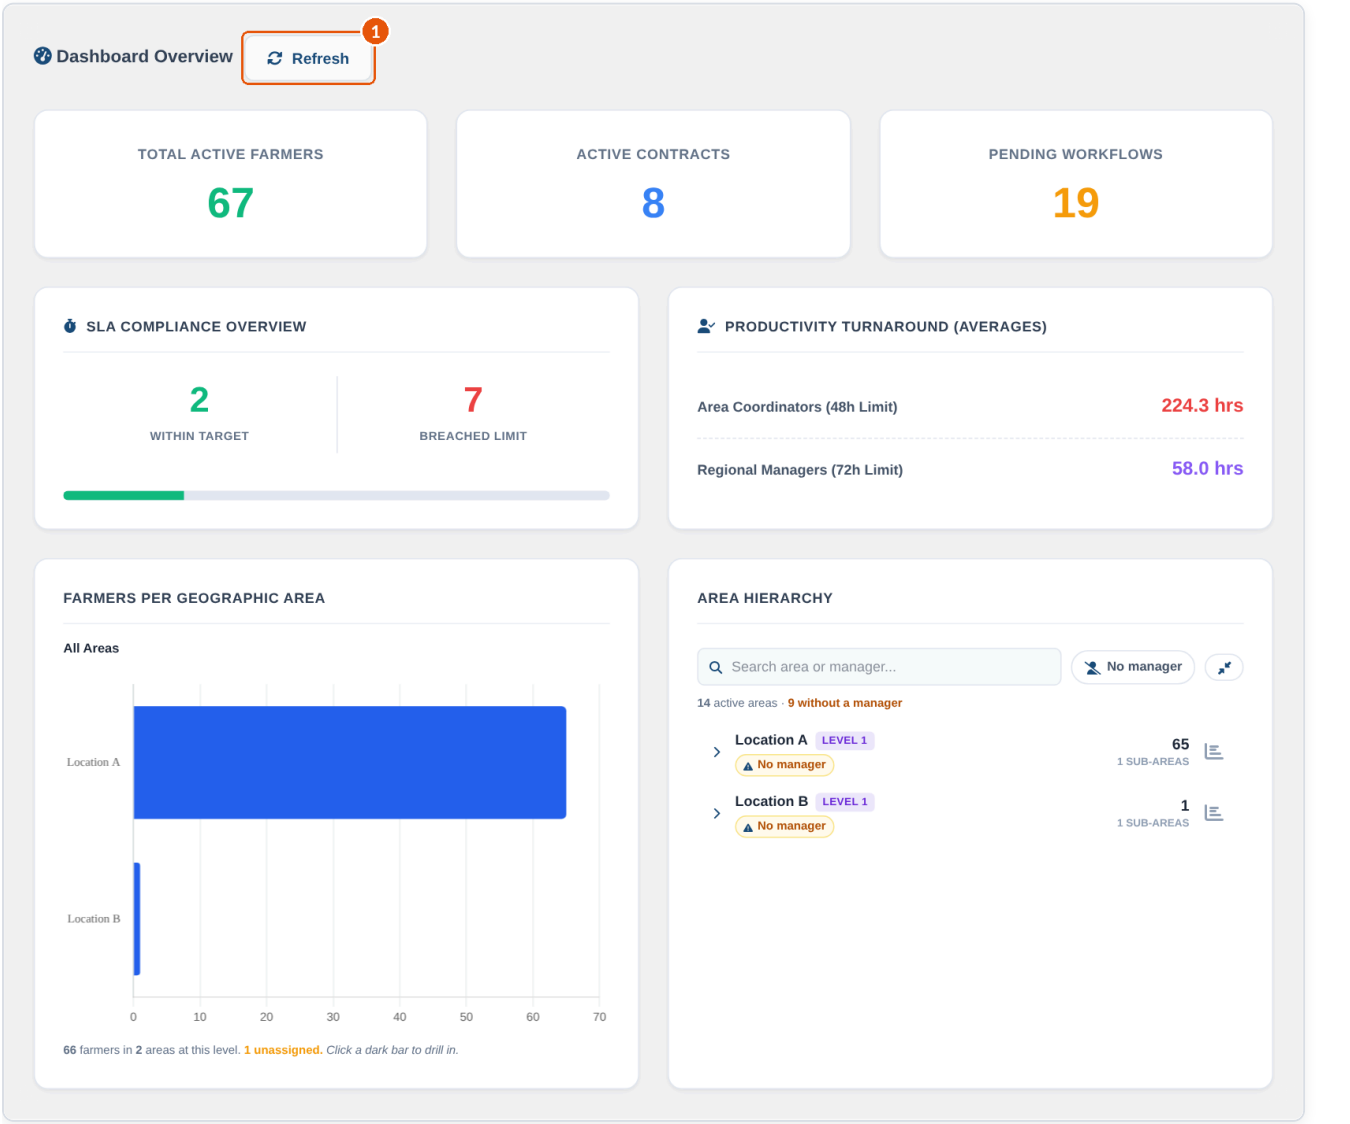

- 1 Click **Transfer Stock** (or **Transfer** in a warehouse).
- 2 Choose the **From Warehouse** and **To Warehouse**.
- 3 Choose the item (only items in stock at the source are listed, with the quantity available) and type the **Transfer Quantity**.
- 4 Type the reason and click **Process Transfer**.

CHAPTER 7

Monitoring

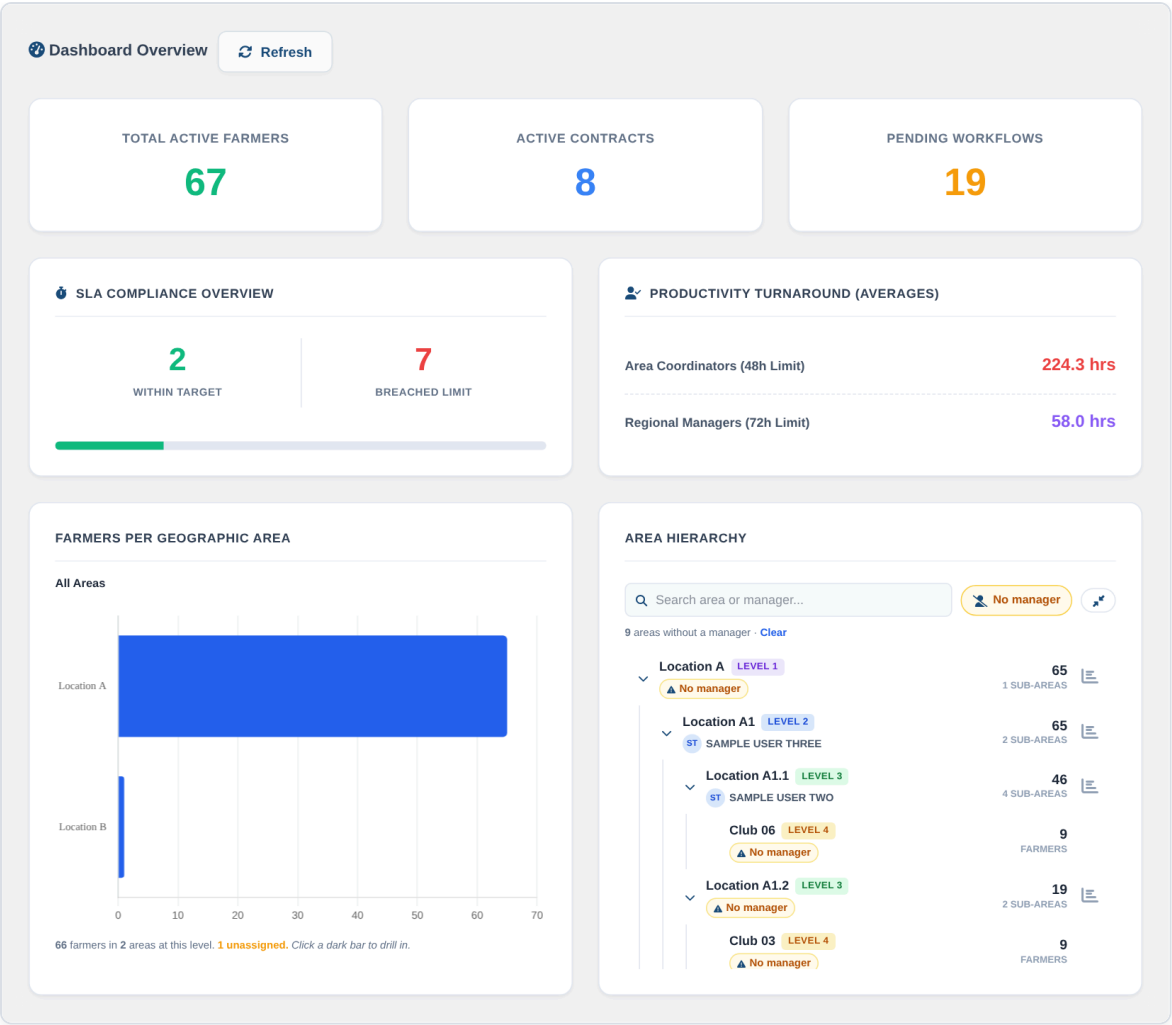

Following the work: the **Dashboard**, **Progress**, **Reports**, messages to users with **Internal Broadcasts**, and the **Audit Log**.

Dashboard

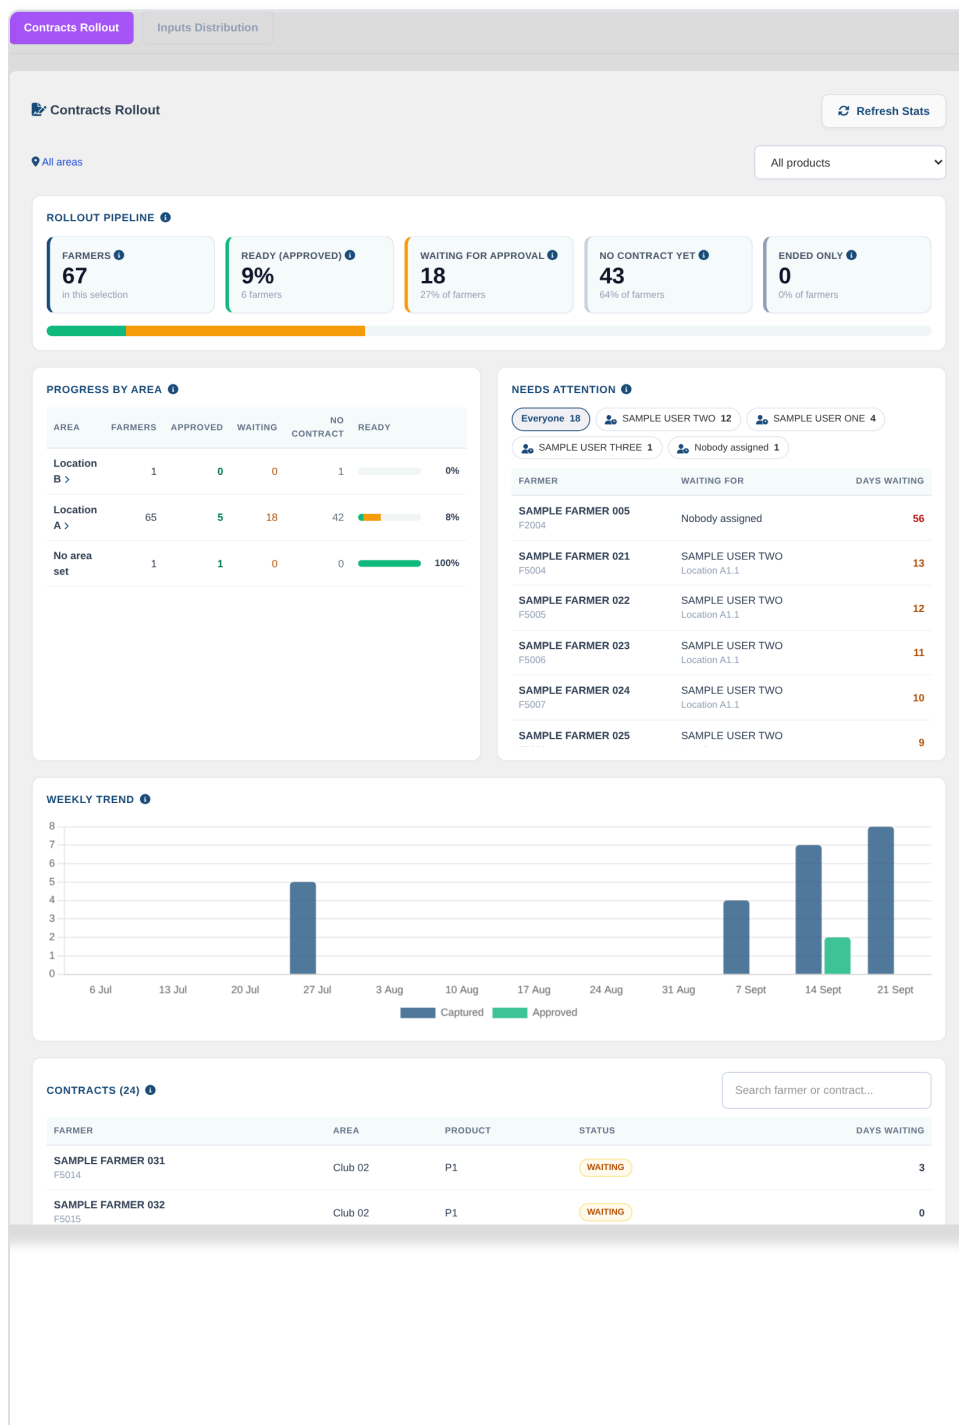

Dashboard Overview.

- **Total Active Farmers**, **Active Contracts** (approved and not expired) and **Pending Workflows** (contracts waiting for approval).
- **SLA Compliance Overview** counts approval steps done within their time limit and steps that took longer. **Productivity Turnaround** shows the average hours per approval step, with a limit of 48 hours for the first step and 72 hours for the later steps. A figure over its limit turns red.
- **Farmers per Geographic Area** is a bar chart per location. Click a dark bar to see the locations inside it; the path above the chart takes you back up.
- **Area Hierarchy** is the location tree with the managers of each location and its number of farmers. Search it by location or manager. **No manager** shows only the locations nobody is assigned to.

Progress

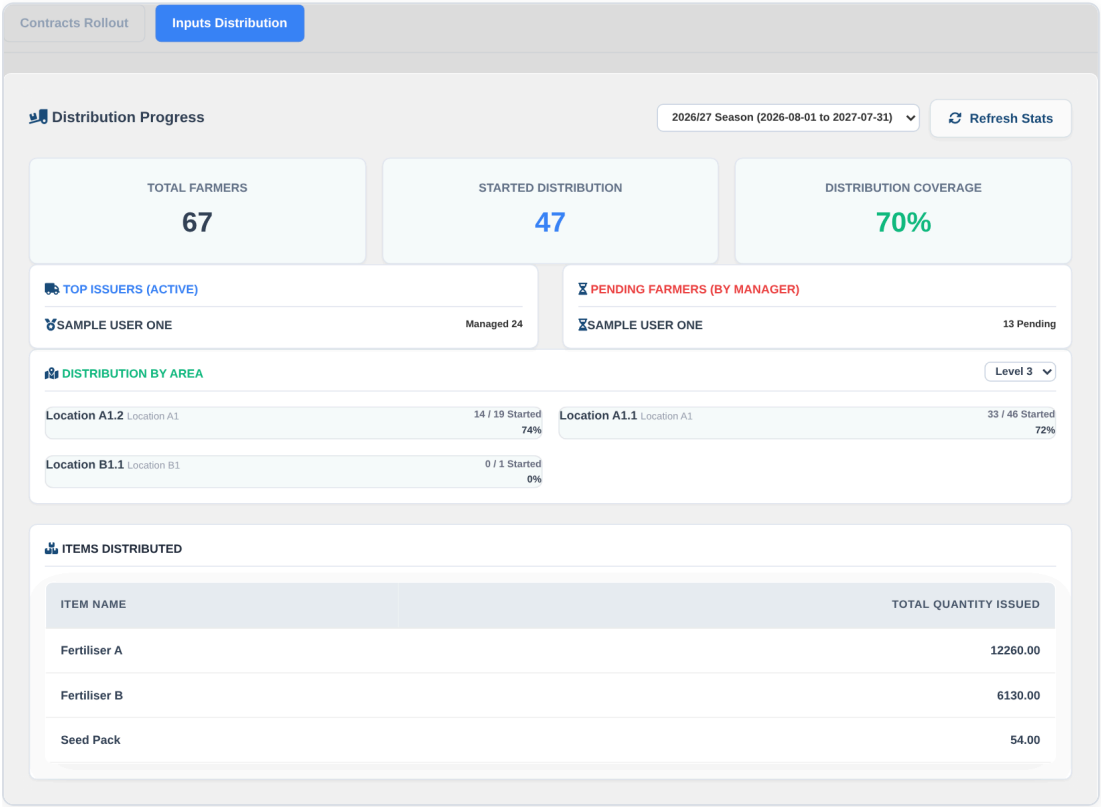

Progress › Contracts Rollout shows how far your farmers are with their contracts. A farmer counts as **ready** when he has an approved, current contract of his own. Club contracts are not counted on this screen.

Contracts Rollout.

- **Where.** Start at **All areas** and click a location in **Progress by area** to go down into it; the path at the top takes you back up. Choose a product at the top right to see one product only.
- **Rollout pipeline.** Every farmer is counted once, by his best contract: **Ready (approved)**, **Waiting for approval**, **No contract yet** and **Ended only** (every contract expired or retired; he needs a new one).
- **Progress by area.** The locations one level down, lowest completion first.

- **Needs attention.** Contracts waiting for approval, longest wait first. Click a manager's chip to see only theirs. Waits of 7 days or more show in amber, 14 days or more in red.
- **Weekly trend.** Contracts captured and approved per week, for the last 12 weeks.
- **Contracts.** Every contract in the selection, with a search box. Click a row in Needs attention or Contracts to open the contract.

Inputs Distribution.

Progress › Inputs Distribution shows, for a season, how many farmers have started receiving inputs, the managers whose farmers have started (**Top Issuers**), the farmers still waiting per manager, progress per location (choose the level at the top right of the box) and the total quantity of each item distributed.

Reports

Reports has one tab per report. On the first four, set the filters, click **Run Report** (**Run Trace** on Batch Tracking), and use **Export to Excel** to download it.

Report	What it shows
Contracts Report	Every active farmer with his most recent farmer contract and its approval status: approved, pending at a location, or unassigned. Club contracts are not included. Filter by area (with the areas below it) and status.
Distribution Report	Per farmer, the total items received in a season, and whether distribution has started. Filter by season, area and progress.
Batch Tracking	For an item with batch or lot tracking: where that batch is still in stock, and which farmers received it, when, and from whom.

Report	What it shows
SLA & Productivity	Each approval step with the approver, the hours it took, the limit and whether it was within the limit.
Scheduled Mailers	Reports emailed automatically as Excel files (below).
Duplicate Biometrics	Pairs of farmer profiles the phones found to be very similar (below).

Automated Report Mailers.

Choose the **Report Type**, the **Recipient User**, the **Area Scope** (all permitted areas, or the areas of that user), the **Frequency** (daily, weekly on Mondays or monthly on the 1st) and the **Time**, and click **Add Schedule**. The bin removes a schedule.

Duplicate biometrics

A flagged pair.

Each card shows two profiles and their similarity score. **View Detailed Comparison** puts both side by side, with who captured the biometrics, the reporting structure, the current contract and its approvals, and can be printed. Deactivate the profile that is the duplicate, or click **Ignore / Dismiss False Positive** when they are two different people.

Internal Broadcasts

SMS & Broadcast › Internal Broadcasts sends a message to users of the system, on the mobile app, in the web inbox, or both.

Compose Internal System Broadcast.

- 1 Choose the **Target Audience Scope**: all active users, one user, the users assigned directly to a location, or a location and everyone below it. Then choose the user or the location.
- 2 Choose the **Delivery Channels**.
- 3 Leave **Require Read & Accept Acknowledgement** ticked when each person must tap Accept to confirm they received it.
- 4 Type the **Broadcast Subject / Title** and the **Broadcast Message Body**, and click **Dispatch Internal Broadcast**.

CHAPTER 8

Reference

Statuses, the rules the system enforces, the Excel files, and the words used in the module.

Statuses

Record	Status	Meaning
Contract	Under review	Waiting in the approval workflow.
	Approved	Fully approved (straight away when an administrator assigned it, unless high value).
	Rejected	Rejected in the Inbox, with a reason.
	Expired	The end date has passed (at the end of that day), or it was expired early (from the start of the day chosen).
	Legacy	Not approved and not waiting at any level.
	High value	The size is at or above the threshold in Settings › Contract Rules.
Issue or return	Missing warehouse	Waiting for approval; at least one item has no warehouse yet.
	Pending approval	Waiting for approval; every item has a warehouse.
	Assigned / Approved	Approved at the Final level. The stock has moved.
	Rejected	Rejected in the Inbox. No stock moved.
Farmer	Active Profile · Deactivated	Deactivated farmers stay in the system with the reason and date.
Cycle allocation	Active · Ends this week · Overdue · Fully received	On the farmer profile, per active cycle.
Template	Active · Deactivated	Versions show as Active Current or Archived.
Stand-in	Active Now · Scheduled · Expired	Based on today's date and the rule's dates.
Broadcast recipient	Read · Pending · Accepted · Awaiting Accept	Whether the user has opened and accepted the message.

Rules to remember

Area	Rule
Farmers	Contract numbers may contain letters and digits only.
	A farmer import stops completely if any row names an area that does not exist, unless Create missing areas from this file is ticked.
	Mandatory profile documents must be uploaded before a profile can be saved.
	Rolling back a farmer import deletes the farmers it created, and fails if one of them already has a contract.
Locations	A location's circle must fit inside its parent's circle.
	Only the most recent Locations import can be undone.
	A level cannot be deleted while locations use it.
Contracts	A PDF template cannot be used until its fields are mapped.
	Changing a template in use creates a new version; signed contracts keep their version.
	Club contracts are created and renewed on the phone; the web shows them.
Approvals	Items stop at the Final level; levels above it are not used.
	Stock moves only when the Final level approves an issue or a return, and it can go below zero.
	A reason is required to reject.
	A manager cannot stand in for themselves.
Distribution	Bulk Assign Whs needs one area and one single day.
	A transfer cannot be more than the stock available at the source warehouse.
	An item with batch or lot tracking needs its batch or lot number on a GRV.
	Cycles are deactivated, not deleted.

Excel files

Where	Files
Farmers Master › Data Tools	Blank template, Export Farmer Data, Import Excel Data, View Import History (rollback).
Chairperson & Secretary › Data Tools	Import template, Import Excel, Export This List.
Locations Master	Download Template, Export Locations, Import Areas, Import History (undo the latest).

Where	Files
Farmers Hierarchy › Manager Assignments › Data Tools	Blank template, Bulk Upload Assignments (roll back after applying).
Distribution Master › Warehouses › Data Tools	Blank template, Export Warehouses, Import Excel Data, Club warehouses download list and import.
Distribution Master › Stock Items & Product Types	Download template, Export to Excel, Import from Excel, Import history (undo).
Distribution Master › Live Inventory	Export from the warehouse view.
Reports	Export to Excel on each report; Scheduled Mailers email them.

Words used

Word	Meaning
Level (L1, L2 ...)	A layer of your hierarchy. L1 is the top. Your company names each level.
Location / area	One place in the hierarchy, at a level. The screens use both words.
Club	A location at the lowest level. Farmers belong to a club.
Final level	The last level that approves. Nothing goes above it.
Product (tobacco type)	What a farmer grows. It decides which items the farmer's contract receives.
Recipe	The default list of inputs for a product, copied into each cycle.
Cat 1 – Cat 4	The four categories of a farmer's hectares, used to work out quantities per hectare.
Cycle	One distribution round, with its own list of items per contract.
Season	The growing year, used by the season filters of Progress and the Distribution Report.
GRV	A delivery of stock into a warehouse, against a PO or reference number.
Issue / Return	Inputs given to a farmer, or brought back by him, captured on the phone.
Log	One issue or return as it arrives from the phone.
Escalate	Pass an item up to the next level without approving it.
Stand-in	A user who receives another user's approvals for a period.
SLA	The time limit for an approval step.
